DEPARTMENT OF HUMAN SERVICES FATALITY REVIEW EXECUTIVE SUMMARY

JULY 1, 2014– JUNE 30, 2015

Department of Human Services (DHS) Fatality Review Policy requires a review of the deaths of all individuals for whom there is an open DHS case at the time of death or in cases where the individuals or their families have received services through DHS within 12 months preceding the death. Information obtained from case reviews provides insight into systemic strengths and highlights areas in which changes or modifications could enhance systemic response to client needs.

During FY2015, 270 deaths of current or past DHS clients were reported to the Office of Services Review (OSR). There were 18 suicide deaths (7%) and four homicides (1%). The deaths of 16 individuals (6%) were ruled accidental. The reviews indicate that abuse and/or neglect were contributing factors in four (1%) of the 270 deaths. The Division of Child and Family Services (DCFS) reported three children who died as the direct result of abuse or neglect by their parents, caretakers, or family members. No child died of abuse or neglect while in the custody of DCFS. One individual receiving services through the Division of Services for People with Disabilities (DSPD) died as a result of complications after being scalded in the bathtub.

Of the 37 fatalities reported by DCFS, 37 formal committee reviews were held (100%) with no reviews pending. Thirty-eight of the 71 reported DSPD fatalities were reviewed (53%), 33 reviews were waived (46%), with no reviews pending. Three Division of Juvenile Justice Services (DJJS) fatalities were reviewed (100%). On-site reviews were held for the 10 reported Utah State Developmental Center (USDC) fatalities (100%). Utah State Hospital (USH) conducted on-site reviews for its two reported fatalities (100%).

The deaths of 87 individuals who received services through the Division of Aging and Adult Services (DAAS) were reported. One individual (1%) was receiving services through DSPD and one individual (1%) was receiving services through USDC at the time they received services through DAAS.

The Office of Public Guardian (OPG) reported the deaths of 17 individuals for whom they provided services. Three of these individuals (18%) were also receiving services through DSPD at the time of death, and three individuals (18%) were also receiving services through USDC. Full committee reviews were held for these six individuals. OPG provided the Fatality Review Coordinator with comprehensive written reports detailing services provided by that office and information relating to the deaths of their 17 clients (100%).

The Division of Substance Abuse and Mental Health (DSA/MH) reported the deaths of 47 individuals who were receiving services prior to their deaths or who had received services within twelve months of their deaths. One DSA/MH client (2%) was also receiving services through DJJS; and one individual (2%) was receiving services through DSPD.

There were 130 (48%) reported deaths of male clients and 140 (52%) reported deaths of female clients. Reported deaths included 18 infants (7%) under the age of one year; 31 individuals (11%) between the

ages of one to 19 years; 63 individuals (23%) between the ages of 20 to 49 years; 70 individuals (26%) between the ages of 50 to 69 years; 72 individuals (27%) between the ages of 70 to 89 years, and 16 individuals (6%) between the ages of 90 to 100 years. Included in the 270 reported fatalities were two (1%) Asians, seven Black/African Americans (3%), 238 (89%) Caucasians, sixteen (6%) Hispanics, one Basque, and one individual of unknown ethnicity.
