**26-4-9. Custody of dead body and personal effects -- Examination of scene of death -- Preservation of body -- Autopsies.**

(1) Upon notification of a death under Section 26-4-8, the medical examiner shall assume custody of the deceased body, clothing on the body, biological samples taken, and any article on or near the body which may aid him in determining the cause of death except those articles which will assist the investigative agency to proceed without delay with the investigation. In all cases the scene of the event shall not be disturbed until authorization is given by the senior ranking peace officer from the law enforcement agency having jurisdiction of the case and conducting the investigation. Where death appears to have occurred under circumstances listed in Section 26-4-7, the person or persons finding or having custody of the body, or jurisdiction over the investigation of the death, shall take reasonable precautions to preserve the body and body fluids so that minimum deterioration takes place. The body shall not be moved without permission of the medical examiner, district attorney, or county attorney having criminal jurisdiction, or his authorized deputy except in cases of affront to public decency or circumstances where it is not practical to leave the body where found, or in such cases where the cause of death is clearly due to natural causes. The county attorney or district attorney and law enforcement agency having jurisdiction shall consult with the medical examiner to determine the need for an autopsy. In any such case concerning unattended deaths qualifying as exempt from autopsy, a death certificate may be certified by a licensed physician. In this case the physician may be established as the medical examiner's designated representative.
