

**ADDENDUM 1**  
**REQUEST FOR INFORMATION BY THE UTAH STATE LEGISLATURE**  
**Online Streaming Audio and Video Solutions**  
**RFI No. 2011-2**

We are not placing any limitations on the information you can provide, but our main focus is to find out what technology/solutions are out there. This will help educate us so that if and when we issue an RFP we can make sure it is broad enough to cover all reasonable solutions. Qualifications and experience of potential future RFP responders probably won't be of much help to us at this point. Addressing the points in the "information sought" portion of the RFI will be most helpful, but if there is additional technological or descriptive information that you think we should be aware of, please don't hesitate to provide it.
