971 (3) Printed copies of the maps referenced in Subsection (2) shall be available for
972 inspection by the public at the offices of the Utah Association of Counties.

973 (4) The state finds with respect to the grazing zones described in Subsection (2) that:

974 (a) agricultural livestock industry on the lands comprising these zones has provided a
975 significant contribution to the history, customs, culture, economy, welfare, and other values of
976 each area for more than 100 years;

977 (b) the potential for abundant natural and vegetative resources exist within these zones
978 if managed properly, that will support and expand continued, responsible agricultural livestock
979 activities and wildlife habitat;

980 (c) agricultural livestock activities in these zones and the associated historic resources,
981 human history, shaping of human endeavors, variety of cultural resources, landmarks,
982 structures, and other objects of historic or scientific interest are worthy of recognition,
983 preservation, and protection;

984 (d) (i) the highest management priority for lands within these zones is the preservation,
985 restoration, and enhancement of watershed and rangeland health to sustain and expand forage
986 production for both livestock grazing and wildlife habitat, and the restoration and development

987 of historic, existing, and future livestock grazing and wildlife habitat resources in order to
988 provide protection for the resources, objects, customs, culture, and values identified above; and

989 (ii) notwithstanding Subsection (4)(d)(i), if part or all of any zone lies within a sage
990 grouse management area, then the management priorities for such part shall be consistent with
991 the management priorities set forth in Subsection (4)(d)(i) to the maximum extent consistent
992 with the management priorities of the sage grouse management area;

993 (e) subject to Subsection (4)(d)(ii), responsible development of any deposits of energy
994 and mineral resources, including oil, natural gas, oil shale, oil sands, coal, phosphate, gold,
995 uranium, and copper, as well as areas with wind and solar energy potential, that may exist in
996 these zones is compatible with the management priorities of Subsection (4)(d)(i) in these
997 zones; and

998 (f) subject to Subsection (4)(d)(ii), responsible development of any recreation
999 resources, including roads, campgrounds, water resources, trails, OHV use, sightseeing,
1000 canyoneering, hunting, fishing, trapping, and hiking resources that may exist in these grazing
1001 zones is compatible with the management priorities of Subsection (4)(d)(i) in these grazing
1002 zones.

1003 (5) The state finds with respect to the zones described in Subsection (2) that the
1004 historic levels of livestock grazing activity and other values identified in Subsection (4) in each
1005 zone have greatly diminished, or are under other serious threat, due to:

1006 (a) unreasonable, arbitrary, and unlawfully restrictive federal management policies,
1007 including:

1008 (i) de facto managing for wilderness in nonwilderness areas and non-WSAs;

1009 (ii) ignoring the chiefly valuable for grazing designation of the Secretary of the Interior
1010 applicable to each of these zones; and

1011 (iii) the arbitrary administrative reductions in animal unit months of permitted forage;

1012 (b) inflexible federal grazing practices that disallow grazing at different times each year
1013 proven to be most effective for maintaining and enhancing rangeland conditions;

1014 (c) mismanagement of wild horses and burros resulting in competition for forage by
1015 excess and mismanaged populations of wild horses and burros in Beaver and Emery counties;

1016 (d) improper management of vegetation resulting in the overgrowth of pinion, invasive
1017 species, and juniper, and other woody vegetation that:

- 1018 (i) compromise watershed and rangeland health;
1019 (ii) crowd out grazing forage;
1020 (iii) degrade habitat and limit wildlife populations;
1021 (iv) reduce water yield; and
1022 (v) heighten the risk of catastrophic wildfire; and
1023 (e) other practices which degrade overall rangeland health.
1024 (6) To protect and preserve against the threats described in Subsection (5), the state
1025 supports the following with respect to the zones described in Subsection (2):
1026 (a) efficient and sustained policies, programs, and practices directed at preserving,
1027 restoring, and enhancing watershed and rangeland health to maximize:
1028 (i) all permitted forage production for livestock grazing and other compatible uses,
1029 including flexible grazing on and off dates adaptive to yearly climate and range conditions; and
1030 (ii) forage for fish and wildlife;
1031 (b) a cooperative management approach by federal agencies, the state, and local
1032 government agencies to achieve broadly supported management plans for the full development
1033 of:
1034 (i) forage resources for grazing livestock and wildlife; and
1035 (ii) other uses compatible with livestock grazing and wildlife utilization;
1036 (c) effective and responsible management of wild horses and burros to eliminate excess
1037 populations; and
1038 (d) effective and responsible management of wildlife habitat.
1039 (7) The state requests that the federal agencies that administer lands within each
1040 grazing zone:
1041 (a) fully cooperate and coordinate with the state and the respective counties within
1042 which each grazing zone is situated, to develop, amend, and implement land and resource
1043 management plans, and implement management decisions that are consistent with the
1044 purposes, goals, and policies described in this section to the maximum extent allowed under
1045 federal law;
1046 (b) expedite the processing, granting, and streamlining of grazing permits, range
1047 improvements, and applications to enhance and otherwise develop all existing and permitted
1048 grazing resources located within each grazing zone, including renewable vegetative resources;

1049 (c) allow continued maintenance and increased development of roads, power lines,
1050 pipeline infrastructure, and other utilities necessary to achieve the goals, purposes, and policies
1051 described in this section and consistent with multiple use and sustained yield principles;

1052 (d) refrain from any planning decisions and management actions that will undermine,
1053 restrict, or diminish the goals, purposes, and policies for each grazing zone as stated in this
1054 section;

1055 (e) subject to Subsection (4)(d)(ii), refrain from implementing a policy that is contrary
1056 to the goals and purposes described within this section; and

1057 (f) refrain from implementing utilization standards less than 50%, unless:

1058 (i) implementing a standard of less than 50% utilization on a temporary basis is
1059 necessary to resolve site-specific concerns; and

1060 (ii) the federal agency consults, coordinates, and cooperates fully with local
1061 governments.

1062 (8) (a) The state recognizes the importance of all grazing districts on Utah BLM and
1063 Forest Service lands but establishes the grazing zones described in Subsection (2) to provide
1064 special protection and preservation against the identified threats found in Subsection (5) to
1065 exist in these zones.

1066 (b) It is the intent of the state to designate additional grazing agricultural commodity
1067 zones in future years, if circumstances warrant special protection and preservation for new
1068 zones.

1069 (9) The state calls upon applicable federal, state, and local agencies to coordinate with
1070 each other and establish applicable intergovernmental standing commissions, with membership
1071 consisting of representatives from the United States government, the state, and local
1072 governments to coordinate and achieve consistency in planning decisions and management
1073 actions in zones described in Subsection (2) in order to achieve the goals, purposes, and
1074 policies described in this section.

1075 (10) Notwithstanding the provisions of this section, and subject to Subsection
1076 (4)(d)(ii), the state's mineral, oil, gas, and energy policies and plans on land within the zones
1077 described in Subsection (2) shall be governed by Sections [63J-4-401](#) and [63J-8-104](#).

1078 Section 6. Section **63J-8-105.9** is enacted to read:

- 1173 (4) The state finds with respect to the zones described in Subsection (2) that:
- 1174 (a) agricultural timber, logging, and forest product industries on the lands comprising
1175 these timber zones have provided a significant contribution to the history, customs, culture,
1176 economy, welfare, and other values of each area for many decades;
- 1177 (b) abundant natural and vegetative resources exist within these zones to support and
1178 expand continued, responsible timber, logging, and other forest product activities;
- 1179 (c) agricultural timber, logging, and forest product activities in these zones, and the
1180 associated historic resources, human history, shaping of human endeavors, variety of cultural
1181 resources, landmarks, structures, and other objects of historic or scientific interest are worthy of
1182 recognition, preservation and protection;
- 1183 (d) (i) the highest management priority for lands within these zones is maintenance and
1184 promotion of forest and vegetation ecosystem health achieved by responsible active
1185 management in development of historic, existing, and future timber, logging, and forest
1186 product resources in order to provide protection for the resources, objects, customs, culture,
1187 and values identified above; and
- 1188 (ii) notwithstanding Subsection (4)(d)(i), if part or all of any zone lies within a sage
1189 grouse management area, then the management priorities for such part shall be consistent with
1190 the management priorities set forth in Subsection (4)(d)(i) to the maximum extent consistent
1191 with the management priorities of the sage grouse management area;
- 1192 (e) subject to Subsection (4)(d)(ii), responsible development of any deposits of energy
1193 and mineral resources, including oil, natural gas, oil shale, oil sands, coal, phosphate, gold,
1194 uranium, and copper, as well as areas with wind and solar energy potential, that may exist in
1195 these zones is compatible with the management priorities of Subsection (4)(d)(i) in these
1196 zones; and
- 1197 (f) subject to Subsection (4)(d)(ii), responsible development of any recreation
1198 resources, including wildlife, roads, campgrounds, water resources, trails, OHV use,
1199 sightseeing, canyoneering, hunting, fishing, trapping, and hiking resources that may exist in
1200 these timber zones is compatible with the management priorities of Subsection (4)(d)(i) in
1201 these timber zones.
- 1202 (5) The state finds that the historic levels of timber, logging, and forest products
1203 activities in the zones described in Subsection (2) have greatly diminished, or are under serious

1204 threat, due to:
1205 (a) unreasonable, arbitrary, and unlawfully restrictive federal management policies,
1206 including:
1207 (i) de facto managing for wilderness in nonwilderness areas;
1208 (ii) ignoring the multiple use sustained yield mission of the forest service;
1209 (iii) ignoring the fact that the forest service's parent agency is the United States
1210 Department of Agriculture whose mission includes providing timber as an important
1211 agriculture resource; and
1212 (iv) the arbitrary administrative reductions in timber, logging, and forest products
1213 activities;
1214 (b) improper management of forest vegetation resulting in the overcrowding of old
1215 growth alpine species and the crowding out of aspen diversity, all of which results in:
1216 (i) devastation of entire mountainsides due to insect infestation and disease;
1217 (ii) reduced water yield;
1218 (iii) increased catastrophic wildfire;
1219 (iv) increased soil erosion;
1220 (v) degradation of wildlife habitat; and
1221 (vi) suppression and threatened extinction of important rural economic activities; and
1222 (c) other practices that degrade overall forest health.
1223 (6) To protect and preserve the threats described in Subsection (5), the state supports
1224 the following with respect to the zones described in Subsection (2):
1225 (a) efficient and responsible development, within each timber zone, of:
1226 (i) robust timber thinning and harvesting programs and activities; and
1227 (ii) other uses compatible with increased timber, logging, and forest product activities
1228 including a return to historic levels of timber, logging, and forest product activity in each of
1229 these zones;
1230 (b) a cooperative management approach by federal agencies, the state, and local
1231 governments to achieve broadly supported management plans for the full development, within
1232 each timber zone, of:
1233 (i) forest product resources; and
1234 (ii) other uses compatible with timber activities; and

- 1235 (c) effective and responsible management of wildlife habitat.
- 1236 (7) The state requests that the federal agencies that administer lands within each timber
1237 zone:
- 1238 (a) fully cooperate and coordinate with the state and the respective counties within
1239 which each timber zone is situated, to develop, amend, and implement land and resource
1240 management plans and implement management decisions that are consistent with the purposes,
1241 goals, and policies described in this section to the maximum extent allowed under federal law;
- 1242 (b) expedite the processing, granting, and streamlining of logging and forest product
1243 harvesting permits, range improvements, and applications to enhance and otherwise develop
1244 existing and permitted timber resources located within each timber zone, including renewable
1245 vegetative resources;
- 1246 (c) expedite stewardship programs to allow private enterprise to carry out the timber,
1247 logging, and forest activities described in this section;

1249 pipeline infrastructure, and other utilities necessary to achieve the goals, purposes, and policies
1250 described in this section and consistent with multiple use and sustained yield principles;
- 1251 (e) refrain from any planning decisions and management actions that will undermine,
1252 restrict, or diminish the goals, purposes, and policies for each timber zone as stated in this
1253 section; and
- 1254 (f) subject to Subsection (4)(d)(ii), refrain from implementing a policy that is contrary
1255 to the goals and purposes described within this section.
- 1256 (8) (a) The state recognizes the importance of all areas on BLM and Forest Service
1257 lands high value lumber and forest product resources but establishes the special Timber
1258 Agricultural Commodity Zones to provide special protection and preservation against the
1259 identified threats found in Subsection (5) to exist in these zones.
- 1260 (b) It is the intent of the Legislature to designate Additional Timber Agricultural
1261 Commodity Zones in future years, if circumstances warrant special protection and preservation
1262 for new zones.
- 1263 (9) The state calls upon applicable federal, state, and local agencies to coordinate with
1264 each other and establish applicable intergovernmental standing commissions, with membership
1265 consisting of representatives from the United States government, the state, and local

1266 governments to coordinate and achieve consistency in planning decisions and management
1267 actions in the zones described in Subsection (2).

1268 (10) Notwithstanding the provisions of this section, and subject to Subsection
1269 (4)(d)(ii), the state's mineral, oil, gas, and energy policies, as well as its grazing policies, on
