

**State Impact**

No direct state fiscal impact.

Local impacts are difficult to estimate because of the permissive language in the bill. If a local government opts to require 24 hour security on a facility located within 1,000 feet of a school that does not already provide 24 hour security, the estimated cost would be \$105,100 per facility. These costs could be absorbed by the provider or passed through to the county substance abuse authority.

---

**Individual and Business Impact**

Business impacts are dependant on local governments opting to require 24 hour security on facilities within 1,000 feet of a school. Estimated cost per treatment facility is \$105,100 based on \$12 per hour, 24 hours a day.
