

The fiscal impact of the implementation of this bill is not possible to estimate, due to the uncertainty of the number of schools that would adopt a uniform policy, the number of students who would apply for a waiver, and the cost of the uniforms. At the maximum, the statewide total cost could be \$3.5 million. It is much more likely however, that few schools would adopt the policy and that fee waivers would be minimal.

---

**Individual and Business Impact**

Those students (and/or their parents or guardians) who do not qualify for fee waivers and attending schools which adopt the school uniform policy, would be required to purchase uniforms. The cost of the uniforms is unknown, although it is reasonable to assume it would be less than \$100 per uniform.
