Performance Note
SB0100S02 - Electronic Driver Licenses

Sponsor: Sen. Fillmore, Lincoln

Performance Note Report

Author: Joe Brown
Agency: Department of Public Safety

Funding For:

New Services or Benefit

Public Benefit:

Purpose: The purpose of this bill is to provide individuals with an electronic version of their driver license.

Services: The division will contract with a vendor to provide an electronic driver license that would be available to the public.

Expected Outcome: The outcome is simply to be able to have available the ability to provide an electronic driver license to anyone that opts to have one by Jan. 1, 2021.

Implementations and Resources: Driver License will likely contract with a third party vendor to provide electronic driver licenses, DTS will need to monitor and make sure the information is flowing correctly to the vendor and that all information is safeguarded. The Legislature will need to appropriate to Driver License the resources necessary to pay DTS to accomplish the necessary upfront work to interface with a third party vendor or to have DTS establish the programming needed to provide this service. The Legislature may establish a fee necessary to pay for a third party vendor contract and/or maintenance by DTS; however, upfront funding is needed to get the program going.

How: There are third party vendors that are currently engaged in developing software that will provide an electronic driver license to those that want an electronic driver license on their personal devices. DTS may also be able to program software that will provide the license electronically.

Performance Measures

Goal

Title: Option for an electronic driver license by Jan. 1, 2021.

Description: Driver License will either contract with a private vendor or enlist the services of DTS and have processes in place by Jan 1, 2021 for an electronic driver license.

Collection Method: Simply to measure that those that want an electronic driver license are supplied one.
