Family Drug Court Enhanced Services Project

Category 2: Enhancement

Project Abstract

The Family Drug Court Enhanced Services Project will provide 55 additional parents residential substance abuse treatment services in parent and children programs. This project allows the Third District Juvenile Court's Family Dependency Drug Court program to increase the number of parent participants, and their children, who will receive intensive substance abuse treatment. The project serves parents who are under the jurisdiction of the court subsequent to the filing of a child welfare petition alleging abuse and neglect, where the substance abuse of the parent has been identified as a contributing factor. Reunification services are ordered as a condition of the service plan. Subsequent to a clinically administered substance abuse assessment and determination for level of care, parents are referred to residential treatment centers where the placements of the children are integrated into the treatment facility's therapeutic modality. The parent's progress and participation in treatment services are closely monitored and reviewed in the Family Dependency Drug Court program. The drug court program operates consistent with the best practices standards and guidelines as promulgated by the National Association of Drug Court Professionals. Progress toward identified goals is measured through the use of databases to track admissions, completions, and outcome data elements.
