824 the application, but in no event may an application be granted for a period of time
825 less than that ordinarily needed to satisfy the essential and primary purpose of the
826 application or until the water is no longer available as determined by the state
827 engineer.

837 applicant; and
838 (iii) the water is still available.
- 839 (e) An extension may not exceed the time necessary to satisfy the primary purpose of the
840 original application.

- 859 (b) The state engineer shall:
- 860 (i) approve the temporary change if the state engineer finds there is reason to believe

863 temporary change would impair an existing right.
- 864 (5)(a) With respect to a change application for a permanent or fixed time change:
- 865 (i) the state engineer shall follow the same procedures provided in this title for
866 approving an application to appropriate water; and

870 application if the application only involves a change in point of diversion of 660 feet
871 or less.
- 872 (c) The state engineer may condition approval of a change application, including to:
- 873 (i) prevent an enlargement of the quantity of water depleted by the nature of the
874 proposed use when compared with the nature of the currently approved use of
875 water proposed to be changed; and
 - 876 (ii) ensure that the recognition and subsequent use of saved water, as defined in
877 Section 73-3-3:
878 (A) is quantified, reported, and verified;

- 879 (B) does not lead to an enlargement of the depletion or diversion amounts in the
880 underlying water right that serves as the basis of the saved water, or an increase
881 in the authorized number of irrigated acres unless depletion is accounted for
882 and regulated in the condition;
- 883 (C) is limited to the net decrease in depletion and net reduction in diversion of the
884 underlying water right that serves as the basis of the saved water;
- 885 (D) is limited to the volume of water that will be sustained over time from the net
886 decrease in depletion or net reduction in diversion of the underlying water right
887 that serves as the basis of the saved water;
- 888 (E) does not violate an existing water agreement; and
- 889 (F) when based solely on a net reduction in diversion, the subsequent use is
890 limited to nonconsumptive beneficial uses and does not increase the depletion
891 allowed by the underlying water right that serves as the basis of the saved
892 water or otherwise cause quantity impairment to an existing water right when
893 the saved water is beneficially used separate from the underlying water right.
- 894 (d) Except for an application proposing to quantify saved water, a condition described in
895 Subsection (5)(c) may not include a reduction in the currently approved diversion
896 rate of water under the water right identified in the change application solely to
897 account for the difference in depletion under the nature of the proposed use when
898 compared with the nature of the currently approved use.
- 899 (6)(a) Except as provided in Subsection (6)(b), the state engineer shall reject a
900 permanent or fixed time change application if the person proposing to make the
901 change is unable to meet the burden described in Subsection 73-3-3(5).
- 902 (b) If otherwise proper, the state engineer may approve a change application upon one or
903 more of the following conditions:
- 904 (i) for part of the water involved;
- 905 (ii) that the applicant acquire a conflicting right; or
- 906 (iii) that the applicant provide and implement a plan approved by the state engineer to
907 mitigate impairment of an existing right.
- 908 (c)(i) There is a rebuttable presumption of quantity impairment, as defined in Section
909 73-3-3, to the extent that, for a period of at least seven consecutive years, a portion
910 of the right identified in a change application has not been:
- 911 (A) diverted from the approved point of diversion; or
- 912 (B) beneficially used at the approved place of use.

- 913 (ii) The rebuttable presumption described in Subsection (6)(c)(i) does not apply if the
 914 beneficial use requirement is excused by:
 915 (A) Subsection 73-1-4(2)(e);
 916 (B) an approved nonuse application under Subsection 73-1-4(2)(b);
 917 (C) Subsection 73-3-30(7); or
 918 (D) the passage of time under Subsection 73-1-4(2)(c)(i).
- 919 (d) The state engineer may not consider quantity impairment based on the conditions
 920 described in Subsection (6)(c) unless the issue is raised in a:
 921 (i) timely protest that identifies which of the protestant's existing rights the protestant
 922 reasonably believes will experience quantity impairment; or
 923 (ii) written notice provided by the state engineer to the applicant within 90 days after
 924 the change application is filed.
- 925 (e) The written notice described in Subsection (6)(d)(ii) shall:
 926 (i) specifically identify an existing right the state engineer reasonably believes may
 927 experience quantity impairment; and
 928 (ii) be mailed to the owner of an identified right, as shown by the state engineer's
 929 records, if the owner has not protested the change application.
- 930 (f) The state engineer is not required to include all rights the state engineer believes may
 931 be impaired by the proposed change in the written notice described in Subsection
 932 (6)(d)(ii).
- 933 (g) The owner of a right who receives the written notice described in Subsection
 934 (6)(d)(ii) may not become a party to the administrative proceeding if the owner has
 935 not filed a timely protest.
- 936 (h) If a change applicant, the protestants, and the persons identified by the state engineer
 937 under Subsection [~~(6)(d)(ii)~~] (6)(d)(i) come to a written agreement regarding how the
 938 issue of quantity impairment shall be mitigated, the state engineer may incorporate
 939 the terms of the agreement into a change application approval.
