

Some truth about drug laws and corporate bribery that helps protect bad unconstitutional status quo that violates equality around the world.

Jonathan Peterson letter to Uruguay President, thanking him. And why we US citizens can't act to correct obvious equality violations by bad laws.

Truth. We as a people are unable to comprehend that drug laws make slaves of every citizen that is why drug laws violate citizen equality. Doctors/pharmacies have an illegal monopoly, because that monopoly is deeply ingrained in status quo; we citizens are made sheep by our human instinct program doing its job to protect our survival. Our beliefs that drug laws make us safer are not based in fact. Facts show what prohibition causes; criminal enterprise and oppression through loss of freedom and liberty over citizen rights to self medicate and worse created a master/slave groups enforced by unconstitutional laws. Any law that violates citizens being equal to each other is unfair, unjust and takes freedom and liberty for all. We can't comprehend these self-evident truths; that are known by all educated persons, or act to change bad laws because we are slaves to human instincts protection of status quo operations. The same way attorneys, who know corporations under corporate mission laws can only spend share holders money for profit, potential profit and humanitarian expenditures. Corporations don't have freedom of speech, to cover intent, like citizen voters do: but because of human instinct's effect on our U.S. Supreme Court too, they can't use those facts in their logic or belief systems that are clearly self-evident if you know what corporate mission laws enforce. How share holders money is spent; it can't be spend on freedom of speech it must be for profit which clearly shows intent, bribery by definition. There again human instinct gets in the way of every fact so we come up with some really stupid beliefs and logic that is not supported rational use of available knowledge.

Jonathan Peterson I file this complaint with the United Nations against our US government. U.N. humanitarian rights charter, Article 1.

All human beings are born free and equal in dignity and rights. They are endowed with reason and conscience and should act towards one another in a spirit of brotherhood.

COMPLAINT: EQUAL IN RIGHTS. Because of unlawful, unjust, unfair, un-constitutional drug laws that oppress the poor and everyone else by these master/slave laws that create elite citizenship, doctors are not equal to the rest of us, for the drug monopolies over self pain management I plead for you to review the evidence and make a formal complaint with the United Nations in behalf of your nation and submit my complaint in behalf of United States citizens that are not being treated as equals under all laws.

Human beings must have the right to make choices for themselves and not forced to purchase permission to treat their very own pain medicine. This creates a monopoly that is unfair and violates fair trade laws and worse creates criminals for exercising their self determination as too what they will put into their own body to not suffer or be controlled by another's wants or needs. Crimes must be actions against another's rights in some way. Otherwise these laws are just a form of slavery, hidden in the logic that is not based on the available facts on hand. Drug laws do not make us safe. Just the opposite happens every time, we just can't see to use this fact in our beliefs and logic that govern our societies, until now. Instinct is making human beings sheep by its powers to protect status quo operations

Bottom of Form

Jonathan L. Peterson 1027 W. 300 S. Salt Lake City, Utah 84104 USA 208-650-1346 I would love to debate any or all points about this complaint and human hardwired behaviors that protect status quo operations. All are based on available facts on hand, if you can comprehend reality factually. your brother Jonathan
