**Fiscal Note****General Fund Surplus Appropriation for Water Development Projects***14-Jan-06***Bill Number: SB0039***11:45 AM*

---

---

**State Impact**

Provisions of this bill would reduce end-of-year General Fund surpluses otherwise available for general appropriation by transferring a portion of the surpluses to the Water Resources Conservation and Development Fund. Amounts would depend on the size of each fiscal year's surplus. Had this bill been in effect in FY 2005, \$7.2 million would have been transferred to the Water Resources Conservation and Development Fund.

---

**Individual and Business Impact**

Water suppliers and users may benefit by having more money available for water development projects.
