

AMENDED BILL

The amended bill requires the Division of Wildlife Resources to request an appropriation to fund its purposes. Although an appropriation would no longer be required, it is estimated that the Division could experience revenue losses up to \$16,000 annually.

Individual and Business Impact

This bill would benefit children in custody of the state by allowing them to fish for free. It would also allow disabled and mentally ill residents to fish for free, rather than paying \$.50 and \$5.00 respectively. Aggregate savings to these groups are: Disabled, \$600; Mentally ill, \$2,600; State custody children, \$12,800.
