

## UDAF Interim Presentation

### Conservation:

- UDAF received employees July 2015-Full funding needed
- 1/3 of the employees have left in the past year
- We are finding efficiencies and focusing resources on projects that increase those efficiencies

### Medical Marijuana:

- Strong and safe regulatory framework is necessary
- This is a program that will see growth, UDAF will need the proper resources to safely implement and manage
- This will be a costly program and funding should come from Health, not Natural Resources

### Food Safety Modernization Act (FSMA):

- UDAF will be expanding its role a bit due to FSMA
- As of now there is sufficient funding for the program
- Grocery stores like the standards and are requiring producers to follow them

### Future Growth:

- The population of Utah will double by 2050
- We have major turnover in the next five years due to retirement, with the potential of losing 56 employees
- Eighteen of those are in management positions
