Senator Keith Grover
Senate District 23

RE: Demographic Profile of Senate District 23

The Strategic Initiatives Group within the Office of Legislative Research and General Counsel has created detailed demographic profiles of the new 2023 legislative districts. These 104 profiles contain summaries of information from the U.S. Census Bureau’s American Community Survey, which is an ongoing nationwide survey collecting information on social, economic, housing, and demographic characteristics. The information from the American Community Survey contained in these profiles was obtained between January 1, 2016, and December 31, 2022, making it the most recent, accurate, complete information available.

This profile of Senate District 23 not only provides detailed demographic information about your legislative district, but it also provides a comparison of this information to other legislative districts and to the statewide average. We trust that this profile will prove useful as you identify trends and issues within your legislative district. We also hope that this profile will be useful as you evaluate public policy proposals that impact the lives of your constituents.

It has been an opportunity of a lifetime for me to serve the Utah Legislature. I appreciate your support over the years and wish each of you the very best.

Kind Regards,

Jerry Howe

Percentage of Owner-Occupied Housing Units, With Home Equity Loan Only ...................................................... 552 .... 554
Percentage of Owner-Occupied Housing Units, Without a Mortgage ................................................................. 555 .... 556
Explanation of Data

Most of the data in this demographic profile report was obtained from the U.S. Census Bureau’s American Community Survey (ACS) 2016-2020 Five-year Data Release, which is the most recent release. The ACS is a nationwide survey designed to provide communities with reliable and timely social, economic, housing, and demographic data of America’s communities. The ACS has an annual sample size of about 3.5 million addresses nationally, with survey information collected nearly every day of the year. Data are pooled across five years to produce estimates for smaller levels of geography, such as state legislative districts. As a result, ACS estimates reflect data that have been collected over a period of time rather than for a single point in time as in the decennial census. The ACS data in this report was collected January 1, 2016, through December 31, 2020. Race and ethnicity data is from the decennial census.

An understanding of the concepts explained below will help a reader better comprehend how the census data is classified.

Living Quarters

Living quarters are usually found in structures intended for residential use, but also may be found in structures intended for nonresidential use as well as in places such as tents, vans, and emergency and transitional shelters. Living quarters are classified as either housing units or group quarters.

Housing Unit

A housing unit may be a house, an apartment, a mobile home, a group of rooms, or a single room that is occupied (or, if vacant, intended for occupancy) as separate living quarters. Separate living quarters are those in which the occupants live separately from any other individuals in the building, and which have direct access from outside the building or through a common hall. If any of the occupants in rooming or boarding houses, congregate housing, or continuing care facilities live separately from others in the building and have direct access, their quarters are classified as separate housing units.

Both occupied and vacant housing units are included in the housing unit inventory. Boats, recreational vehicles (RVs), vans, tents, railroad cars, and the like are included only if they are occupied as someone's current place of residence. Vacant mobile homes are included provided they are intended for occupancy on the site where they stand. Vacant mobile homes on dealers' sales lots, at the factory, or in storage yards are excluded from the housing inventory. Also excluded from the housing inventory are quarters being used entirely for nonresidential purposes, such as a store or an office, or quarters used for the storage of business supplies or inventory, machinery, or agricultural products. Housing units are classified as either occupied or vacant.

Occupied Housing Unit – A housing unit is classified as occupied if it is the current place of residence of the person or group of people living in it at the time of interview. The occupants may be a single family, one person living alone, two or more families living together, or any other group of related or unrelated people who share living quarters. Occupied rooms or suites of rooms in hotels, motels, and similar places are classified as housing units only when occupied by permanent residents.

Occupied housing units are further classified as either family households or non-family households. The householder is the adult person completing the ACS questionnaire mailed to housing unit address.
**Family Households** – A family household is where the householder is related to at least one other person in the household by birth, marriage, or adoption. For example, a "two-person family" could be a husband and wife, a parent and child, or two siblings.

**Non-Family Households** – A non-family household is where the householder is not related to any other person in the household. A person living alone is classified as a non-family household.

**Vacant Housing Unit** – A housing unit is vacant if no one is living in it at the time of interview. New units not yet occupied are classified as vacant housing units if construction has reached a point where all exterior windows and doors are installed, and final usable floors are in place.

**Group Quarters**

A Group Quarters (GQs) is a place where people live or stay in a group living arrangement that is owned or managed by an entity or organization providing housing and/or services for the residents. These services may include custodial or medical care, as well as other types of assistance, and residency is commonly restricted to those receiving these services. This is not a typical household-type living arrangement. People living in GQs usually are not related to each other. GQs include such places as college residence halls, residential treatment centers, skilled nursing facilities, group homes, military barracks, correctional facilities, workers’ dormitories, and facilities for people experiencing homelessness.

The graphic below illustrates the classifications described above. The percentages are for Utah.

Figure 7.50 - RELATIONSHIP TO HOUSEHOLDER, LIVING ARRANGEMENTS
Percentage of Population Age 65+, by Household Type*
(Categories are mutually exclusive and sum to 100%)

* Living quarters are classified as either households or group quarters. Households are categorized as either family or nonfamily. A family household is where the householder is related to at least one other person in the household by birth, marriage, or adoption. For example, a "two-person family" could be a husband and wife, a parent and child, or two siblings. Group Quarters include such places as college residence halls, residential treatment centers, skilled nursing facilities, group homes, military barracks, correctional facilities, workers’ dormitories, and facilities for people experiencing homelessness.

**Figure 9.2 - VETERANS**

**Percentage of Civilian Males Age 18-54, Who are Veterans**

(First category in Figure 9.1; same data presented in Figure 9.3)

* Veterans are people who have served on active duty in any branch of the military, but are not currently serving. People who served in the National Guard or Reserves are classified as veterans only if they were called or ordered to active duty, not counting training. Active duty refers to military members who are currently serving full-time in their military capacity with the U.S. Armed Forces. A civilian is any person not on active duty.

Utah County Senate Districts
Figure 17.1 - FOOD STAMPS/SUPPLEMENTAL NUTRITION ASSISTANCE PROGRAM (SNAP)
Percentage of Households, by Receipt of Food Stamps/SNAP*
(Categories are mutually exclusive and sum to 100%)

*Eligibility for the federal food stamp program now known as SNAP (Supplemental Nutrition Assistance Program) is both income and asset based. A household's gross income must be less than 130% of poverty and the household's net income must be less than 100% of poverty. In addition, the household must have less than $2,500 in assets. For households with elderly or disabled members, the asset limit is $3,750.
Figure 18.1 - DISABILITY STATUS
Percentage of Households, by Disability Status*
(Categories are mutually exclusive and sum to 100%)

Figure 18.2 - DISABILITY STATUS
Percentage of Households, That have Household Member With Disability
(First category in Figure 18.1; same data presented in Figure 18.3)

* Disability status is determined by the respondent’s answers to six survey questions. For children under 5 years old, hearing and vision difficulty are used to determine disability status. For children between the ages of 5 and 14, disability status is determined from hearing, vision, cognitive, ambulatory, and self-care difficulties. People 15 years of age and older are considered to have a disability if they have difficulty with any of the following: hearing, vision, cognitive, ambulatory, self-care difficulties, and living independently.

* A house detached is a 1-unit structure detached from any other house, that is, with open space on all four sides. A house attached is a 1-unit structure that has one or more walls extending from ground to roof separating it from adjoining structures. A house attached includes a duplex, twin home, or townhouse. An apartment is a unit in a structure containing two or more units that are not a house attached.

* Gross rent is the contract rent plus the estimated average monthly cost of utilities (electricity, gas, water, and sewer) and fuels (oil, coal, kerosene, wood, etc.) if these are paid by the renter (or paid for the renter by someone else). Gross rent is intended to eliminate differentials that result from varying practices with respect to the inclusion of utilities and fuels as part of the rental payment.
