

G.R.O.W. Measurements of Progress

Getting Ready for Our World: *A Program of Carmen B. Pingree Autism Center of Learning*

Rethink Curriculum

Common Core: Upon completing an initial assessment for each student, the Rethink Curriculum recommends a set of lessons which address Common Core standards appropriate to the individual student's grade and ability level.

Analytics: By keeping track of student progress and teacher data collection, then providing administrators with real-time analytics and weekly reports, Rethink helps detect trends, patterns and progress in student performance and helps ensure teacher accountability.

Data Tracking: Automatically generating data graphs and progress reports in real-time, Rethink provides graphic evidence of student progress that leads to more effective classroom interventions. By making these reports readily available to every team member working with a student, Rethink encourages collaboration amongst teachers and consistency between the home and classroom environments.

Functional Life Skills Assessment

7 core competencies are assessed on a 4-point scale:

Independent, Visual Model, Partial Physical Prompt, Full Physical Prompt

1. Functional Academic Skills
2. Communication Skills
3. Interpersonal Skills
4. Independent Living Skills
5. Leisure Skills
6. Pre-Vocational Skills
7. Vocational Skills

Behavior Tracker Pro App

A tool for monitoring, documenting, graphing, and assessing students' behavior using iPods/iPads.

- Frequency and Duration data
- Antecedent/Behavior/Consequence data
- High frequency behavior data
- Interval data

Super Duper Data Tracker Pro App

A tool for monitoring, documenting, graphing, and assessing students' Pre-Vocational/Vocational Skills using iPods/iPads.

- Independent
- Visual or verbal cue needed
- Approximated
- Unsuccessful

Additional Standardized Measures:

- Stanford-Binet Intelligence Scales
- Learning Accomplishment Profile
- Woodcock-Johnson Tests of Cognitive Abilities
- Vineland Adaptive Behavior Scales
