457 irrigation, municipal and industrial, domestic or culinary, stock watering, power or
458 mining development, or manufacturing, or will unreasonably affect public recreation
459 or the natural stream environment, or will prove detrimental to the public welfare, the
460 state engineer shall withhold approval or rejection of the application until the state
461 engineer has investigated the matter.

462 (c) If an application does not meet the requirements of this section, it shall be rejected.

463 (2)(a) An application to appropriate water for industrial, power, mining development,
464 manufacturing purposes, agriculture, or municipal purposes may be approved for a
465 specific and certain period from the time the water is placed to beneficial use under
466 the application, but in no event may an application be granted for a period of time
467 less than that ordinarily needed to satisfy the essential and primary purpose of the
468 application or until the water is no longer available as determined by the state
469 engineer.

470 (b) At the expiration of the period fixed by the state engineer the water shall revert to the

- 471 public and is subject to appropriation as provided by this title.
- 472 (c) No later than 60 calendar days before the expiration date of the fixed time period, the
473 state engineer shall send notice by mail or by any form of electronic communication
474 through which receipt is verifiable, to the applicant of record.
- 475 (d) Except as provided by Subsection (2)(e), the state engineer may extend any limited
476 water right upon a showing that:
- 477 (i) the essential purpose of the original application has not been satisfied;
478 (ii) the need for an extension is not the result of any default or neglect by the
479 applicant; and
480 (iii) the water is still available.
- 481 (e) An extension may not exceed the time necessary to satisfy the primary purpose of the
482 original application.
- 483 (f) A request for extension of the fixed time period must be filed in writing in the office

487 elements, as defined in Section 65A-17-101, therefrom by precipitation or otherwise,
488 the applicant shall file with the state engineer a copy of:
- 489 (i) a contract for the payment of royalties to the state; and

495 shall:
- 496 (i) reverse the approval of an application; or

499 provision related to the water right.
- 500 (4)(a) The state engineer shall investigate all temporary change applications.
- 501 (b) The state engineer shall:
- 502 (i) approve the temporary change if the state engineer finds there is reason to believe
503 that the temporary change will not impair an existing right; and
504 (ii) deny the temporary change if the state engineer finds there is reason to believe the

- 505 temporary change would impair an existing right.
- 506 (5)(a) With respect to a change application for a permanent or fixed time change:
- 507 (i) the state engineer shall follow the same procedures provided in this title for
- 508 approving an application to appropriate water; and
- 509 (ii) the rights and duties of a change applicant are the same as the rights and duties of
- 510 a person who applies to appropriate water under this title.
- 511 (b) The state engineer may waive notice for a permanent or fixed time change
- 512 application if the application only involves a change in point of diversion of 660 feet
- 513 or less.
- 514 (c) The state engineer may condition approval of a change application, including to:
- 515 (i) prevent an enlargement of the quantity of water depleted by the nature of the
- 516 proposed use when compared with the nature of the currently approved use of
- 517 water proposed to be changed; and
- 518 (ii) ensure that the recognition and subsequent use of saved water, as defined in
- 519 Section 73-3-3:
- 520 (A) is quantified, reported, and verified;
- 521 (B) does not lead to an enlargement of the depletion or diversion amounts in the
- 522 underlying water right that serves as the basis of the saved water, or an increase
- 523 in the authorized number of irrigated acres unless depletion is accounted for
- 524 and regulated in the condition;
- 525 (C) is limited to the net decrease in depletion and net reduction in diversion of the
- 526 underlying water right that serves as the basis of the saved water;
- 527 (D) is limited to the volume of water that will be sustained over time from the net
- 528 decrease in depletion or net reduction in diversion of the underlying water right
- 529 that serves as the basis of the saved water;
- 530 (E) does not violate an existing water agreement; and
- 531 (F) when based solely on a net reduction in diversion, the subsequent use is
- 532 limited to nonconsumptive beneficial uses and does not increase the depletion
- 533 allowed by the underlying water right that serves as the basis of the saved
- 534 water or otherwise cause quantity impairment to an existing water right when
- 535 the saved water is beneficially used separate from the underlying water right.
- 536 (d) Except for an application proposing to quantify saved water, a condition described in
- 537 Subsection (5)(c) may not include a reduction in the currently approved diversion
- 538 rate of water under the water right identified in the change application solely to

- 539 account for the difference in depletion under the nature of the proposed use when
540 compared with the nature of the currently approved use.
- 541 (6)(a) Except as provided in Subsection (6)(b), the state engineer shall reject a
542 permanent or fixed time change application if the person proposing to make the
543 change is unable to meet the burden described in Subsection 73-3-3(5).
- 544 (b) If otherwise proper, the state engineer may approve a change application upon one or
545 more of the following conditions:
- 546 (i) for part of the water involved;
- 547 (ii) that the applicant acquire a conflicting right; or
- 548 (iii) that the applicant provide and implement a plan approved by the state engineer to
549 mitigate impairment of an existing right.
- 550 (c)(i) There is a rebuttable presumption of quantity impairment, as defined in Section
551 73-3-3, to the extent that, for a period of at least seven consecutive years, a portion
552 of the right identified in a change application has not been:
- 553 (A) diverted from the approved point of diversion; or
- 554 (B) beneficially used at the approved place of use.
- 555 (ii) The rebuttable presumption described in Subsection (6)(c)(i) does not apply if the
556 beneficial use requirement is excused by:
- 557 (A) Subsection 73-1-4(2)(e);
- 558 (B) an approved nonuse application under Subsection 73-1-4(2)(b);
- 559 (C) Subsection 73-3-30(7); or
- 560 (D) the passage of time under Subsection 73-1-4(2)(c)(i).
- 561 (d) The state engineer may not consider quantity impairment based on the conditions
562 described in Subsection (6)(c) unless the issue is raised in a:
- 563 (i) timely protest that identifies which of the protestant's existing rights the protestant
564 reasonably believes will experience quantity impairment; or
- 565 (ii) written notice provided by the state engineer to the applicant within 90 days after
566 the change application is filed.
- 567 (e) The written notice described in Subsection (6)(d)(ii) shall:
- 568 (i) specifically identify an existing right the state engineer reasonably believes may
569 experience quantity impairment; and
- 570 (ii) be mailed to the owner of an identified right, as shown by the state engineer's
571 records, if the owner has not protested the change application.
- 572 (f) The state engineer is not required to include all rights the state engineer believes may

573 be impaired by the proposed change in the written notice described in Subsection
574 (6)(d)(ii).

575 (g) The owner of a right who receives the written notice described in Subsection
576 (6)(d)(ii) may not become a party to the administrative proceeding if the owner has
577 not filed a timely protest.

578 (h) If a change applicant, the protestants, and the persons identified by the state engineer
579 under Subsection [~~(6)(d)(ii)~~] (6)(d)(i) come to a written agreement regarding how the
580 issue of quantity impairment shall be mitigated, the state engineer may incorporate
581 the terms of the agreement into a change application approval.
