320 (b) This Subsection (1) does not apply to:
321 (i) any person who is lawfully engaging in the activities of a financial institution in this
322 state on July 1, 1981, unless the institution was not subject to the jurisdiction of the department
323 before that date;

325 (iii) the establishment of a service corporation or service organization.
326 (2) An applicant for authorization to become an institution subject to the jurisdiction of
327 the department shall pay to the department the appropriate filing fee, as provided in Section

335 and participation in any litigation or administrative proceeding of the organizers, the proposed
336 members of the board of directors, and the principal officers; and

349 those proposed as officers;
350 (iii) the character and standing in the community of those proposed as directors,
351 principal stockholders, or owners;
352 (iv) the need in the service area where the institution would be located, giving
353 particular consideration to the adequacy of existing financial facilities and the effect the
354 proposed institution would have on existing institutions in the area;
355 (v) the ability of the proposed service area to support the proposed institution,
356 including the extent and nature of existing competition, the economic history and future
357 prospects of the community, and the opportunity for profitable employment of financial
358 institution funds; and
359 (vi) other facts and circumstances bearing on the proposed institution that the
360 supervisor considers relevant.
361 (4) (a) The supervisor shall submit findings and recommendations in writing to the
362 commissioner.
363 (b) The application, any additional information furnished by the applicant, and the
364 findings and recommendations of the supervisor may be inspected by any person at the
365 department's office, except those portions of the application or report the commissioner
366 declares to be confidential, pursuant to the applicant's request, in order to prevent a clearly
367 unwarranted invasion of privacy.
368 (5) (a) If a hearing is held, the applicant shall publish notice of the hearing [~~at the~~

369 ~~applicant's expense in a newspaper of general circulation within the county where the proposed~~
370 ~~institution is to be located at least once a week~~] for three successive weeks before the date of

372 (b) The notice shall include the date, time, and place of the hearing and any other
373 information required by the commissioner.
374 (c) The commissioner shall act on the record before him within 30 days after receipt of
375 the transcript of the hearing.
376 (6) If no hearing is held, the commissioner may, within 90 days of acceptance of the
377 application as complete, approve or disapprove the application based on the papers filed with
378 him, together with the supervisor's findings and recommendations.
379 (7) (a) The commissioner may not approve the application unless the commissioner
380 finds that the applicant has established by the preponderance of the evidence that:
381 (i) in light of the need for financial services in the area, the adequacy of existing
382 facilities, and the effect the proposed institution would have on existing institutions in the area,
383 the public need and convenience will be promoted by the establishment of the proposed
384 institution;
385 (ii) in light of the ability of the proposed service area to support the proposed
386 institution, including the extent and nature of existing competition, the economic history and
387 future prospects of the community, and the opportunity for profitable employment of financial
388 institution funds, conditions in the service area in which the proposed institution would transact
389 business afford reasonable promise of a successful operation;
390 (iii) the institution is being formed only for legitimate purposes allowed by the laws of
391 this state;
392 (iv) the proposed capital equals or exceeds the required minimum and is adequate in
393 light of current and prospective conditions;
394 (v) if the applicant is seeking authority to accept deposits, the deposits will be insured
395 or guaranteed by an agency of the federal government;
396 (vi) the proposed officers and directors have sufficient experience, ability, and standing
397 to afford reasonable promise of a successful operation;
398 (vii) the name of the proposed financial institution does not resemble the name of any
399 other institution transacting business in this state so closely as to cause confusion;

400 (viii) the applicants have complied with all of the provisions of law; and
401 (ix) no properly managed and soundly operated existing institutions offering
402 substantially similar services in the service area to which the application relates will be unduly
403 injured by approval of the application.
404 (b) The commissioner may condition approval of the application on the institution's
405 acceptance of requirements or conditions with respect to insurance that the commissioner
406 considers necessary to protect depositors.
407 (8) (a) The commissioner shall provide written findings and conclusions on the
408 application.
409 (b) Upon approving an application, the commissioner shall:
410 (i) endorse the approval on the articles of incorporation;
411 (ii) file one copy with the Division of Corporations and Commercial Code;
412 (iii) retain one file copy; and
413 (iv) return one copy to the applicant within ten days after the date of the
414 commissioner's decision approving the application.
415 (c) Upon disapproving an application, the commissioner shall mail notice of the
416 disapproval to the applicant within ten days.
417 (d) The commissioner may approve an application subject to conditions the
418 commissioner considers appropriate to protect the public interest and carry out the purposes of
419 this title.
420 (e) The commissioner shall give written notice of the decision to all persons who have
421 filed a protest to the application.
422 (9) Upon approval of an application for authorization to conduct a business subject to
423 the jurisdiction of the department, the commissioner shall issue a license, permit, or other
424 appropriate certificate of authority if:
425 (a) except in the case of credit unions, all of the capital of the institution being formed
426 has been paid in; and
427 (b) all the conditions and other requirements for approval of the application have been
428 met.
429 (10) (a) Any approval by the commissioner of an application under this section is
430 considered revoked unless the business is open and operating within one year from the date of

431 the approval.
432 (b) The commissioner, on written application made before the expiration of that period,
433 and for good cause shown, may extend the date for activation for additional periods not to
434 exceed six months each.
435 (11) No person may obtain, for the purpose of resale, a certificate of approval to
436 operate any institution under the jurisdiction of the department.
437 (12) The commissioner may approve an application without any notice to other
438 financial institutions to respond to an emergency arising from the insolvency of an existing
439 institution or to prevent the failure of an existing institution if the commissioner makes the
440 findings required by Subsection (7).
441 Section 6. Section **7-1-706** is amended to read:
442 **7-1-706. Application to commissioner to exercise power -- Procedure.**
443 (1) Except as provided in Sections 7-1-704 and 7-1-705, by filing a request for agency
444 action with the commissioner, any person may request the commissioner to:
445 (a) issue any rule or order;
446 (b) exercise any powers granted to the commissioner under this title; or
447 (c) act on any matter that is subject to the approval of the commissioner.
448 (2) Within ten days of receipt of the request, the commissioner shall, at the applicant's
449 expense, cause a supervisor to make a careful investigation of the facts relevant or material to
450 the request.
451 (3) (a) The supervisor shall submit written findings and recommendations to the
452 commissioner.
453 (b) The application, any additional information furnished by the applicant, and the
454 findings and recommendations of the supervisor may be inspected by any person at the office
455 of the commissioner, except those portions of the application or report that the commissioner
456 designates as confidential to prevent a clearly unwarranted invasion of privacy.
457 (4) (a) If a hearing is held concerning the request, the commissioner shall publish notice
458 of the hearing [~~at the applicant's expense in a newspaper of general circulation within the~~
459 ~~county where the applicant is located at least once a week~~] on the Utah Public Notice Website
460 as described in Section 63F-1-701 for three successive weeks before the date of the hearing.
461 (b) The notice required by Subsection (4)(a) shall include the information required by

462 the department's rules.
463 (c) The commissioner shall act upon the request within 30 days after the close of the
464 hearing, based on the record before the commissioner.
465 (5) (a) If no hearing is held, the commissioner shall approve or disapprove the request
466 within 90 days of receipt of the request based on:
467 (i) the application;
468 (ii) additional information filed with the commissioner; and
469 (iii) the findings and recommendations of the supervisor.
470 (b) The commissioner shall act on the request by issuing findings of fact, conclusions,
471 and an order, and shall mail a copy of each to:
472 (i) the applicant;
473 (ii) all persons who have filed protests to the granting of the application; and
474 (iii) other persons that the commissioner considers should receive copies.
475 (6) The commissioner may impose any conditions or limitations on the approval or
476 disapproval of a request that the commissioner considers proper to:
477 (a) protect the interest of creditors, depositors, and other customers of an institution;
478 (b) protect its shareholders or members; and
479 (c) carry out the purposes of this title.
480 Section 7. Section **7-1-709** is amended to read:
481 **7-1-709. Branches -- Discontinuance of operation.**
482 (1) A Utah depository institution or out-of-state depository institution authorized to do
483 business in this state may discontinue operation of a branch upon resolution of its board of
484 directors.
485 (2) Upon adopting the resolution, the institution shall file an application with the
486 commissioner specifying:
487 (a) the location of the branch to be discontinued;
488 (b) the date of the proposed discontinuance;
489 (c) the reasons for closing the branch; and
490 (d) the extent to which the public need and convenience or service to members would
491 still be adequately met.
492 (3) Upon filing its application with the commissioner, the institution shall publish

493 notice of the discontinuance [~~in a newspaper serving the area~~] on the Utah Public Notice
494 Website as described in Section 63F-1-701 once a week for two consecutive weeks. The
495 commissioner may approve the application after a reasonable comment period following
496 publication.
497 (4) An out-of-state depository institution with a branch in Utah is not subject to the
498 requirements of this section if the branch to be closed is located outside of Utah.
499 Section 8. Section **7-2-6** is amended to read:
500 **7-2-6. Possession by commissioner -- Notice -- Presentation, allowance, and**
501 **disallowance of claims -- Objections to claims.**
502 (1) (a) Possession of an institution by the commissioner commences when notice of
503 taking possession is:
504 (i) posted in each office of the institution located in this state; or
505 (ii) delivered to a controlling person or officer of the institution.
506 (b) All notices, records, and other information regarding possession of an institution by
507 the commissioner may be kept confidential, and all court records and proceedings relating to
508 the commissioner's possession may be sealed from public access if:
509 (i) the commissioner finds it is in the best interests of the institution and its depositors
510 not to notify the public of the possession by the commissioner;
511 (ii) the deposit and withdrawal of funds and payment to creditors of the institution is
512 not suspended, restricted, or interrupted; and
513 (iii) the court approves.
514 (2) (a) Within 15 days after taking possession of an institution or other person under
515 the jurisdiction of the department, the commissioner shall publish a notice to all persons who
516 may have claims against the institution or other person to file proof of their claims with the
517 commissioner before a date specified in the notice. The filing date shall be at least 90 days
518 after the date of the first publication of the notice. The notice shall be published [~~in a~~
519 ~~newspaper of general circulation in each city or county in which the institution or other person,~~
520 ~~or any subsidiary or service corporation of the institution, maintains an office~~] on the Utah
521 Public Notice Website as described in Section 63F-1-701. The notice shall be published again
522 approximately 30 days and 60 days after the date of the first publication.
523 (b) (i) Within 60 days of taking possession of a depository institution, the

524 commissioner shall send a similar notice to all persons whose identity is reflected in the books
525 or records of the institution as depositors or other creditors, secured or unsecured, parties to
526 litigation involving the institution pending at the date the commissioner takes possession of the
527 institution, and all other potential claimants against the institution whose identity is reasonably
528 ascertainable by the commissioner from examination of the books and records of the
529 institution. No notice is required in connection with accounts or other liabilities of the
530 institution that will be paid in full or be fully assumed by another depository institution or trust
531 company. The notice shall specify a filing date for claims against the institution not less than
532 60 days after the date of mailing. Claimants whose claims against the institution have been
533 assumed by another depository institution or trust company pursuant to a merger or purchase
534 and assumption agreement with the commissioner, or a federal deposit insurance agency
535 appointed as receiver or liquidator of the institution, shall be notified of the assumption of their
536 claims and the name and address of the assuming party within 60 days after the claim is
537 assumed. Unless a purchase and assumption or merger agreement requires otherwise, the
538 assuming party shall give all required notices. Notice shall be mailed to the address appearing
539 in the books and records of the institution.
540 (ii) Inadvertent or unintentional failure to mail a notice to any person entitled to written
541 notice under this paragraph does not impose any liability on the commissioner or any receiver
542 or liquidator appointed by him beyond the amount the claimant would be entitled to receive if
543 the claim had been timely filed and allowed. The commissioner or any receiver or liquidator
544 appointed by him are not liable for failure to mail notice unless the claimant establishes that it
545 had no knowledge of the commissioner taking possession of the institution until after all
546 opportunity had passed for obtaining payment through filing a claim with the commissioner,
547 receiver, or liquidator.
548 (c) Upon good cause shown, the court having supervisory jurisdiction may extend the
549 time in which the commissioner may serve any notice required by this chapter.
550 (d) The commissioner has the sole power to adjudicate any claim against the
551 institution, its property or other assets, tangible or intangible, and to settle or compromise
552 claims within the priorities set forth in Section 7-2-15. Any action of the commissioner is
553 subject to judicial review as provided in Subsection (9).
554 (e) A receiver or liquidator of the institution appointed by the commissioner has all the

555 duties, powers, authority, and responsibilities of the commissioner under this section. All
556 claims against the institution shall be filed with the receiver or liquidator within the applicable
557 time specified in this section and the receiver or liquidator shall adjudicate the claims as
558 provided in Subsection (2)(d).
559 (f) The procedure established in this section is the sole remedy of claimants against an
560 institution or its assets in the possession of the commissioner.
561 (3) With respect to a claim which appears in the books and records of an institution or
562 other person in the possession of the commissioner as a secured claim, which, for purposes of
563 this section is a claim that constitutes an enforceable, perfected lien, evidenced in writing, on
564 the assets or other property of the institution:
565 (a) The commissioner shall allow or disallow each secured claim filed on or before the
566 filing date within 30 days after receipt of the claim and shall notify each secured claimant by
567 certified mail or in person of the basis for, and any conditions imposed on, the allowance or
568 disallowance.
569 (b) For all allowed secured claims, the commissioner shall be bound by the terms,
570 covenants, and conditions relating to the assets or other property subject to the claim, as set
571 forth in the note, bond, or other security agreement which evidences the secured claim, unless
572 the commissioner has given notice to the claimant of his intent to abandon the assets or other
573 property subject to the secured claim at the time the commissioner gave the notice described in
574 Subsection (3)(a).
575 (c) No petition for lifting the stay provided by Section 7-2-7 may be filed with respect
576 to a secured claim before the claim has been filed and allowed or disallowed by the
577 commissioner in accordance with Subsection (3)(a).
578 (4) With respect to all other claims other than secured claims:
579 (a) Each claim filed on or before the filing date shall be allowed or disallowed within
580 180 days after the final publication of notice.
581 (b) If notice of disallowance is not served upon the claimant by the commissioner
582 within 210 days after the date of final publication of notice, the claim is considered disallowed.
583 (c) The rights of claimants and the amount of a claim shall be determined as of the date
584 the commissioner took possession of the institution under this chapter. Claims based on
585 contractual obligations of the institution in existence on the date of possession may be allowed

586 unless the obligation of the institution is dependent on events occurring after the date of
587 possession, or the amount or worth of the claim cannot be determined before any distribution
588 of assets of the institution is made to claimants having the same priority under Section 7-2-15.
589 (d) (i) An unliquidated claim against the institution, including claims based on alleged
590 torts for which the institution would have been liable on the date the commissioner took
591 possession of the institution and any claims for a right to an equitable remedy for breach of
592 performance by the institution, may be filed in an estimated amount. The commissioner may
593 disallow or allow the claim in an amount determined by the commissioner, settle the claim in
594 an amount approved by the court, or, in his discretion, refer the claim to the court designated by
595 Section 7-2-2 for determination in accordance with procedures designated by the court. If the
596 institution held on the date of possession by the commissioner a policy of insurance that would
597 apply to the liability asserted by the claimant, the commissioner, or any receiver appointed by
598 him may assign to the claimant all rights of the institution under the insurance policy in full
599 satisfaction of the claim.
600 (ii) If the commissioner finds there are or may be issues of fact or law as to the validity
601 of a claim, liquidated or unliquidated, or its proper allowance or disallowance under the
602 provisions of this chapter, he may appoint a hearing examiner to conduct a hearing and to
603 prepare and submit recommended findings of fact and conclusions of law for final
604 consideration by the commissioner. The hearing shall be conducted as provided in rules or
605 regulations issued by the commissioner. The decision of the commissioner shall be based on
606 the record before the hearing examiner and information the commissioner considers relevant
607 and shall be subject to judicial review as provided in Subsection (9).
608 (e) A claim may be disallowed if it is based on actions or documents intended to
609 deceive the commissioner or any receiver or liquidator appointed by him.
610 (f) The commissioner may defer payment of any claim filed on behalf of a person who
611 was at any time in control of the institution within the meaning of Section 7-1-103, pending the
612 final determination of all claims of the institution against that person.
613 (g) The commissioner or any receiver appointed by him may disallow a claim that
614 seeks a dollar amount if it is determined by the court having jurisdiction under Section 7-2-2
615 that the commissioner or receiver or conservator will not have any assets with which to pay the
616 claim under the priorities established by Section 7-2-15.

617 (h) The commissioner may adopt rules to establish such alternative dispute resolution
618 processes as may be appropriate for the resolution of claims filed against an institution under
619 this chapter.
620 (i) In establishing alternative dispute resolution processes, the commissioner shall
621 strive for procedures that are expeditious, fair, independent, and low cost. The commissioner
622 shall seek to develop incentives for claimants to participate in the alternative dispute resolution
623 process.
624 (j) The commissioner may establish both binding and nonbinding processes, which
625 may be conducted by any government or private party, but all parties, including the claimant
626 and the commissioner or any receiver appointed by him, must agree to the use of the process in
627 a particular case.
628 (5) Claims filed after the filing date are disallowed, unless:
629 (a) the claimant who did not file his claim timely demonstrates that he did not have
630 notice or actual knowledge of the proceedings in time to file a timely proof of claim; and
631 (b) proof of the claim was filed prior to the last distribution of assets. For the purpose
632 of this subsection only, late filed claims may be allowed if proof was filed before the final
633 distribution of assets of the institution to claimants of the same priority and are payable only
634 out of the remaining assets of the institution.
635 (c) A late filed claim may be disallowed under any other provision of this section.
636 (6) Debts owing to the United States or to any state or its subdivisions as a penalty or
637 forfeiture are not allowed, except for the amount of the pecuniary loss sustained by the act,
638 transaction, or proceeding out of which the penalty or forfeiture arose.
639 (7) Except as otherwise provided in Subsection 7-2-15(1)(a), interest accruing on any
640 claim after the commissioner has taken possession of an institution or other person under this
641 chapter may be disallowed.
642 (8) A claim against an institution or its assets based on a contract or agreement may be
643 disallowed unless the agreement: (a) is in writing; (b) is otherwise a valid and enforceable
644 contract; and (c) has continuously, from the time of its execution, been an official record of the
645 institution. The requirements of this subsection do not apply to claims for goods sold or
646 services rendered to an institution in the ordinary course of business by trade creditors who do
647 not customarily use written agreements or other documents.

648 (9) (a) Objection to any claim allowed or disallowed may be made by any depositor or
649 other claimant by filing a written objection with the commissioner within 30 days after service
650 of the notice of allowance or disallowance. The commissioner shall present the objection to
651 the court for hearing and determination upon written notice to the claimant and to the filing
652 party. The notice shall set forth the time and place of hearing. After the 30-day period, no
653 objection may be filed. This Subsection (9) does not apply to secured claims allowed under
654 Subsection (3).
655 (b) The hearing shall be based on the record before the commissioner and any
656 additional evidence the court allowed to provide the parties due process of law.
657 (c) The court may not reverse or otherwise modify the determination of the
658 commissioner with respect to the claim unless it finds the determination of the commissioner to

2478 (2) Any public body subject to any budget law shall in its annual budget make proper

2510 delinquent taxes by participant members.
2511 (2) No ordinance, resolution, or proceeding in respect to any transaction authorized by
2512 this chapter is necessary except as specifically required in this chapter nor is the publication of
2513 any resolution, proceeding, or notice relating to any transaction authorized by this chapter
2514 necessary except as required by this chapter. Any publication made under this chapter may be
2515 made [~~in any newspaper conforming to the terms of this chapter and in which legal notices may~~

2553 authorized by them or any provisions made for the security and payment of the bonds or for the
2554 security and payment of the assignment agreement. After such time no person has any cause of
2555 action to contest the regularity, formality, or legality of same for any cause.

5749 **notice of intention not required for small mining operations -- Procedure for reviewing**
5750 **notice of intention.**
5751 (1) (a) Before any operator begins mining operations, or continues mining operations
5752 pursuant to Section 40-8-23, the operator shall file a notice of intention for each individual
5753 mining operation with the division.
5754 (b) The notice of intention referred to in Subsection (1)(a) shall include:
5755 (i) identification of all owners of any interest in a mineral deposit, including any
5756 ownership interest in surface land affected by the notice;
5757 (ii) copies of underground and surface mine maps;
5758 (iii) locations of drill holes;
5759 (iv) accurate area maps of existing and proposed operations; and
5760 (v) information regarding the amount of material extracted, moved, or proposed to be
5761 moved, relating to the mining operation.

5763 the operator shall conduct reclamation as required by rules promulgated by the board.
5764 (d) The notice of intention for mining operations, other than small mining operations,
5765 shall include a plan for reclamation of the lands affected as required by rules promulgated by
5766 the board.
5767 (2) The division may require that the operator rehabilitate, close, or mitigate the
5768 impacts of each drill hole, shaft, or tunnel when no longer needed as part of the mining
5769 operation.
5770 (3) Information provided in the notice of intention, and its attachments relating to the
5771 location, size, or nature of the deposit that is marked confidential by the operator shall be
5772 protected as confidential information by the board and the division and is not a matter of public
5773 record unless the board or division obtains a written release from the operator, or until the
5774 mining operation has been terminated as provided in Subsection 40-8-21(2).
5775 (4) (a) Within 30 days from the receipt of a notice of intention, the division shall
5776 complete its review of the notice and shall make further inquiries, inspections, or examinations
5777 that are necessary to properly evaluate the notice.
5778 (b) The division shall notify the operator of any objections to the notice and shall grant
5779 the operator a reasonable opportunity to take action that may be required to remove the
5780 objections or obtain a ruling relative to the objections from the board.
5781 (5) Except for the form and amount of surety, an approval of a notice of intention for
5782 small mining operations is not required.
5783 (6) The notice of intention for mining operations other than small mining operations,
5784 shall be reviewed as provided in this Subsection (6).
5785 (a) Within 30 days after receipt of a notice of intention or within 30 days following the
5786 last action of the operator or the division on the notice of intention, the division shall make a
5787 tentative decision to approve or disapprove the notice of intention.
5788 (b) The division shall:

5792 ~~newspapers of general circulation published in the county where the land affected is situated,~~
5793 ~~and in a daily newspaper of general circulation in Salt Lake City, Utah~~] on the Utah Public

5794 Notice Website as described in Section 63F-1-701.
5795 (c) The division shall also mail a copy of the abbreviated information and tentative
5796 decision to the zoning authority of the county in which the land affected is situated and to the
5797 owner of record of the land affected.
5798 (d) (i) Any person or agency aggrieved by the tentative decision may file a request for
5799 agency action with the division.
5800 (ii) If no requests for agency action are received by the division within 30 days after the

5802 shall notify the operator.
5803 (iii) If written objections of substance are received, the division shall hold a formal
5804 adjudicative proceeding.
5805 (e) This Subsection (6) does not apply to exploration.
5806 (7) Within 30 days after receipt of a notice of intention concerning exploration
5807 operations other than small mining operations, the division will review the notice of intention
5808 and approve or disapprove it.
5809 Section 138. Section **40-10-13** is amended to read:
5810 **40-10-13. Advertisement of ownership, location, and boundaries -- Notice to**
5811 **interested agencies or bodies -- Objections -- Conference.**
5812 (1) At the time of submission of an application for a surface coal mining and
5813 reclamation permit, or revision of an existing permit pursuant to the provisions of this chapter,
5814 the applicant shall submit to the division a copy of the applicant's advertisement of the
5815 ownership, precise location, and boundaries of the land to be affected. At the time of
5816 submission the advertisement shall be placed by the applicant [~~in a local newspaper of general~~
5817 ~~circulation in the locality of the proposed surface mine~~] on the Utah Public Notice Website as
5818 described in Section 63F-1-701 at least once a week for four consecutive weeks. The division
5819 shall notify various local governmental bodies, planning agencies, and sewage and water
5820 treatment authorities of water companies in the locality in which the proposed surface mining
5821 will take place, notifying them of the operator's intention to surface mine a particularly
5822 described tract of land and indicating the application's permit number and where a copy of the
5823 proposed mining and reclamation plan may be inspected. These local bodies, agencies,
5824 authorities, or companies may submit written comments within a reasonable period established

5825 by the division on the mining applications with respect to the effects of the proposed operation
5826 on the environment which are within their area of responsibility. These comments shall
5827 immediately be transmitted to the applicant by the division and shall be made available to the
5828 public at the same locations as are the mining applications.
5829 (2) (a) Any person having an interest which is or may be adversely affected or the
5830 officer or head of any federal, state, or local governmental agency or authority shall have the
5831 right to file written objections to the proposed initial or revised application for a permit for
5832 surface coal mining and reclamation operations with the division within 30 days after the last
5833 publication of the notice. These objections shall immediately be transmitted to the applicant by
5834 the division and shall be made available to the public.
5835 (b) If written objections are filed and a conference requested, the division shall then
5836 hold a conference within a reasonable time of the receipt of the objections or request. The
5837 conference shall be informal and shall be conducted in accordance with the procedures
5838 described in this Subsection (2)(b), irrespective of the requirements of Section 63G-4-203,
5839 Administrative Procedures Act. The conference shall be held in the locality of the coal mining
5840 and reclamation operation if requested within a reasonable time after written objections or the
5841 request for an informal conference are received by the division. The date, time, and location of
5842 the conference shall be advertised by the division in a newspaper of general circulation in the
5843 locality at least two weeks prior to the scheduled conference date. The division may arrange
5844 with the applicant upon request by any party to the administrative proceeding access to the
5845 proposed mining area for the purpose of gathering information relevant to the proceeding. An
5846 electronic or stenographic record shall be made of the conference proceeding unless waived by
5847 all parties. This record shall be maintained and shall be accessible to the parties until final
5848 release of the applicant's performance bond. In the event all parties requesting the conference
5849 stipulate agreement prior to the requested conference and withdraw their request, the
5850 conference need not be held.
5851 Section 139. Section **40-10-17 (Subsect (2)(t)(ii) Repeal 09/30/09)** is amended to
5852 read:
5853 **40-10-17 (Subsect (2)(t)(ii) Repeal 09/30/09). Performance standards for all coal**
5854 **mining and reclamation operations -- Additional standards for steep-slope surface coal**
5855 **mining -- Variances.**

5856 (1) Any permit issued pursuant to this chapter to conduct surface coal mining shall
5857 require that the surface coal mining operations will meet all applicable performance standards
5858 of this chapter, and such other requirements as the division shall promulgate.
5859 (2) General performance standards shall be applicable to all surface coal mining and
5860 reclamation operations and shall require the operations as a minimum to:
5861 (a) Conduct surface coal mining operations so as to maximize the utilization and
5862 conservation of the solid fuel resource being recovered so that reaffecting the land in the future
5863 through surface coal mining can be minimized.
5864 (b) Restore the land affected to a condition capable of supporting the uses which it was
5865 capable of supporting prior to any mining, or higher or better uses of which there is reasonable
5866 likelihood, so long as the use or uses does not present any actual or probable hazard to public
5867 health or safety or pose any actual or probable threat of water diminution or pollution, and the
5868 permit applicant's declared proposed land use following reclamation is not deemed to be
5869 impractical or unreasonable, inconsistent with applicable land use policies and plans, involves
5870 unreasonable delay in implementation, or is violative of federal, state, or local law.
5871 (c) Except as provided in Subsection (3) with respect to all surface coal mining
5872 operations backfill, compact (where advisable to insure stability or to prevent leaching of toxic
5873 materials) and grade in order to restore the approximate original contour of the land with
5874 highwalls, spoil piles, and depressions eliminated (unless small depressions are needed in order
5875 to retain moisture to assist revegetation or as otherwise authorized pursuant to this chapter); but
5876 in surface coal mining which is carried out at the same location over a substantial period of
5877 time where the operation transects the coal deposit and the thickness of the coal deposits
5878 relative to the volume of the overburden is large and where the operator demonstrates that the
5879 overburden and other spoil and waste materials at a particular point in the permit area or
5880 otherwise available from the entire permit area is insufficient, giving due consideration to
5881 volumetric expansion, to restore the approximate original contour, the operator, at a minimum,
5882 shall backfill, grade, and compact (where advisable) using all available overburden and other
5883 spoil and waste materials to attain the lowest practicable grade but not more than the angle of
5884 repose, to provide adequate drainage and to cover all acid-forming and other toxic materials, in
5885 order to achieve an ecologically sound land use compatible with the surrounding region. In
5886 surface coal mining where the volume of overburden is large relative to the thickness of the

5887 coal deposit and where the operator demonstrates that due to volumetric expansion the amount
5888 of overburden and other spoil and waste materials removed in the course of the mining
5889 operation is more than sufficient to restore the approximate original contour, the operator shall,
5890 after restoring the approximate contour, backfill, grade, and compact (where advisable) the
5891 excess overburden and other spoil and waste materials to attain the lowest grade but more than
5892 the angle of repose, and to cover all acid-forming and other toxic materials, in order to achieve
5893 an ecologically sound land use compatible with the surrounding region and that the overburden
5894 or spoil shall be shaped and graded in such a way as to prevent slides, erosion, and water
5895 pollution and is revegetated in accordance with the requirements of this chapter.
5896 (d) Stabilize and protect all surface areas, including spoil piles affected by the surface
5897 coal mining and reclamation operation to effectively control erosion and attendant air and
5898 water pollution.
5899 (e) Remove the topsoil from the land in a separate layer, replace it on the backfill area,
5900 or if not utilized immediately, segregate it in a separate pile from other spoil, and when the
5901 topsoil is not replaced on a backfill area within a time short enough to avoid deterioration of
5902 the topsoil, maintain a successful cover by quick growing plant or other means thereafter so
5903 that the topsoil is preserved from wind and water erosion, remains free of any contamination by
5904 other acid or toxic material, and is in a usable condition for sustaining vegetation when restored
5905 during reclamation; except if topsoil is of insufficient quantity or of poor quality for sustaining
5906 vegetation, or if other strata can be shown to be more suitable for vegetation requirements, then
5907 the operator shall remove, segregate, and preserve in a like manner the other strata which is
5908 best able to support vegetation.
5909 (f) Restore the topsoil or the best available subsoil which is best able to support
5910 vegetation.
5911 (g) For all prime farmlands, as identified in the rules, to be mined and reclaimed,
5912 specifications for soil removal, storage, replacement, and reconstruction, the operator shall, as a
5913 minimum, be required to:
5914 (i) segregate the A horizon of the natural soil, except where it can be shown that other
5915 available soil materials will create a final soil having a greater productive capacity, and if not
5916 utilized immediately, stockpile this material separately from other spoil, and provide needed
5917 protection from wind and water erosion or contamination by other acid or toxic material;

5918 (ii) segregate the B horizon of the natural soil, or underlying C horizons or other strata,
5919 or a combination of these horizons or other strata that are shown to be both texturally and
5920 chemically suitable for plant growth and that can be shown to be equally or more favorable for
5921 plant growth than the B horizon, in sufficient quantities to create in the regraded final soil a
5922 root zone of comparable depth and quality to that which existed in the natural soil, and if not
5923 utilized immediately, stockpile this material separately from other spoil, and provide needed
5924 protection from wind and water erosion or contamination by other acid or toxic material;
5925 (iii) replace and regrade the root zone material described in Subsection (2)(g)(ii) above
5926 with proper compaction and uniform depth over the regraded spoil material; and
5927 (iv) redistribute and grade in a uniform manner the surface soil horizon described in
5928 Subsection (2)(g)(i).
5929 (h) Create, if authorized in the approved mining and reclamation plan and permit,
5930 permanent impoundments of water on mining sites as part of reclamation activities only when
5931 it is adequately demonstrated that:
5932 (i) the size of the impoundment is adequate for its intended purposes;
5933 (ii) the impoundment dam construction will be so designed as to achieve necessary
5934 stability with an adequate margin of safety compatible with that of structures constructed under
5935 Public Law 83-566 (16 U.S.C. 1006);
5936 (iii) the quality of impounded water will be suitable on a permanent basis for its
5937 intended use and that discharges from the impoundment will not degrade the water quality
5938 below water quality standards established pursuant to applicable federal and state law in the
5939 receiving stream;
5940 (iv) the level of water will be reasonably stable;
5941 (v) final grading will provide adequate safety and access for proposed water users; and
5942 (vi) these water impoundments will not result in the diminution of the quality or
5943 quantity of water utilized by adjacent or surrounding landowners for agricultural, industrial,
5944 recreational, or domestic uses.
5945 (i) Conducting any augering operation associated with surface mining in a manner to
5946 maximize recoverability of mineral reserves remaining after the operation and reclamation are
5947 complete and seal all auger holes with an impervious and noncombustible material in order to
5948 prevent drainage except where the division determines that the resulting impoundment of water

5949 in the auger holes may create a hazard to the environment or the public health or safety; but the
5950 permitting authority may prohibit augering if necessary to maximize the utilization,
5951 recoverability, or conservation of the solid fuel resources or to protect against adverse water
5952 quality impacts.
5953 (j) Minimize the disturbances to the prevailing hydrologic balance at the mine site and
5954 in associated offsite areas and to the quality and quantity of water in surface and groundwater
5955 systems both during and after surface coal mining operations and during reclamation by:
5956 (i) avoiding acid or other toxic mine drainage by such measures as, but not limited to:
5957 (A) preventing or removing water from contact with toxic-producing deposits;
5958 (B) treating drainage to reduce toxic content which adversely affects downstream water
5959 upon being released to water courses; and
5960 (C) casing, sealing, or otherwise managing boreholes, shafts, and wells and keep acid
5961 or other toxic drainage from entering ground and surface waters;
5962 (ii) (A) conducting surface coal mining operations so as to prevent, to the extent
5963 possible using the best technology currently available, additional contributions of suspended
5964 solids to streamflow or runoff outside the permit area, but in no event shall contributions be in
5965 excess of requirements set by applicable state or federal law; and
5966 (B) constructing any siltation structures pursuant to this Subsection (2)(j)(ii) prior to
5967 commencement of surface coal mining operations, such structures to be certified by a qualified
5968 registered engineer to be constructed as designed and as approved in the reclamation plan;
5969 (iii) cleaning out and removing temporary or large settling ponds or other siltation
5970 structures from drainways after disturbed areas are revegetated and stabilized and depositing
5971 the silt and debris at a site and in a manner approved by the division;
5972 (iv) restoring recharge capacity of the mined area to approximate premining conditions;
5973 (v) avoiding channel deepening or enlargement in operations requiring the discharge of
5974 water from mines;
5975 (vi) preserving throughout the mining and reclamation process the essential hydrologic
5976 functions of alluvial valley floors in the arid and semiarid areas of the state; and
5977 (vii) such other actions as the division may prescribe.
5978 (k) With respect to surface disposal of mine wastes, tailings, coal processing wastes,
5979 and other waste in areas other than the mine working or excavations, stabilize all waste piles in

5980 designated areas through construction in compacted layers, including the use of incombustible
5981 and impervious materials, if necessary, and assure the final contour of the waste pile will be
5982 compatible with natural surroundings and that the site can and will be stabilized and
5983 revegetated according to the provisions of this chapter.
5984 (l) Refrain from surface coal mining within 500 feet from active and abandoned
5985 underground mines in order to prevent breakthroughs and to protect health or safety of miners;
5986 but the division shall permit an operator to mine near, through, or partially through an
5987 abandoned underground mine or closer to an active underground mine if:
5988 (i) the nature, timing, and sequencing of the approximate coincidence of specific
5989 surface mine activities with specific underground mine activities are jointly approved by the
5990 departments, divisions, and agencies concerned with surface mine reclamation and the health
5991 and safety of underground miners; and
5992 (ii) the operations will result in improved resource recovery, abatement of water
5993 pollution, or elimination of hazards to the health and safety of the public.
5994 (m) Design, locate, construct, operate, maintain, enlarge, modify, and remove or
5995 abandon, in accordance with the standards and criteria developed pursuant to the division's
5996 rules, all existing and new coal mine waste piles consisting of mine wastes, tailings, coal
5997 processing wastes, or other liquid and solid wastes, and used either temporarily or permanently
5998 as dams or embankments.
5999 (n) Insure that all debris, acid-forming materials, toxic materials, or materials
6000 constituting a fire hazard are treated or buried and compacted or otherwise disposed of in a
6001 manner designed to prevent contamination of ground or surface waters and that contingency
6002 plans are developed to prevent sustained combustion.
6003 (o) Insure that explosives are used only in accordance with existing state and federal
6004 law and the rules adopted by the board, which shall include provisions to:
6005 (i) provide adequate advance written notice to local governments and residents who
6006 might be affected by the use of the explosives by publication of the planned blasting schedule
6007 [~~in a newspaper of general circulation in the locality~~] on the Utah Public Notice Website as
6008 described in Section 63F-1-701 and by mailing a copy of the proposed blasting schedule to
6009 every resident living within 1/2 mile of the proposed blasting site and by providing daily notice
6010 to resident/occupiers in these areas prior to any blasting;

6011 (ii) maintain for a period of at least three years and make available for public
6012 inspection upon request a log detailing the location of the blasts, the pattern and depth of the
6013 drill holes, the amount of explosives used per hole, and the order and length of delay in the
6014 blasts;
6015 (iii) limit the type of explosives and detonating equipment, the size, the timing and
6016 frequency of blasts based upon the physical conditions of the site so as to prevent injury to
6017 persons, damage to public and private property outside the permit area, adverse impacts on any
6018 underground mine, and change in the course, channel, or availability of ground or surface water
6019 outside the permit area;
6020 (iv) require that all blasting operations be conducted by trained and competent persons,
6021 and to implement this requirement, the division shall promulgate rules requiring the training,
6022 examination, and certification of persons engaging in or directly responsible for blasting or the
6023 use of explosives in surface and coal mining operations; and
6024 (v) provide that upon the request of a resident or owner of a man-made dwelling or
6025 structure within 1/2 mile of any portion of the permitted area, the applicant or permittee shall
6026 conduct a preblasting survey of the structures and submit the survey to the division and a copy
6027 to the resident or owner making the request, the area of which survey shall be decided by the
6028 division and shall include such provisions as promulgated.
6029 (p) Insure that all reclamation efforts proceed in an environmentally sound manner and
6030 as contemporaneously as practicable with the surface coal mining operations; but where the
6031 applicant proposes to combine surface mining operations with underground mining operations
6032 to assure maximum practical recovery of the mineral resources, the division may grant a
6033 variance for specific areas within the reclamation plan from the requirement that reclamation
6034 efforts proceed as contemporaneously as practicable to permit underground operations prior to
6035 reclamation:
6036 (i) if the division finds in writing that:
6037 (A) the applicant has presented, as part of the permit application, specific, feasible
6038 plans for the proposed underground mining operations;
6039 (B) the proposed underground mining operations are necessary or desirable to assure
6040 maximum practical recovery of the mineral resource and will avoid multiple disturbance of the
6041 surface;

6042 (C) the applicant has satisfactorily demonstrated that the plan for the underground
6043 mining operations conforms to requirements for underground mining in the jurisdiction and
6044 that permits necessary for the underground mining operations have been issued by the
6045 appropriate authority;
6046 (D) the areas proposed for the variance have been shown by the applicant to be
6047 necessary for the implementing of the proposed underground mining operations;
6048 (E) no substantial adverse environmental damage, either onsite or offsite, will result
6049 from the delay in completion of reclamation as required by this chapter; and
6050 (F) provisions for the offsite storage of spoil will comply with Subsection (2)(v);
6051 (ii) if the board has adopted specific rules to govern the granting of the variances in
6052 accordance with the provisions of this Subsection (2)(p) and has imposed such additional
6053 requirements as considered necessary;
6054 (iii) if variances granted under this Subsection (2)(p) are to be reviewed by the division
6055 not more than three years from the date of issuance of the permit; and
6056 (iv) if liability under the bond filed by the applicant with the division pursuant to
6057 Section 40-10-15 shall be for the duration of the underground mining operations and until the
6058 requirements of this Subsection (2) and Section 40-10-16 have been fully complied with.
6059 (q) Insure that the construction, maintenance, and postmining conditions of access
6060 roads into and across the site of operations will control or prevent erosion and siltation,
6061 pollution of water, damage to fish or wildlife or their habitat, or public or private property.
6062 (r) Refrain from the construction of roads or other access ways up a stream bed or
6063 drainage channel or in such proximity to the channel so as to seriously alter the normal flow of
6064 water.
6065 (s) Establish on the regraded areas and all other lands affected, a diverse, effective, and
6066 permanent vegetative cover of the same seasonal variety native to the area of land to be
6067 affected and capable of self-regeneration and plant succession at least equal in extent of cover
6068 to the natural vegetation of the area; except that introduced species may be used in the
6069 revegetation process where desirable and necessary to achieve the approved postmining land
6070 use plan.
6071 (t) (i) Assume the responsibility for successful revegetation, as required by Subsection
6072 (2)(s), for a period of five full years after the last year of augmented seeding, fertilizing,

6073 irrigation, or other work in order to assure compliance with Subsection (2)(s), except in those
6074 areas or regions of the state where the annual average precipitation is 26 inches or less, then the
6075 operator's assumption of responsibility and liability will extend for a period of ten full years
6076 after the last year of augmented seeding, fertilizing, irrigation, or other work; but when the
6077 division approves a long-term intensive agricultural postmining land use, the applicable five or
6078 ten-year period of responsibility for revegetation shall commence at the date of initial planting
6079 for this long-term intensive, agricultural postmining land use, except when the division issues a
6080 written finding approving a long-term, intensive, agricultural postmining land use, as part of
6081 the mining and reclamation plan, the division may grant exception to the provisions of
6082 Subsection (2)(s); and
6083 (ii) on lands eligible for remining, assume the responsibility for successful revegetation
6084 for a period of two full years after the last year of augmented seeding, fertilizing, irrigation, or
6085 other work in order to assure compliance with the applicable standards, except in areas of the
6086 state where the average annual precipitation is 26 inches or less, assume the responsibility for
6087 successful revegetation for a period of five full years after the last year of augmented seeding,
6088 fertilizing, irrigation, or other work in order to assure compliance with the applicable standards.
6089 (u) Protect offsite areas from slides or damage occurring during the surface coal mining
6090 and reclamation operations and not deposit spoil material or locate any part of the operations or
6091 waste accumulations outside the permit area.
6092 (v) Place all excess spoil material resulting from coal surface mining and reclamation
6093 activities in a manner that:
6094 (i) spoil is transported and placed in a controlled manner in position for concurrent
6095 compaction and in a way to assure mass stability and to prevent mass movement;
6096 (ii) the areas of disposal are within the bonded permit areas and all organic matter shall
6097 be removed immediately prior to spoil placement;
6098 (iii) appropriate surface and internal drainage systems and diversion ditches are used so
6099 as to prevent spoil erosion and movement;
6100 (iv) the disposal area does not contain springs, natural water courses, or wet weather
6101 seeps unless lateral drains are constructed from the wet areas to the main underdrains in a
6102 manner that filtration of the water into the spoil pile will be prevented;
6103 (v) if placed on a slope, the spoil is placed upon the most moderate slope among those

6104 upon which, in the judgment of the division, the spoil could be placed in compliance with all
6105 the requirements of this chapter and shall be placed, where possible, upon or above a natural
6106 terrace, bench, or berm, if this placement provides additional stability and prevents mass
6107 movement;
6108 (vi) where the toe of the spoil rests on a downslope, a rock toe buttress of sufficient
6109 size to prevent mass movement, is constructed;
6110 (vii) the final configuration is compatible with the natural drainage pattern and
6111 surroundings and suitable for intended uses;
6112 (viii) design of the spoil disposal area is certified by a qualified professional engineer,
6113 and to implement this requirement, the division shall promulgate rules regarding the
6114 certification of engineers in the area of spoil disposal design; and
6115 (ix) all other provisions of this chapter are met.
6116 (w) Meet such other criteria as are necessary to achieve reclamation in accordance with
6117 the purposes of this chapter, taking into consideration the physical, climatological, and other
6118 characteristics of the site.
6119 (x) To the extent possible, using the best technology currently available, minimize
6120 disturbances and adverse impacts of the operation on fish, wildlife, and related environmental
6121 values, and achieve enhancement of these resources where practicable.
6122 (y) Provide for an undisturbed natural barrier beginning at the elevation of the lowest
6123 coal seam to be mined and extending from the outslope for the distance as the division shall
6124 determine shall be retained in place as a barrier to slides and erosion.
6125 (3) (a) Where an applicant meets the requirements of Subsections (3)(b) and (c), a
6126 permit without regard to the requirement to restore to approximate original contour provided in
6127 Subsections (2)(c), (4)(b), and (4)(c) may be granted for the surface mining of coal where the
6128 mining operation will remove an entire coal seam or seams running through the upper fraction
6129 of a mountain, ridge, or hill (except as provided in this Subsection (3)) by removing all of the
6130 overburden and creating a level plateau or a gently rolling contour with no highwalls
6131 remaining, and capable of supporting postmining uses in accord with the requirements of this
6132 Subsection (3).
6133 (b) In cases where an industrial, commercial, agricultural, residential, or public facility
6134 (including recreational facilities) use is proposed for the postmining use of the affected land,

6135 the division may grant a permit for a surface mining operation of the nature described in
6136 Subsection (3)(a) pursuant to procedures and criteria set forth in the rules, including:
6137 (i) the applicant's presentation of specific plans for the proposed postmining land use
6138 which meet criteria concerning the type of use proposed;
6139 (ii) the applicant's demonstration that the proposed use would be consistent with
6140 adjacent land uses and existing state and local land use plans and programs and with other
6141 requirements of this chapter; and
6142 (iii) procedures whereby the division provides the governing body of the unit of
6143 general-purpose government in which the land is located and any state or federal agency which
6144 the division, in its discretion, determines to have an interest in the proposed use, an opportunity
6145 of not more than 60 days to review and comment on the proposed use.
6146 (c) All permits granted under the provisions of this Subsection (3) shall be reviewed
6147 not more than three years from the date of issuance of the permit, unless the applicant
6148 affirmatively demonstrates that the proposed development is proceeding in accordance with the
6149 terms of the approved schedule and reclamation plan.
6150 (4) The following performance standards shall be applicable to steep-slope surface coal
6151 mining and shall be in addition to those general performance standards required by this section;
6152 but the provisions of this Subsection (4) shall not apply to those situations in which an operator
6153 is mining on flat or gently rolling terrain, on which an occasional steep slope is encountered
6154 through which the mining operation is to proceed, leaving a plain or predominantly flat area or
6155 where an operator is in compliance with provisions of Subsection (3):
6156 (a) Insure that when performing surface coal mining on steep slopes, no debris,
6157 abandoned or disabled equipment, spoil material, or waste mineral matter be placed on the
6158 downslope below the bench or mining cut; but spoil material in excess of that required for the
6159 reconstruction of the approximate original contour under the provisions of Subsection (2)(c) or
6160 this Subsection (4) shall be permanently stored pursuant to Subsection 40-10-17(2)(v).
6161 (b) Complete backfilling with spoil material shall be required to cover completely the
6162 highwall and return the site to the appropriate original contour, which material will maintain
6163 stability following mining and reclamation.
6164 (c) The operator may not disturb land above the top of the highwall unless the division
6165 finds that the disturbance will facilitate compliance with the environmental protection

6166 standards of this section; but the land disturbed above the highwall shall be limited to that
6167 amount necessary to facilitate this compliance.
6168 (d) For the purposes of this Subsection (4), "steep slope" means any slope above 20
6169 degrees or such lesser slope as may be defined by the division after consideration of soil,
6170 climate, and other characteristics of an area.
6171 (5) The board shall promulgate specific rules to govern the granting of variances from
6172 the requirement to restore to approximate original contour provided in Subsection (4)(b)
6173 pursuant to procedures and criteria set forth in those rules including:
6174 (a) written request by the surface owner concerning the proposed use;
6175 (b) approval of the proposed use as an equal or better economic or public use; and
6176 (c) approval of the proposed use as improving the watershed control in the area and as
6177 using only such amount of spoil as is necessary to achieve the planned postmining land use.
6178 (6) Subsection (2)(t)(ii) is repealed September 30, 2009.
6179 Section 140. Section **40-10-27** is amended to read:
6180 **40-10-27. Entry upon land adversely affected by past coal mining practices --**
6181 **Conducting of studies or exploratory work -- State acquisition of land -- Lien -- Waste**
6182 **disposal fund -- Water pollution control and treatment plants.**
6183 (1) (a) If the board, after notice and hearing, makes a finding of fact as provided in
6184 Subsection (1)(b), the agents, employees, or contractors of the division shall have the right to
6185 enter property adversely affected by past coal mining practices and any other property to have
6186 access to property adversely affected by past coal mining practices to do whatever is necessary
6187 or expedient to restore, reclaim, abate, control, or prevent the adverse effects.
6188 (b) The board shall find that:
6189 (i) land or water resources have been adversely affected by past coal mining practices;
6190 (ii) the adverse effects are at a stage where, in the public interest, action to restore,
6191 reclaim, abate, control, or prevent should be taken; and
6192 (iii) the owners of the land or water resources where entry must be made to restore,
6193 reclaim, abate, control, or prevent the adverse effects of past coal mining practices:
6194 (A) are not known;
6195 (B) are not readily available; or
6196 (C) will not give permission for the state or its political subdivisions, their agents,

6197 employees, or contractors to enter upon the property to restore, reclaim, abate, control, or
6198 prevent the adverse effects of past coal mining practices.
6199 (c) Notice of the division's right to enter the property shall be:
6200 (i) given by mail, if the owners are known; and
6201 (ii) posted upon the premises and advertised [~~once in a newspaper of general~~
6202 ~~circulation in the county in which the land lies~~] on the Utah Public Notice Website as described
6203 in Section 63F-1-701, if the owners are not known.
6204 (d) This entry shall be construed as an exercise of the police power for the protection of
6205 public health, safety, and general welfare and may not be construed as an act of condemnation
6206 of property nor of trespass on it.
6207 (e) The monies expended for this work and the benefits accruing to the premises
6208 entered upon shall be chargeable against the land and shall mitigate or offset any claim in or
6209 any action brought by any owner of any interest in these premises for any alleged damages by
6210 virtue of the entry.
6211 (f) This Subsection (1) is not intended to create new rights of action or eliminate
6212 existing immunities.
6213 (2) (a) The agents, employees, or contractors of the division may enter upon any
6214 property for the purpose of conducting studies or exploratory work to determine the existence
6215 of adverse effects of past coal mining practices and to determine the feasibility of restoration,
6216 reclamation, abatement, control, or prevention of these adverse effects.
6217 (b) This entry shall be construed as an exercise of the police power for the protection of
6218 public health, safety, and general welfare and may not be construed as an act of condemnation
6219 of property or trespass on it.
6220 (3) The state may acquire any land by purchase, donation, or condemnation which is
6221 adversely affected by past coal mining practices if the board, after notice and hearing,
6222 determines that acquisition of this land is necessary to successful reclamation and that:
6223 (a) the acquired land, after restoration, reclamation, abatement, control, or prevention
6224 of the adverse effects of past coal mining practices, will serve recreation and historic purposes,
6225 conservation and reclamation purposes, or provide open space benefits; and
6226 (b) (i) permanent facilities such as a treatment plant or a relocated stream channel will
6227 be constructed on the land for the restoration, reclamation, abatement, control, or prevention of

6228 the adverse effects of past coal mining practices; or
6229 (ii) acquisitions of coal refuse disposal sites and all coal refuse on the sites will serve
6230 the purposes of this chapter or that public ownership is desirable to meet emergency situations
6231 and prevent recurrences of the adverse effects of past coal mining practices.
6232 (4) (a) Title to all lands acquired under this section shall be in the name of the state.
6233 (b) The price paid for land acquired under this section shall reflect the market value of
6234 the land as adversely affected by past coal mining practices.
6235 (5) (a) If land acquired under this section is considered suitable for industrial,
6236 commercial, residential, or recreational development, the division, in conjunction with the
6237 Division of Forestry, Fire and State Lands, may sell this land by public sale under a system of
6238 competitive bidding, at not less than fair market value, and under any other rules promulgated
6239 to insure that the land is put to proper use consistent with local and state land use plans.
6240 (b) (i) The state, when requested after appropriate public notice, shall hold a public
6241 hearing with the appropriate notice, in the counties or appropriate political subdivisions of the
6242 state in which lands acquired under this section are located.
6243 (ii) The hearing shall be held at a time which shall afford local citizens and
6244 governments the maximum opportunity to participate in the decision concerning the use or
6245 disposition of the lands after restoration, reclamation, abatement, control, or prevention of the
6246 adverse effects of past coal mining practices.
6247 (6) (a) The state, through the division and the Division of Forestry, Fire and State
6248 Lands, shall have the authority to accept lands acquired and reclaimed by the Secretary of the
6249 Interior pursuant to Section 407(h) of Public Law 95-87.
6250 (b) The division has the authority to accept grants from the Secretary to carry out the
6251 purposes of Section 407(h) of Public Law 95-87.
6252 (7) (a) Within six months after the completion of projects to restore, reclaim, abate,
6253 control, or prevent adverse effects of past coal mining practices on privately owned land, the
6254 division shall itemize the monies expended and may file a statement of those expenses in the
6255 office of the county recorder of the county in which the land lies, together with a notarized
6256 appraisal by an independent appraiser of the value of the land before the restoration,
6257 reclamation, abatement, control, or prevention of adverse effects of past coal mining practices
6258 if the monies expended result in a significant increase in property value.

6259 (b) This statement shall constitute a lien upon the land described in it.
6260 (c) The lien may not exceed the amount determined by the appraisal to be the increase
6261 in the market value of the land as a result of the restoration, reclamation, abatement, control, or
6262 prevention of the adverse effects of past coal mining practices.
6263 (d) A lien may not be filed against the property of any person, in accordance with this
6264 subsection who owned the surface prior to May 2, 1977, and who neither consented to nor
6265 participated in nor exercised control over the mining operation which necessitated the
6266 reclamation performed.
6267 (8) (a) The landowner may proceed to petition within 60 days after the filing of the lien
6268 to determine the increase in the market value of the land as a result of the restoration,
6269 reclamation, abatement, control, or prevention of the adverse effects of past coal mining
6270 practices.
6271 (b) The amount reported to be the increase in value of the premises shall constitute the
6272 amount of the lien and shall be recorded with the statement provided for in Subsection (7).
6273 (c) Any party aggrieved by the decision may appeal as provided by law.
6274 (9) (a) The lien provided in this section shall be recorded in the office of the county
6275 recorder of the county in which the land lies.
6276 (b) The statement shall constitute a lien upon the land as of the date of the expenditure
6277 of the monies and shall have priority as a lien second only to the lien of real estate taxes
6278 imposed upon the land.
6279 (10) (a) The division may fill any voids, seal any abandoned tunnels, shafts, and
6280 entryways, and reclaim surface impacts of underground or surface mines which the division
6281 determines could endanger life and property, constitute a hazard to the public health and safety,
6282 or degrade the environment.
6283 (b) The division may make expenditures and carry out the purposes of this section
6284 without regard to the provisions of Subsections 40-10-25(2) and (3) only after all reclamation
6285 with respect to abandoned coal lands or coal development impacts have been met, except for
6286 those reclamation projects relating to the protection of the public health or safety.
6287 (c) In those instances where mine waste piles are being reworked for conservation
6288 purposes, the incremental costs of disposing of the wastes from these operations by filling
6289 voids and sealing tunnels may be eligible for funding if the disposal of these wastes meets the

6290 purposes of this section.
6291 (d) The division may acquire by purchase, donation, easement, or otherwise those
6292 interests in land it determines necessary to carry out the provisions of this section.
6293 (11) (a) The division may request the attorney general, who is hereby authorized to
6294 initiate, in addition to any other remedies provided for in this chapter, in any court of
6295 competent jurisdiction, an action in equity for an injunction to restrain any interference with the
6296 exercise of the right to enter or to conduct any work provided in this section.
6297 (b) (i) The division, in conjunction with appropriate state agencies as determined in the
6298 rules, may construct and operate plants for the control and treatment of water pollution
6299 resulting from mine drainage.
6300 (ii) The extent of this control and treatment of water pollution may be dependent upon
6301 the ultimate use of the water.
6302 (iii) This Subsection (11) may not be construed to repeal or supersede any portion of
6303 the federal Water Pollution Control Act, 33 U.S.C. Sec. 1151 et seq., and no control or
6304 treatment under this subsection shall in any way be less than that required under the federal
6305 Water Pollution Control Act.
6306 (iv) The construction of a plant may include major interceptors and other facilities
6307 appurtenant to the plant.
6308 (c) The division may transfer funds to other appropriate state agencies, in order to carry
6309 out the reclamation activities authorized by this chapter.
6310 Section 141. Section **41-1a-1103** is amended to read:
6311 **41-1a-1103. Sale.**
6312 (1) If the owner or lienholder of a seized vehicle, vessel, or outboard motor does not
6313 recover the vehicle, vessel, or outboard motor within 30 days from the date of seizure, or if the
6314 division is unable to determine the owner or lienholder through reasonable efforts, the division
6315 shall sell the vehicle, vessel, or outboard motor.
6316 (2) The sale shall:
6317 (a) be held in the form of a public auction at the place of storage; and
6318 (b) at the discretion of the division, be conducted by:
6319 (i) an authorized representative of the division; or
6320 (ii) a public garage, impound lot, or impound yard that:

6321 (A) is authorized by the division;
6322 (B) meets the standards under Subsection 41-1a-1101(4); and
6323 (C) complies with the requirements of Section 72-9-603.
6324 (3) At least five days prior to the date set for sale, the division shall publish a notice of
6325 sale [~~in a newspaper of general statewide circulation~~] on the Utah Public Notice Website as
6326 described in Section 63F-1-701 setting forth the date, time, and place of sale and a description
6327 of the vehicle, vessel, or outboard motor to be sold.
6328 (4) At the time of sale the division or other person authorized to conduct the sale shall
6329 tender to the highest bidder a certificate of sale conveying all rights, title, and interest in the
6330 vehicle, vessel, or outboard motor.
6331 (5) The proceeds from the sale of a vehicle, vessel, or outboard motor under this
6332 section shall be distributed as provided under Section 41-1a-1104.
6333 (6) If the owner or lienholder of a vehicle, vessel, or outboard motor seized under
6334 Section 41-1a-1101 and subsequently released by the division fails to take possession of the
6335 vehicle, vessel, or outboard motor and satisfy the amount due to the place of storage within 30
6336 days from the date of release, the division shall renotify the owner or lienholder and sell the
6337 vehicle, vessel, or outboard motor, in accordance with this section, 30 days from the date of
6338 the notice.
6339 Section 142. Section **47-2-4** is amended to read:
6340 **47-2-4. Elimination by the county executive -- Notice of intention.**
6341 The county executive may provide for the elimination of abandoned horses in the
6342 respective counties in the following manner:
6343 They shall cause notice to be published at least once a week for three successive weeks
6344 [~~in some newspaper of general circulation published in the county~~] on the Utah Public Notice
6345 Website as described in Section 63F-1-701, and the notice shall also be posted in at least five
6346 public places outside of the county seat on public highways in such county, and in three public
6347 places at the county seat, one of which shall be at the front door of the courthouse. The notices
6348 posted outside of the county seat shall be posted not less than two miles apart, and all posted
6349 notices shall be posted at least 30 days before the date which the county executive shall fix for
6350 the beginning of the elimination of abandoned horses from the range in such county as
6351 hereinafter provided. [~~If no newspaper is published in the county, publication in a newspaper~~

6352 ~~shall not be required.~~]
6353 The notice shall be substantially in the following form:
6354 Notice is hereby given that in accordance with the provisions of law the county
6355 executive of ____ County, Utah, will proceed to eliminate abandoned horses from the open
6356 range in said county, and that beginning on _____(month\day\year), a drive will be held,
6357 and all abandoned horses running upon the open range will, under the direction and supervision
6358 of the county executive, be eliminated. All owners of horses running upon the open range are
6359 hereby given notice to file with the county executive a description of the horses, and the brands
6360 or marks thereon.

6378 publication of the notice, by which the dissolved company must receive the claim; and
6379 (d) state that, unless sooner barred by another statute limiting actions, the claim will be
6380 barred if not received by the deadline.
6381 (3) If the dissolved company publishes a [~~newspaper~~] notice on the Utah Public Notice
6382 Website as described in Section 63F-1-701 in accordance with Subsection (2), then unless

6383 sooner barred under Section 48-2c-1305 or under another statute limiting actions, the claim of
6384 any claimant against the dissolved company is barred if:
6385 (a) the claim is not received by the dissolved company by the deadline; or
6386 (b) the dissolved company delivers to the claimant written notice of rejection of the

6825 In addition, a copy of such notice shall be addressed to "Owner" and shall be so mailed
6826 addressed to the street number of each piece of improved property to be affected by the
6827 assessment. Mailed notices and the published notice shall state where a copy of the resolution

6847 improvement. The notice shall further state where a copy of the resolution proposed to be

6848 adopted levying the assessments against all real property in the district will be on file for public
6849 inspection, and that subject to such changes and corrections therein as may be made by the

6862 aggrieved by any such special assessment or proceeding may bring a civil action to cause such
6863 grievance to be adjudicated if such action is commenced prior to the expiration of the period
6864 specified in this section. The burden of proof to show that such special assessment or part
6865 thereof is invalid, inequitable or unjust shall rest upon the party who brings such suit. Any such
6866 litigation shall not be regarded as an appeal within the meaning of the prohibition contained in

6868 fails to appear during the public hearings on said assessments to raise his objection to such tax
6869 shall be deemed to have waived all objections to such levy except the objection that the
6870 governing body lacks jurisdiction to levy such tax.
6871 For a period of twenty days after the governing body has adopted the enactment
6872 authorizing the assessment, any taxpayer in the district shall have the right to institute litigation
6873 for the purpose of questioning or attacking the proceedings pursuant to which the assessments

6881 twenty-day period, all proceedings theretofore had by the governing body, the bonds to be
6882 issued pursuant thereto, and the special assessments from which such bonds are to be paid,
6883 shall become incontestable, and no suit attacking or questioning the legality thereof may be
6884 instituted in this state, and no court shall have the authority to inquire into such matters.

8625 unused portion of that water right is subject to forfeiture in accordance with Subsection (2)(c),
8626 unless the appropriator or the appropriator's successor in interest files a nonuse application
8627 with the state engineer.
8628 (b) (i) A nonuse application may be filed on all or a portion of the water right,
8629 including water rights held by a water company.

8637 limitation period shall commence to run back in time from the date the state engineer's
8638 proposed determination of rights is served upon each claimant.
8639 (iii) A decree entered in an action for general determination of rights under Chapter 4,
8640 Determination of Water Rights, shall bar any claim of forfeiture for prior nonuse against any
8641 right determined to be valid in the decree, but does not bar a claim for periods of nonuse that
8642 occur after the entry of the decree.
8643 (iv) A proposed determination by the state engineer in an action for general
8644 determination of rights under Chapter 4, Determination of Water Rights, bars a claim of
8645 forfeiture for prior nonuse against any right proposed to be valid, unless a timely objection has

8646 been filed within the time allowed in Chapter 4, Determination of Water Rights.
8647 (v) If in a judicial action a court declares a water right forfeited, on the date on which
8648 the water right is forfeited:
8649 (A) the right to use the water reverts to the public; and
8650 (B) the water made available by the forfeiture:
8651 (I) first, satisfies other water rights in the hydrologic system in order of priority date;
8652 and
8653 (II) second, may be appropriated as provided in this title.

8664 sufficient water to satisfy the water right;
8665 (iv) a water right when water is unavailable because of the water right's priority date;
8666 (v) a water right to store water in a surface reservoir or an aquifer, in accordance with
8667 Title 73, Chapter 3b, Groundwater Recharge and Recovery Act, if:
8668 (A) the water is stored for present or future use; or
8669 (B) storage is limited by a safety, regulatory, or engineering restraint that the
8670 appropriator or the appropriator's successor in interest cannot reasonably correct;
8671 (vi) a water right if a water user has beneficially used substantially all of the water right
8672 within a seven-year period, provided that this exemption does not apply to the adjudication of a
8673 water right in a general determination of water rights under Chapter 4, Determination of Water
8674 Rights;
8675 (vii) except as provided by Subsection (2)(g), a water right:
8676 (A) (I) owned by a public water supplier;

8680 is determined according to Subsection (2)(f);
8681 (viii) a supplemental water right during a period of time when another water right
8682 available to the appropriator or the appropriator's successor in interest provides sufficient water
8683 so as to not require use of the supplemental water right; or
8684 (ix) a water right subject to an approved change application where the applicant is
8685 diligently pursuing certification.
8686 (f) (i) The reasonable future water requirement of the public is the amount of water
8687 needed in the next 40 years by the persons within the public water supplier's projected service
8688 area based on projected population growth or other water use demand.
8689 (ii) For purposes of Subsection (2)(f)(i), a community water system's projected service
8690 area:
8691 (A) is the area served by the community water system's distribution facilities; and
8692 (B) expands as the community water system expands the distribution facilities in
8693 accordance with Title 19, Chapter 4, Safe Drinking Water Act.
8694 (g) For a water right acquired by a public water supplier on or after May 5, 2008,
8695 Subsection (2)(e)(vii) applies if:
8696 (i) the public water supplier submits a change application under Section 73-3-3; and
8697 (ii) the state engineer approves the change application.
8698 (3) (a) The state engineer shall furnish a nonuse application form requiring the
8699 following information:
8700 (i) the name and address of the applicant;

8702 diversion, place of use, and priority;
8703 (iii) the quantity of water;
8704 (iv) the period of use;
8705 (v) the extension of time applied for;
8706 (vi) a statement of the reason for the nonuse of the water; and
8707 (vii) any other information that the state engineer requires.

8708 (b) (i) Filing the nonuse application extends the time during which nonuse may
8709 continue until the state engineer issues an order on the nonuse application.
8710 (ii) Approval of a nonuse application protects a water right from forfeiture for nonuse
8711 from the application's filing date until the approved application's expiration date.
8712 (c) (i) Upon receipt of the application, the state engineer shall publish a notice of the
8713 application once a week for two successive weeks [~~in a newspaper of general circulation in the~~
8714 ~~county in which the source of the water supply is located and where the water is to be used~~] on
8715 the Utah Public Notice Website as described in Section 63F-1-701.
8716 (ii) The notice shall:
8717 (A) state that an application has been made; and
8718 (B) specify where the interested party may obtain additional information relating to the
8719 application.
8720 (d) Any interested person may file a written protest with the state engineer against the
8721 granting of the application:
8722 (i) within 20 days after the notice is published, if the adjudicative proceeding is
8723 informal; and
8724 (ii) within 30 days after the notice is published, if the adjudicative proceeding is
8725 formal.
8726 (e) In any proceedings to determine whether the nonuse application should be approved
8727 or rejected, the state engineer shall follow the procedures and requirements of Title 63G,
8728 Chapter 4, Administrative Procedures Act.
8729 (f) After further investigation, the state engineer may approve or reject the application.
8730 (4) (a) The state engineer shall grant a nonuse application on all or a portion of a water
8731 right for a period of time not exceeding seven years if the applicant shows a reasonable cause
8732 for nonuse.
8733 (b) A reasonable cause for nonuse includes:
8734 (i) a demonstrable financial hardship or economic depression;
8735 (ii) the initiation of water conservation or efficiency practices, or the operation of a
8736 groundwater recharge recovery program approved by the state engineer;
8737 (iii) operation of legal proceedings;
8738 (iv) the holding of a water right or stock in a mutual water company without use by any

8739 water supply entity to meet the reasonable future requirements of the public;
8740 (v) situations where, in the opinion of the state engineer, the nonuse would assist in
8741 implementing an existing, approved water management plan; or
8742 (vi) the loss of capacity caused by deterioration of the water supply or delivery
8743 equipment if the applicant submits, with the application, a specific plan to resume full use of
8744 the water right by replacing, restoring, or improving the equipment.
8745 (5) (a) Sixty days before the expiration of a nonuse application, the state engineer shall
8746 notify the applicant by mail or by any form of electronic communication through which receipt
8747 is verifiable, of the date when the nonuse application will expire.
8748 (b) An applicant may file a subsequent nonuse application in accordance with this
8749 section.
8750 Section 206. Section **73-1-16** is amended to read:
8751 **73-1-16. Petition for hearing to determine validity -- Notice -- Service -- Pleading**
8752 **-- Costs -- Review.**
8753 Where any water users' association, irrigation company, canal company, ditch company,
8754 reservoir company, or other corporation of like character or purpose, organized under the laws
8755 of this state has entered into or proposes to enter into a contract with the United States for the
8756 payment by such association or company of the construction and other charges of a federal
8757 reclamation project constructed, under construction, or to be constructed within this state, and
8758 where funds for the payment of such charges are to be obtained from assessments levied upon
8759 the stock of such association or company, or where a lien is created or will be created against
8760 any of the land, property, canals, water rights or other assets of such association or company or
8761 against the land, property, canals, water rights or other assets of any stockholder of such
8762 association or company to secure the payment of construction or other charges of a reclamation
8763 project, the water users' association, irrigation company, canal company, ditch company,
8764 reservoir company or other corporation of like character or purpose may file in the district court
8765 of the county wherein is situated the office of such association or company a petition entitled
8766 "..... Water Users' Association" or "..... Company," as the case may be, "against the
8767 stockholders of said association or company and the owners and mortgagees of land within the
8768 ..... Federal Reclamation Project." No other or more specific description of the defendants
8769 shall be required. In the petition it may be stated that the water users' association, irrigation

8770 company, canal company, ditch company, reservoir company or other corporation of like
8771 character and purpose has entered into or proposes to enter into a contract with the United
8772 States, to be set out in full in said petition, with a prayer that the court find said contract to be
8773 valid, and a modification of any individual contracts between the United States and the
8774 stockholders of such association or company, or between the association or company, and its
8775 stockholders, so far as such individual contracts are at variance with the contract or proposed
8776 contract between the association or company and the United States.
8777 Thereupon a notice in the nature of a summons shall issue under the hand and seal of
8778 the clerk of said court, stating in brief outline the contents of said petition, and showing where
8779 a full copy of said contract or proposed contract may be examined, such notice to be directed to
8780 the said defendants under the same general designations, which shall be deemed sufficient to
8781 give the court jurisdiction of all matters involved and parties interested. Service shall be
8782 obtained (a) by publication of such notice once a week for three consecutive weeks (three
8783 times) [~~in a newspaper published in each county where the irrigable land of such federal~~
8784 ~~reclamation project is situated~~] on the Utah Public Notice Website as described in Section
8785 63F-1-701, and (b) by the posting at least three weeks prior to the date of the hearing on said
8786 petition of the notice and a complete copy of the said contract or proposed contract in the office
8787 of the plaintiff association or company, and at three other public places within the boundaries
8788 of such federal reclamation project. Any stockholder in the plaintiff association or company, or
8789 owner, or mortgagee of land within said federal reclamation project affected by the contract
8790 proposed to be made by such association or company, may demur to or answer said petition
8791 before the date set for such hearing or within such further time as may be allowed therefor by
8792 the court. The failure of any persons affected by the said contract to answer or demur shall be
8793 construed, so far as such persons are concerned as an acknowledgment of the validity of said
8794 contract and as a consent to the modification of said individual contracts if any with such
8795 association or company or with the United States, to the extent that such modification is
8796 required to cause the said individual contracts if any to conform to the terms of the contract or
8797 proposed contract between the plaintiff and the United States. All persons filing demurrers or
8798 answers shall be entered as defendants in said cause and their defense consolidated for hearing
8799 or trial. Upon hearing the court shall examine all matters and things in controversy and shall
8800 enter judgment and decree as the case warrants, showing how and to what extent, if any, the

8801 said individual contracts of the defendants or under which they claim are modified by the
8802 plaintiff's contract or proposed contract with the United States. In reaching his conclusion in
8803 such causes, the court shall follow a liberal interpretation of the laws, and shall disregard
8804 informalities or omissions not affecting the substantial rights of the parties, unless it is
8805 affirmatively shown that such informalities or omissions led to a different result than would
8806 have been obtained otherwise. The Code of Civil Procedure shall govern matters of pleading
8807 and practice as nearly as may be. Costs may be assessed or apportioned among contesting
8808 parties in the discretion of the trial court. Review of the judgment of the district court by the
8809 Supreme Court may be had as in other civil causes.

8815 ~~newspaper of general circulation in the county in which the source of supply is located, and~~
8816 ~~where the water is to be used~~] on the Utah Public Notice Website as described in Section
8817 63F-1-701.
8818 (b) The notice shall:
8819 (i) state that an application has been made; and
8820 (ii) specify where the interested party may obtain additional information relating to the
8821 application.
8822 (c) Clerical errors, ambiguities, and mistakes that do not prejudice the rights of others
8823 may be corrected by order of the state engineer either before or after the publication of notice.
8824 (2) After publication of notice to water users, the state engineer may authorize
8825 amendments or corrections that involve a change of point of diversion, place, or purpose of use
8826 of water, only after republication of notice to water users.
8827 Section 208. Section **73-3-12** is amended to read:
8828 **73-3-12. Time limit on construction and application to beneficial use --**
8829 **Extensions -- Procedures and criteria.**
8830 (1) As used in this section:
8831 (a) "Public agency" means:

8832 (i) a public water supply agency of the state or a political subdivision of the state; or
8833 (ii) the Bureau of Reclamation.
8834 (b) "Wholesale electrical cooperative" is as defined in Section 54-2-1.
8835 (2) (a) An applicant shall construct works, if necessary, and apply the water to

8837 (b) Except as provided by Subsection (2)(c), the state engineer may grant an extension
8838 of time, not exceeding 50 years from the application's approval date, if the applicant shows
8839 diligence or a reasonable cause for delay.
8840 (c) The state engineer may grant an extension of time, beyond 50 years, on an
8841 application held by a public agency or a wholesale electrical cooperative if the public agency or
8842 wholesale electrical cooperative shows that the water will be needed to meet the reasonable
8843 future water or electricity requirements of the public.
8844 (d) An applicant shall file a request for an extension of time with the office of the state
8845 engineer on or before the date fixed for filing proof of appropriation.
8846 (e) The state engineer may grant an extension of time:

8848 (ii) beyond 14 years after application and publication of notice.
8849 (f) (i) The state engineer shall publish a notice of the application once a week for two
8850 successive weeks, [~~in a newspaper of general circulation, in the county in which the water~~

8852 as described in Section 63F-1-701.
8853 (ii) The notice shall:
8854 (A) state that an application has been made; and
8855 (B) specify where the interested party may obtain additional information relating to the
8856 application.
8857 (g) Any person who owns a water right or holds an application from the source of
8858 supply referred to in Subsection (2)(f) may file a protest with the state engineer:
8859 (i) within 20 days after the notice is published, if the adjudicative proceeding is
8860 informal; and
8861 (ii) within 30 days after the notice is published, if the adjudicative proceeding is
8862 formal.

8863 (h) In considering an application to extend the time in which to place water to
8864 beneficial use under an approved application, the state engineer shall deny the extension of
8865 time and declare the application lapsed, unless the applicant affirmatively shows that the
8866 applicant has exercised or is exercising reasonable and due diligence in working toward
8867 completion of the appropriation.
8868 (i) (i) The state engineer shall approve the extension of time if the applicant shows
8869 reasonable and due diligence.
8870 (ii) The approved extension of time is effective so long as the applicant continues to
8871 exercise reasonable diligence in completing the appropriation.
8872 (j) (i) The state engineer shall consider the holding of an approved application by a
8873 public agency or a wholesale electrical cooperative to meet the reasonable future water or

8875 this section for the first 50 years.
8876 (ii) The state engineer may approve an extension of time beyond 50 years for a public
8877 agency or a wholesale electrical cooperative, if the public agency or wholesale electrical
8878 cooperative provides information that shows the water will be needed to meet the reasonable
8879 future water or electricity requirements of the public.
8880 (k) If the state engineer finds unjustified delay or lack of diligence in prosecuting the
8881 works to completion, the state engineer may:
8882 (i) deny the extension of time; or
8883 (ii) grant the request in part or upon conditions, including a reduction of the priority of
8884 all or part of the application.
8885 (3) (a) Except as provided by Subsections (3)(b) and (c), an application upon which
8886 proof has not been submitted shall lapse and have no further force or effect after the expiration
8887 of 50 years from the date of its approval.
8888 (b) If the works are constructed with which to make beneficial use of the water applied
8889 for, the state engineer may, upon showing of that fact, grant additional time beyond the 50-year
8890 period in which to make proof.
8891 (c) An application held by a public agency or a wholesale electrical cooperative to meet
8892 the reasonable future water or electricity requirements of the public, for which proof of
8893 appropriation has not been submitted, shall lapse, unless extended as provided in Subsection

8894 (2)(j).

8918 by any person claiming the right to use the waters of any river system, lake, underground water
8919 basin, or other natural source of supply that involves a determination of the rights to the major
8920 part of the water of the source of supply or the rights of ten or more of the claimants of the
8921 source of supply, the clerk of the district court shall notify the state engineer that a suit has
8922 been filed.
8923 (2) (a) The state engineer then shall give notice to the claimants by publishing notice
8924 once a week for two consecutive weeks [~~in a newspaper designated by the court as most likely~~

8938 (e) The court upon petition may by order permit the addition of names and addresses to
8939 this list at any time during the pendency of the action, and the clerk of the court may, without
8940 court order, upon notice from the claimant note any change of address.
8941 (f) If any claimant appears in this action by an attorney, the clerk shall note on the list
8942 the address of the attorney.
8943 (g) After the list is filed by the state engineer, notice of further proceedings, after
8944 service of summons, may be given without court order by mailing a copy thereof to the persons
8945 listed at the addresses listed and by mailing a copy thereof to any attorney of record for any
8946 such person, and notice may be given to such listed persons and to all other claimants by
8947 publication in the manner and for the time prescribed by order of the district court on the Utah
8948 Public Notice Website as described in Section 63F-1-701.
8949 (3) After the statement or list is filed, the state engineer shall begin the survey of the

8956 (iii) within 90 days after service of the notice, each claimant must file a written
8957 statement with the clerk of the court setting forth the claimant's respective claim to the use of
8958 the water.
8959 (b) Notice given by mail is complete when the notice is mailed.
8960 (5) When a suit has been filed by the state engineer as provided by Section 73-4-1, or
8961 by any person involving the major part of the waters of any river system, lake, underground
8962 water basin, or other source of supply, or the rights of ten or more of the water claimants of the
8963 source of supply, whether the suit is filed prior to or after the enactment hereof, the state
8964 engineer, upon receiving notice, shall examine the records of the state engineer's office with
8965 respect to the water source involved, and if they are incomplete to make such further
8966 investigation and survey as may be necessary for the preparation of the report and
8967 recommendation as required by Section 73-4-11.
8968 (6) In all such cases the court shall proceed to determine the water rights involved in
8969 the manner provided by this chapter, and not otherwise.
8970 Section 211. Section **73-4-4** is amended to read:
8971 **73-4-4. Summons -- Service -- Publication -- Form -- Delivery of form for**
8972 **claimant's statement.**
8973 (1) (a) Claimants whose names appear on the list prescribed by Section 73-4-3 at the
8974 time the list is filed by the state engineer with the clerk of the court shall be served with a
8975 summons issued out of the district court and served as a summons is served in other civil cases.
8976 (b) Upon the filing by the state engineer of an affidavit that the state engineer has
8977 searched the records of the state engineer's office and has listed all names as required by
8978 Section 73-4-3, and upon proof of publication of notice to all claimants to notify the state
8979 engineer of their names and addresses, summons may be served on all other persons and
8980 claimants not listed on said list by publication of summons, [~~in a newspaper or newspapers~~

8988 SUMMONS
8989 The State of Utah to the said defendant:
8990 You are hereby summoned to appear and defend the above entitled action which is
8991 brought for the purpose of making a general determination of the water rights of the described
8992 water source. Upon the service of this summons upon you, you will thereafter be subject to the
8993 jurisdiction of the entitled court and it shall be your duty to follow further proceedings in the
8994 above entitled action and to protect your rights therein. When the state engineer has completed
8995 the survey you will be given a further written notice, either in person or by mail, sent to your
8996 last-known address, that you must file a water users claim in this action setting forth the nature
8997 of your claim, and said notice will specify the date upon which your water users claim is due
8998 and thereafter you must file said claim within the time set and your failure so to do will
8999 constitute a default in the premises and a judgment may be entered against you declaring and
9000 adjudging that you have no right in or to the waters of described water source."
9001 (2) At the time the said notice of completion of survey is given, the state engineer must
9002 mail or otherwise deliver a form upon which the claimant shall present in writing, as provided
9003 in the next succeeding section, all the particulars relating to the appropriation of the water of
9004 said river system or water source to which the claimant lays claim.
9005 Section 212. Section **73-4-9** is amended to read:
9006 **73-4-9. Failure to file statement -- Relief.**
9007 The filing of each statement by a claimant shall be considered notice to all persons of
9008 the claim of the party making the same, and any person failing to make and deliver such
9009 statement of claim to the clerk of the court within the time prescribed by law shall be forever
9010 barred and estopped from subsequently asserting any rights, and shall be held to have forfeited
9011 all rights to the use of the water theretofore claimed by him; provided, that any claimant, upon
9012 whom no other service of said notice shall have been made than by publication [~~in a~~
9013 ~~newspaper~~] on the Utah Public Notice Website as described in Section 63F-1-701, may apply
9014 to the court for permission to file a statement of claim after the time therefor has expired, and
9015 the court may extend the time for filing such statement, not exceeding six months from the
9016 publication of said notice; but, before said time is extended, the applicant shall give notice by
9017 publication [~~in a newspaper having general circulation~~] on the Utah Public Notice Website as

9018 described in Section 63F-1-701 on such river system or near the water source to all other
9019 persons interested in the water of such river system or water source, and shall make it appear to
9020 the satisfaction of the court that during the pendency of the proceedings he had no actual notice
9021 thereof in time to appear and file a statement and make proof of his claim; and all parties
9022 interested may be heard as to the matter of his actual notice of the pendency of such
9023 proceedings.
9024 Section 213. Section **73-5-14** is amended to read:
9025 **73-5-14. Determination by the state engineer of watershed to which particular**
9026 **source is tributary -- Publications of notice and result -- Hearing -- Judicial review.**
9027 The state engineer shall have the power to determine for administrative and distribution
9028 purposes the watershed to which any particular stream or source of water is tributary. Said
9029 determination may be made only after publication of notice to the water users. Said publication
9030 of notice shall be made [~~in a newspaper or newspapers having general circulation in every~~
9031 ~~county in this state in which any rights might be affected~~] on the Utah Public Notice Website as
9032 described in Section 63F-1-701. The publication is to be made once each week for five
9033 consecutive weeks. It shall fix the date and place of hearing and at said hearing any water user
9034 shall be given an opportunity to appear and adduce evidence material to the determination of
9035 the question involved. The result of said determination by the state engineer shall likewise be
9036 published in the manner set forth above and said notice of the decision of the state engineer
9037 shall also notify the public that any person aggrieved by said decision may appeal from said
9038 decision as provided by Section 73-3-14; and notice shall be deemed to have been given so as
9039 to start the time for appeal upon completion of the publication of notice.
9040 Section 214. Section **73-5-15** is amended to read:
9041 **73-5-15. Groundwater management plan.**
9042 (1) As used in this section:
9043 (a) "Critical management area" means a groundwater basin in which the groundwater
9044 withdrawals consistently exceed the safe yield.
9045 (b) "Safe yield" means the amount of groundwater that can be withdrawn from a
9046 groundwater basin over a period of time without exceeding the long-term recharge of the basin
9047 or unreasonably affecting the basin's physical and chemical integrity.
9048 (2) (a) The state engineer may regulate groundwater withdrawals within a specific

9049 groundwater basin by adopting a groundwater management plan in accordance with this section
9050 for any groundwater basin or aquifer or combination of hydrologically connected groundwater
9051 basins or aquifers.
9052 (b) The objectives of a groundwater management plan are to:
9053 (i) limit groundwater withdrawals to safe yield;
9054 (ii) protect the physical integrity of the aquifer; and
9055 (iii) protect water quality.
9056 (c) The state engineer shall adopt a groundwater management plan for a groundwater
9057 basin if more than 1/3 of the water right owners in the groundwater basin request that the state
9058 engineer adopt a groundwater management plan.
9059 (3) (a) In developing a groundwater management plan, the state engineer may consider:
9060 (i) the hydrology of the groundwater basin;
9061 (ii) the physical characteristics of the groundwater basin;
9062 (iii) the relationship between surface water and groundwater, including whether the
9063 groundwater should be managed in conjunction with hydrologically connected surface waters;
9064 (iv) the geographic spacing and location of groundwater withdrawals;
9065 (v) water quality;
9066 (vi) local well interference; and
9067 (vii) other relevant factors.
9068 (b) The state engineer shall base the provisions of a groundwater management plan on
9069 the principles of prior appropriation.
9070 (c) (i) The state engineer shall use the best available scientific method to determine
9071 safe yield.
9072 (ii) As hydrologic conditions change or additional information becomes available, safe
9073 yield determinations made by the state engineer may be revised by following the procedures
9074 listed in Subsection (5).
9075 (4) (a) (i) Except as provided in Subsection (4)(b), the withdrawal of water from a
9076 groundwater basin shall be limited to the basin's safe yield.
9077 (ii) Before limiting withdrawals in a groundwater basin to safe yield, the state engineer
9078 shall:
9079 (A) determine the groundwater basin's safe yield; and

9080 (B) adopt a groundwater management plan for the groundwater basin.
9081 (iii) If the state engineer determines that groundwater withdrawals in a groundwater
9082 basin exceed the safe yield, the state engineer shall regulate groundwater rights in that
9083 groundwater basin based on the priority date of the water rights under the groundwater
9084 management plan, unless a voluntary arrangement exists under Subsection (4)(c) that requires a
9085 different distribution.
9086 (b) When adopting a groundwater management plan for a critical management area, the
9087 state engineer shall, based on economic and other impacts to an individual water user or a local
9088 community caused by the implementation of safe yield limits on withdrawals, allow gradual
9089 implementation of the groundwater management plan.
9090 (c) (i) In consultation with the state engineer, water users in a groundwater basin may
9091 agree to participate in a voluntary arrangement for managing withdrawals at any time, either
9092 before or after a determination that groundwater withdrawals exceed the groundwater basin's
9093 safe yield.
9094 (ii) A voluntary arrangement under Subsection (4)(c)(i) shall be consistent with other
9095 law.
9096 (iii) The adoption of a voluntary arrangement under this Subsection (4)(c) by less than
9097 all of the water users in a groundwater basin does not affect the rights of water users who do
9098 not agree to the voluntary arrangement.
9099 (5) To adopt a groundwater management plan, the state engineer shall:
9100 (a) give notice as specified in Subsection (7) at least 30 days before the first public
9101 meeting held in accordance with Subsection (5)(b):
9102 (i) that the state engineer proposes to adopt a groundwater management plan;
9103 (ii) describing generally the land area proposed to be included in the groundwater
9104 management plan; and
9105 (iii) stating the location, date, and time of each public meeting to be held in accordance
9106 with Subsection (5)(b);
9107 (b) hold one or more public meetings in the geographic area proposed to be included
9108 within the groundwater management plan to:
9109 (i) address the need for a groundwater management plan;
9110 (ii) present any data, studies, or reports that the state engineer intends to consider in

9111 preparing the groundwater management plan;
9112 (iii) address safe yield and any other subject that may be included in the groundwater
9113 management plan;
9114 (iv) outline the estimated administrative costs, if any, that groundwater users are likely
9115 to incur if the plan is adopted; and
9116 (v) receive any public comments and other information presented at the public
9117 meeting, including comments from any of the entities listed in Subsection (7)(a)(iii);
9118 (c) receive and consider written comments concerning the proposed groundwater
9119 management plan from any person for a period determined by the state engineer of not less
9120 than 60 days after the day on which the notice required by Subsection (5)(a) is given;
9121 (d) (i) at least 60 days prior to final adoption of the groundwater management plan,
9122 publish notice:
9123 (A) that a draft of the groundwater management plan has been proposed; and
9124 (B) specifying where a copy of the draft plan may be reviewed; and
9125 (ii) promptly provide a copy of the draft plan in printed or electronic form to each of
9126 the entities listed in Subsection (7)(a)(iii) that makes written request for a copy; and
9127 (e) provide notice of the adoption of the groundwater management plan.
9128 (6) A groundwater management plan shall become effective on the date notice of
9129 adoption is completed under Subsection (7), or on a later date if specified in the plan.
9130 (7) (a) A notice required by this section shall be:
9131 (i) published once a week for two successive weeks [~~in a newspaper of general~~
9132 ~~circulation in each county that encompasses a portion of the land area proposed to be included~~
9133 ~~within the groundwater management plan~~] on the Utah Public Notice Website as described in
9134 Section 63F-1-701;
9135 (ii) published conspicuously on the state engineer's Internet website; and
9136 (iii) mailed to each of the following that has within its boundaries a portion of the land
9137 area to be included within the proposed groundwater management plan:
9138 (A) county;
9139 (B) incorporated city or town;
9140 (C) improvement district under Title 17B, Chapter 2a, Part 4, Improvement District
9141 Act;

9150 Conservancy District Act; and
9151 (J) conservation district, under Title 17D, Chapter 3, Conservation District Act.
9152 (b) A notice required by this section is effective upon substantial compliance with
9153 Subsections (7)(a)(i) through (iii).
9154 (8) A groundwater management plan may be amended in the same manner as a
9155 groundwater management plan may be adopted under this section.
9156 (9) The existence of a groundwater management plan does not preclude any otherwise
9157 eligible person from filing any application or challenging any decision made by the state
9158 engineer within the affected groundwater basin.
9159 (10) (a) A person aggrieved by a groundwater management plan may challenge any
9160 aspect of the groundwater management plan by filing a complaint within 60 days after the
9161 adoption of the groundwater management plan in the district court for any county in which the
9162 groundwater basin is found.
9163 (b) Notwithstanding Subsection (9), a person may challenge the components of a
9164 groundwater management plan only in the manner provided by Subsection (10)(a).

9179 (B) identify the case number assigned by the district court;
9180 (C) state that a person affected by the groundwater management plan may petition the
9181 district court to intervene in the action challenging the groundwater management plan; and
9182 (D) list the address for the clerk of the district court in which the action is filed.
9183 (iv) (A) Any person affected by the groundwater management plan may petition to
9184 intervene in the action within 60 days after the day on which notice is last published under
9185 Subsections (10)(e)(i) and (ii).
9186 (B) The district court's treatment of a petition to intervene under this Subsection
9187 (10)(e)(iv) is governed by the Utah Rules of Civil Procedure.
9188 (v) A district court in which an action is brought under Subsection (10)(a) shall
9189 consolidate all actions brought under that Subsection and include in the consolidated action any

9192 section is exempt from the requirements in Title 63G, Chapter 3, Utah Administrative
9193 Rulemaking Act.
9194 (12) Recharge and recovery projects permitted under Chapter 3b, Groundwater
9195 Recharge and Recovery Act, are exempted from this section.
9196 (13) Nothing in this section may be interpreted to require the development,
9197 implementation, or consideration of a groundwater management plan as a prerequisite or
9198 condition to the exercise of the state engineer's enforcement powers under other law, including
9199 powers granted under Section 73-2-25.
9200 (14) A groundwater management plan adopted in accordance with this section may not
9201 apply to the dewatering of a mine.
9202 (15) (a) A groundwater management plan adopted by the state engineer before May 1,
9203 2006, remains in force and has the same legal effect as it had on the day on which it was

9214 the Utah Public Notice Website as described in Section 63F-1-701. Applications for
9215 appropriations shall not be filed during the time such waters are withdrawn from appropriation;
9216 provided, that after the first publication of notice aforesaid applications may be deposited with
9217 the state engineer and at the time such proclamation becomes effective the engineer shall hold

9219 the period of publication of such notice are most conducive to the public good, and shall file
9220 such applications in order of priority according to such determination.
9221 Section 216. Section **75-1-401** is amended to read:

9412 presence the court finds necessary.
9413 (6) If it appears to the court that the welfare of the minor or of the public requires that

9415 the person serving the summons take the minor into custody at once.
9416 (7) Subject to Subsection 78A-6-117(2)(n)(iii), upon the sworn testimony of one or

9433 (12) If the judge makes a written finding that he has reason to believe that personal
9434 service of the summons will be unsuccessful, or will not accomplish notification within a
9435 reasonable time after issuance of the summons, he may order service by registered mail, with a
9436 return receipt to be signed by the addressee only, to be addressed to the last-known address of
9437 the person to be served in the state. Service shall be complete upon return to the court of the
9438 signed receipt.
9439 (13) If the parents, parent, or guardian required to be summoned under Subsection (4)

9442 parent or guardian, provided that due notice has been given in the following manner:
9443 (a) If the address of the parent or guardian is known, due notice is given by sending
9444 him a copy of the summons by registered mail with a return receipt to be signed by the
9445 addressee only, or by personal service outside the state, as provided in the Utah Rules of Civil
9446 Procedure. Service by registered mail shall be complete upon return to the court of the signed
9447 receipt.
9448 (b) If the address or whereabouts of the parent or guardian outside the state cannot after
9449 diligent inquiry be ascertained, due notice is given by publishing a summons [~~in a newspaper~~
9450 ~~having general circulation in the county in which the proceeding is pending~~] on the Utah Public
9451 Notice Website as described in Section 63F-1-701. The summons shall be published once a

9452 week for four successive weeks. Service shall be complete on the day of the last publication.
9453 (c) Service of summons as provided in this subsection shall vest the court with
9454 jurisdiction over the parent or guardian served in the same manner and to the same extent as if
9455 the person served was served personally within the state.
9456 (14) In the case of service in the state, service completed not less than 48 hours before
9457 the time set in the summons for the appearance of the person served, shall be sufficient to
9458 confer jurisdiction. In the case of service outside the state, service completed not less than five
9459 days before the time set in the summons for appearance of the person served, shall be sufficient
9460 to confer jurisdiction.
9461 (15) Computation of periods of time under this chapter shall be made in accordance
9462 with the Utah Rules of Civil Procedure.
9463 Section 223. Section **78B-5-613** is amended to read:

S.B. 208 - Utah Public Notice Website Amendments

Fiscal Note

2009 General Session

State of Utah

State Impact

Enactment of this bill would require an appropriation from Dedicated Credits of $257,000 annually to the Division of State Archives to develop and maintain the program and website expansion required in the bill. The Division of State Archives will charge fees to cover their costs. There are potential costs savings of approximately $100,000 to state agencies which will no longer have to pay costs for certain newspaper advertisements.

Individual, Business and/or Local Impact

Local governments could see advertising costs savings of up to $500,000. Newspapers could see a decrease in advertising revenue as a result of this legislation. No impact is anticipated on individuals.
