The Administration of the Cache County School District continues to support state and local efforts to provide equitable resources for each student, which provide individualized learning opportunities to master state standards and learn at their highest level. We applaud efforts of policymakers to recognize deficiencies in revenue based on location, growth and yield per student and to take actions that mitigate funding gaps for schools throughout the State of Utah.

Cache's Board and administrative team have been active in advocating for additional resources in the following existing equalization funding mechanisms:

- WPU - fully equalized
- Voted and Board Levy guarantees (most recently SB97)
- Capital Foundation and Enrollment Growth program
- Necessarily Existent Small Schools
- Charter local replacement (most recently SB38)

We look forward to continued work with policymakers, board members and taxpayers in promoting public policy that will provide equitable learning opportunities for all students, while maintaining fiscal responsibility and local influence and control.

Superintendent Steven C. Norton

Dale F. Hansen, Business Administrator
