

Motion – Representative Tanner

Alternative Funding Source for 211 Information and Referral System at United Way

I move to recommend the following alternative funding source to fund 100% of the building block entitled “211 Information and Referral System at United Way”:

Increase and earmark phone surcharges collected by the state to pay for the 211 Information and Referral System at United Way.

This item would be placed directly under the building block named above on the ongoing building block list.

The actual implementation of these items would require legislation. The purpose of this motion is to gauge legislative interest in pursuing any of these options and to explore alternate funding sources.
