

Straight FACTS

on UHCA'S funding request for ICFs/ID (serving those with intellectual disabilities.)

ITEMIZED BUDGET:

- ◆ When Utah's ICF/ID providers receive the needed \$411,000, which can be accessed through the ICF/ID Provider Assessment, this money will be used to draw down \$974,700 in federal matching funds, creating a total of \$1,385,700.
- ◆ This translates to a conservative increase for providers of approximately 3 percent per patient day and would become effective July 1, 2014.
- ◆ Even though NO state dollars are required to fund this rate increase, the language must still be included as an appropriation in the sub-committee's priority list.

MEASURING SUCCESS:

When we receive the requested \$411,000:

Utah's ICF/ID providers, who provide 24-hour care to some of our state's most vulnerable citizens, will be able to self-fund their much-needed rate increase without any additional cost to the state.
