

H.B. 16

Solar Power Plant Amendments

House Amendments

Amendment 1

January 22, 2026 11:40 AM

Representative **Colin W. Jack** proposes the following amendments:

1. *Line 64 through 74:*

64 where the project is located is non-irrigated cropland of a capability class five or six, as
65 designated by the Natural Resources Conservation Service.

66 (3) A proposed solar power plant located on grazing land is not eligible to receive state
67 incentives if the land produces greater than {1,000} 250 pounds of vegetative production per
68 acre in a normal year, according to the Web Soil Survey produced by the Natural
69 Resources Conservation Service.

70 (4) A proposed solar power plant located on grazing land may receive half of an eligible
71 state incentive if the land produces between {500} 125 and {1,000} 250 pounds of vegetative
72 production per acre in a normal year, according to the Web Soil Survey produced by the
73 Natural Resources Conservation Service.

74 (5) In accordance with Subsection 17D-3-103(2), a conservation district may make a
