

28 graduates examination or other qualifying examinations such as the United States Medical  
29 Licensing Exam parts I and II, which are approved by the division or a medical school approved  
30 by the division;

31 (e) has satisfactorily completed one calendar year of supervised clinical training under the  
32 direction of a United States medical education setting accredited by the liaison committee for  
33 graduate medical education and approved by the division;

34 (f) has completed the postgraduate hospital training required by Subsection  
35 58-67-302(f)(i); and

36 (g) has passed the examination required by the division of all applicants for licensure.

37 (2) Satisfaction of the requirements of Subsection (1) is in lieu of:

38 (a) the completion of any foreign internship or social service requirements; and

39 (b) the certification required by Subsection 58-67-302(1)(e).

40 (3) Individuals who satisfy the requirements of Subsections (1)(a) through (f) shall be  
41 eligible, on the same basis as graduates of medical schools located in the United States, for  
42 admission to graduate medical education programs within the state, including internships and  
43 residencies, which are accredited by the liaison committee for graduate medical education.

44 (4) A document issued by a medical school located outside the United States shall be  
45 considered the equivalent of a degree of doctor of medicine for the purpose of licensure as a  
46 physician and surgeon in this state if:

47 (a) the foreign medical school is recognized by an organization approved by the division;

48 (b) the document granted by the foreign medical school is issued after the completion of  
49 all formal requirements of the medical school except internship or social service; and

50 (c) the foreign medical school certifies that the person to whom the document was issued  
51 has satisfactorily completed the requirements of this Subsection (1)(c).

52 (5) The provisions for licensure under this section shall be known as the "fifth pathway  
53 program."

54 (6) Within the limitations of available financial and physical resources, and to the extent  
55 approved by the Board of Regents, colleges of medicine within the state shall develop education  
56 programs of supervised clinical training that will provide a means for satisfaction of the  
57 requirements of Subsection (1)(e) of this section; provided, however, that this program will not  
58 jeopardize the accreditation of the colleges of medicine. The colleges of medicine shall retain

59 authority and responsibility, insofar as they comply with the other provisions of this act, and under  
60 the direction of the State Board of Regents, for determining the criteria for eligibility and  
61 admission to those programs, the number and qualifications of students accepted thereto, and the  
62 curriculum content, performance standards, and other requirements for satisfactory completion.

63 (7) The medical school may charge persons receiving the clinical training of the fifth  
64 pathway program the same tuition it charges other fourth-year medical students.
