Performance Note
SB0089 - Medical Cannabidiol Amendments

Sponsor: Sen. Vickers, Evan J.

Performance Note Report

Author: Stephen Ogilvie
Agency: Department of Agriculture and Food

Funding For:

New Services or Benefit

Public Benefit:

Purpose: The Department of Agriculture and Food (UDAF) is required by this bill to issue licenses to qualified individuals to operate cannabidiol production establishments. Also, UDAF is directed to issue registration cards to qualified individuals to act as agents of medical cannabidiol establishments. These licenses and registration cards are required to insure that the operations related to the cultivation and processing of medicinal cannabidiol occur within the parameters set by the Legislature.

Services: 1. Establish compatibility standards for an inventory control system 2. Offer licenses to a person to operate a cannabidiol production establishment after proved compliance with the requirements in the bill. 3. License renewal in accordance with the stipulations identified in the bill. 4. Monitor the number of licenses issued based on a maximum identified in the bill. 5. Register qualified individuals as cannabidiol production establishment agents. 6. Perform inspections to insure that a cannabidiol production establishment complies with the requirements of the bill. 7. Laboratory services to verify that a cannabidiol batch that does not meet the requirements set forth in the bill are appropriately handled.

Expected Outcome: 1. Medical cannabidiol establishments shall maintain an inventory control system that meets the requirements of the bill. 2. Licenses and registration cards will be issued to qualified individuals in accordance with the standards identified in the bill. 3. Inspections will occur that verify cannabidiol production establishments are operating in accordance with the standards identified in the bill. 4. A cannabidiol batch that does not meet the qualifications identified in the bill is properly handled.

Implementations and Resources: 1. UDAF will work with the Department of Technology Services to identify the standards for an inventory control system. 2. Licensing and registration will be incorporated into the already existing licensing system utilized by UDAF. 3. Inspectors will receive training to allow them to properly make a determination as to the adequacy of operational measures being performed by cannabidiol production establishments.

How: The activities performed by UDAF personnel will allow qualified individuals operating cannabidiol production establishments to produce cannabidiol that meets the standards identified in the bill. They will also offer, to the public, assurance that the on-going operations of these establishments generate the product intended by the bill.

Performance Measures

Goal

Title: Inspections of cannabidiol production establishments.

Description: Cannabidiol production establishments will be inspected at least 4 times annually by the Department of Agriculture and Food. The total number of inspections is dependent on the establishments in operation. The maximum number of establishments, as identified in the bill, is 5. With the maximum number of establishments in operation there would be a minimum of 20 inspections per year.

Collection Method: The inspections will be recorded along with a record of results of the inspections.

	2016	2017	2018
20	0.00	0.00	0.00
0	0.00	0.00	0.00

By rule, performance notes are provided by the governmental entity that will supervise the new agency or administer the new program. Performance notes are not written by the Office of the Legislative Fiscal Analyst.

Performance Note Report

Author: Joe Miner
Agency: Department of Health

Funding For:

New Services or Benefit

Public Benefit:

Purpose: This bill allows an individual with a qualifying illness who registers with the state electronic verification system to possess and use cannabidiol under certain circumstances. The Department of Health (DOH) is responsible to issue medical cannabidiol cards and medical cannabidiol research licenses to qualifying individuals.

Services: Pursuant to SB 89, the legislature intends for the DOH to support the planning, development, and ongoing operation of the electronic verification system that issues medical cannabidiol cards and medical cannabidiol research licenses.

Expected Outcome: DOH will issue 80% medical cannabidiol cards within 15 days after an individual submits an application. Timely processing of applications will expedite a qualifying patient's obtaining of the medical cannabidoil used to treat their medical condition. Over 15 days may be necessary to process applications that are incomplete when first submitted.

Implementations and Resources: DOH currently does not have the personnel resources necessary to implement SB 89. It is necessary for DOH to create a new position because the workload of existing employees is such that they could not take on the new responsibility. The electronic verification system will must be built to prevent incomplete applications from being submitted; however, system may not stop all incomplete applications.

How: Timely processing of applications is not possible without funding a new position. DOH can adequately support the services required by SB 89 if this funding is appropriated.

Performance Measures

Goal

Title: Percentage of medical cannabidiol cards issued within 15 days after an individual submits an application.

Description: The percentage of medical cannabidiol cards issued within 15 days after an individual submits an application.

Collection Method: Program manager will collect this data from reports generated by the electronic verification system.

	2016	2017	2018
Percent Issued w/i 15 days	0.00	80.00	80.00
None	0.00	80.00	80.00
