(2) For a student who makes a request to use a privacy space other than the sex-designated privacy space that corresponds with the student's sex because of the student's gender identity, as defined in Section 34A-5-102, or reasonable fear of bullying, the local education agency, as defined in Section 53E-1-102, shall coordinate with the student's parent or legal guardian to develop a privacy plan that provides the student with:

(ii) reasonable access to a faculty or staff restroom; or

(b) if the access described in Subsection (2)(a) is unavailable, reasonable access to private use of an otherwise sex-designated privacy space through staggered scheduling or another policy provision that provides for temporary private access.

73-3-3.5, as last amended by Laws of Utah 2023, Chapter 238

Be it enacted by the Legislature of the state of Utah:

Section 1. Section 73-3-3.5 is amended to read:

73-3-3.5. Application for a change of point of diversion, place of use, or purpose of use of water in a water company made by a shareholder.

(1) As used in this section:

(a) "Shareholder" means the owner of a share of stock, or other evidence of stock ownership, that entitles the person to a proportionate share of water in a water company.

(b) "Water company" means, except as described in Subsection (1)(c), any company, operating for profit or not for profit, where a shareholder has the right to receive a proportionate share, based on that shareholder's ownership interest, of water delivered by the company.

(c) "Water company" does not include a public water supplier, as defined in Section 73-1-4.

(2)(a) A shareholder who seeks to file a change application under Section 73-3-3 to make a change to some or all of the water rights represented by the shareholder's shares in a water company shall:

(i) prepare a proposed change application on forms furnished by the state engineer; and

(ii) provide the proposed change application to the water company by personal delivery with a signed receipt, certified mail, or electronic mail with confirmation of receipt.

(b) The water company and the shareholder shall cooperate in supplying information relevant to preparation or correction of the shareholder's change application.

(c) In addition to the information required under Section 73-3-3, the proposed change application shall include:

(i) the certificate number of the stock affected by the change;

(ii) a description of the land proposed to be retired from irrigation in accordance with Section 73-3-3, if the proposed change in place or nature of use of the water involves a situation where the water was previously used for irrigation;

(iii) an agreement by the shareholder to continue to pay all applicable corporate assessments on the share affected by the change; and

(iv) any other information that the water company may reasonably need to evaluate the proposed change application.

(3)(a) The water company shall respond to the proposed change application described in Subsection (2) within[~~:~~]

[~~(i) for a permanent change application,~~] 120 days after the day on which the water company receives the proposed change application[~~; or~~].

[~~(ii) for a temporary change application, 60 days after the day on which the water company receives the proposed change application.~~]

(b) The water company's response to the proposed change application shall be in writing and shall:

(i) consent to the proposed change;

(ii) consent to the proposed change, subject to certain conditions described by the water company; or

(iii) decline to consent to the proposed change, describing the reasons for declining to consent.

(c) If the water company fails to timely respond, as described in Subsection (3)(a), the failure to respond shall be considered the water company's consent to the proposed change application and the shareholder may file the change application with the state engineer.

(4)(a) In reviewing a shareholder's proposed change application, a water company may consider:

(i) whether an increased cost to the water company or [~~its~~]the water company's shareholders results from the proposed change;

(ii) whether the proposed change will interfere with the water company's ability to manage and distribute water for the benefit of all shareholders;

(iii) whether the proposed change represents more water than the shareholder's proportionate share of the water company's right;

(iv) whether the proposed change would create preferential access to use of particular company water rights to the detriment of other shareholders;

(v) whether the proposed change will impair the quantity or quality of water delivered to other shareholders under the existing water rights of the water company, including rights to carrier water;

(vi) whether the proposed change violates a statute, ordinance, regulation, or order of a court or government agency;

(vii) if applicable, whether the shareholder has or can arrange for the beneficial use of water to be retired from irrigation within the water company's service area under the proposed change; and

(viii) the cumulative effects that the approval of the change application may have on other shareholders or water company operations.

(b) The water company may not withhold consent if any potential damage, liability, or impairment to the water company, or [~~its~~]the water company's shareholders, can be reasonably mitigated without cost to the water company.

(c) The water company may require the shareholder to pay all reasonable and necessary costs associated with the change application, but may not impose unreasonable exactions.

(5)(a) If the water company declines to consent to the proposed change application, stating its reasons, the shareholder may file an action in district court, seeking court review of the reasonableness of the conditions imposed for giving consent or the reasons stated for declining consent and a final order allowing the shareholder to file the proposed change application with the state engineer.

(b) If the water company consents to the proposed change application subject to conditions to which the shareholder does not agree, the shareholder may file the change application with the state engineer as provided in Subsection (6), without waiving the shareholder's right to contest conditions set by the water company under Subsection (3)(b)(ii).

(c) During or after the completion of the proceeding before the state engineer commenced under Subsection (6), the shareholder may file an action in district court seeking court review of the reasonableness of the conditions imposed by the water company for giving consent.

(d) In an action brought under Subsection (5)(a), (b), or (c), the court:

(i) shall refer the parties to mediation under Title 78B, Chapter 6, Part 2, Alternative Dispute Resolution Act, unless one or both parties decline mediation; and

(ii) may award costs and reasonable attorney fees to the prevailing party if mediation does not occur because the other party declined to participate in mediation.

(6) If the water company consents to the proposed change, the water company fails to respond as required by Subsection (3)(a), the court has entered an order described in Subsection (5)(a), or the water company consents to the proposed change subject to conditions to which the shareholder does not agree, as described in Subsection (5)(b), the shareholder may commence an administrative proceeding by filing the change application with the state engineer in accordance with Section 73-3-3 and this section.

(7) The shareholder shall include as part of the change application filed with the state engineer under Subsection (5)(b) or (6):

(a) the water company's response to the shareholder's proposed change application;

(b) if applicable, an affidavit signed by the shareholder documenting the water company's failure to respond in the time period described in Subsection (3)(a); or

(c) if applicable, the court order described in Subsection (5)(a).

(8)(a) The state engineer shall evaluate a shareholder's change application in the same manner used to evaluate a change application submitted under Section 73-3-3, using the criteria described in Section 73-3-8.

(b) Nothing in this section limits the authority of the state engineer in evaluating and processing a change application, including the authority to require or allow a shareholder or water company to submit additional relevant information, if the state engineer finds an absence of prejudice and allows adequate time and opportunity for the other party to respond.

(9) If the state engineer approves a shareholder's change application, the state engineer may, for shares included in the approval, require that the shareholder requesting the change be current on all water company assessments and continue to pay all reasonably applicable future assessments, with credit given to the shareholder for any cost savings to the company resulting from the change.

(10) By mutual agreement only, and when the shares will rely upon a different diversion and delivery system, the water company and the shareholder may negotiate a buyout from the water company that may include a pro rate share of the water company's existing indebtedness assignable to the shares.

(11) After an application has been approved by the state engineer, the shareholder may file requests for extensions of time to submit proof of beneficial use under the change application without further involvement of the water company.

(12) If, after a proposed change has been approved and gone into effect, a shareholder fails to substantially comply with a condition described in Subsection (9), or any condition reasonably imposed by the water company and agreed to by the shareholder, and neglects to remedy the failure after written notice from the water company that allows the shareholder a reasonable opportunity to remedy the failure, no less than 90 days after the

day on which the water company gives notice, the water company may petition the state engineer to order a reversal of the change application approval.

(13)(a) The shareholder requesting the change shall have a cause of action, including an award of actual damages incurred, against the water company if the water company:

(i) unreasonably withholds approval of a requested change;

(ii) imposes unreasonable conditions in [~~its~~]the water company's approval; or

(iii) withdraws approval of a change application in a manner other than as provided in Subsection (12).

(b) The court may award costs and reasonable attorney fees:

(i) to the shareholder if the court finds that the water company acted in bad faith when [~~it~~]the water company declined to consent to the proposed change or conditioned [~~its~~]the water company's consent on excessive exactions or unreasonable conditions; or

(ii) to the water company if [~~it~~]the court finds that the shareholder acted in bad faith in refusing to accept conditions reasonably necessary to protect other shareholders if the shareholder's change application is approved.

Section 2. Effective date.

If approved by two-thirds of all the members elected to each house, this bill takes effect upon approval by the governor, or the day following the constitutional time limit of Utah Constitution, Article VII, Section 8, without the governor's signature, or in the case of a veto, the date of veto override.

(a) In IFC, Chapter 5, a new Section 501.5, Access grade and fire flow, is added as follows: "An authority having jurisdiction over a structure built in accordance with the requirements of the International Residential Code as adopted in the State Construction Code, may require an automatic fire sprinkler system for the structure only by ordinance and only if any of the following conditions exist:

(i) the structure:

(A) is located in an urban-wildland interface area as provided in the Utah Wildland Urban Interface Code adopted as a construction code under the State Construction Code; and

(B) does not meet the requirements described in Utah Code, Subsection 65A-8-203(4)(a) and Utah Administrative Code, R652-122-1300, Minimum Standards for County Wildland Fire Ordinance;

(ii) the structure is in an area where a public water distribution system with fire hydrants does not exist as required in Utah Administrative Code, R309-550-5, Water Main Design;

(vi) Exception: A single family dwelling does not require a fire sprinkler system if the dwelling:

(A) is located outside the wildland urban interface;

(B) is built in a one-lot subdivision; and

(C) has 50 feet of defensible space on all sides that limits the propensity of fire spreading from the dwelling to another property."

The key box shall contain keys to gain necessary access as required by the fire code official. For each fire jurisdiction that has at least one building with a required key box, the fire jurisdiction shall adopt an ordinance, resolution, or other operating rule or policy that creates a process to ensure that each key to each key box is properly accounted for and secure."

(c) In IFC, Chapter 5, a new Section 507.1.1, Isolated one- and two-family dwellings, is added as follows: "Fire flow may be reduced for an isolated one- and two-family dwelling when the authority having jurisdiction over the dwelling determines that the development of a full fire-flow requirement is impractical."

"507.1.2 Pre-existing subdivision lots.

The requirements for a pre-existing subdivision lot shall not exceed the requirements described in Section 501.5."

(2) For IFC, Chapter 6, Building Services and Systems:

(a) IFC, Chapter 6, Section 604.6.1, Elevator key location, is deleted and rewritten as follows: "Firefighter service keys shall be kept in a "Supra-Stor-a-key" elevator key box or similar box with corresponding key system that is adjacent to the elevator for immediate use by the fire department. The key box shall contain one key for each elevator, one key for lobby control, and any other keys necessary for emergency service. The elevator key box shall be accessed using a 6049 numbered key."

(2) If the metals or metalliferous minerals are shipped outside the state, this constitutes a sale, and the finished metals or the recoverable units of finished metals from the metalliferous minerals shipped are subject to the severance tax. If the metals or metalliferous minerals are stockpiled, the tax is not applicable until they are sold or shipped out of state. For purposes of the tax imposed by this chapter, uranium concentrates shall be considered to be finished metals. The owner of the metals or metalliferous minerals that are stockpiled shall report to the commission annually, in a form acceptable to the commission, the amount of metalliferous minerals so stockpiled. Metals or metalliferous minerals that are stockpiled for more than two years, however, are subject to the severance tax.

(3) An annual exemption from the payment of the tax imposed by this chapter upon the first $50,000 in gross value of the metalliferous mineral is allowed to each mine.

(4) These taxes are in addition to all other taxes provided by law and are delinquent, unless otherwise deferred, on June 1 next succeeding the calendar year when the metalliferous mineral is produced and sold or delivered.

(A) a severance tax equal to 2.6% of the taxable value of Great Salt Lake elements or minerals sold or otherwise disposed of, if the Great Salt Lake elements or minerals are extracted during a calendar year when the Great Salt Lake elevation recorded pursuant to Section 65A-17-306 was at or above 4,198 feet in the prior calendar year; or

(B) a severance tax does not apply to the taxable value of Great Salt Lake elements or minerals sold

or otherwise disposed of, if those Great Salt Lake elements or minerals are sold or otherwise disposed of in a calendar year when the Great Salt Lake elevation recorded pursuant to Section 65A-17-306 was below 4,198 feet in the prior calendar year; and

Section 5. Section 59-5-203 is amended to read:

59-5-203. Determining taxable value.

(1) Except as provided in Subsection (3), the basis for computing the gross proceeds, prior to those deductions or adjustments specified in this chapter, in determining the taxable value of the metals [~~or~~], metalliferous minerals, or metalliferous compounds, as defined in Subsection 59-5-202(5), sold or otherwise disposed of, in the order of priority, is as follows:

(a) If the metals [~~or~~], metalliferous mineral products, or metalliferous compounds are actually sold, the value of those metals [~~or~~], metalliferous mineral products, or metalliferous compounds shall be the gross amount the producer receives from that sale, provided that the metals [~~or~~], metalliferous mineral products, or metalliferous compounds are sold under a bona fide contract of sale between unaffiliated parties. In the case of a sale of uranium concentrates, gross proceeds shall be the gross amount the producer receives from the sale of processed uranium concentrate or "yellowcake," provided that the uranium concentrate is sold under a bona fide contract of sale between unaffiliated parties.

(b)(i) For purposes of a Great Salt Lake extraction operator, as defined in Section 59-5-202, if metals, metalliferous minerals, or metalliferous compounds are not sold, but are otherwise disposed of, the gross proceeds shall be the multiple of the recoverable units of finished or unfinished metals, or of the finished or unfinished metals contained in the metalliferous minerals or metalliferous compounds shipped, and the average daily price per unit of contained metals as quoted by an established authority for market prices of metals for the period during which the tax imposed by this chapter is due.

(ii) The established authority or authorities under this Subsection (1)(b) shall be designated by the commission by rule adopted in accordance with Title 63G, Chapter 3, Utah Administrative Rulemaking Act.

[~~(b)~~](c)(i) If the metals [~~or~~], metalliferous mineral products, or metalliferous compounds are not actually sold but are shipped, transported, or delivered out of state, the gross proceeds shall be the multiple of the recoverable units of finished metals, or of the finished metals contained in the metalliferous minerals or metalliferous compounds shipped, and the average daily price per unit of contained metals as quoted by an established authority for market prices of metals for the period during which the tax imposed by this chapter is due.

(ii) The established authority or authorities shall be designated by the commission by rule adopted in accordance with Title 63G, Chapter 3, Utah Administrative Rulemaking Act.

[~~(c)~~](d) In the case of metals [~~or~~], metalliferous minerals, or metalliferous compounds not sold, but otherwise disposed of, for which there is no established authority for market prices of metals for the period during which the tax imposed by this chapter is due, gross proceeds is determined by allocating to the state the same proportion of the producer's total sales of metals [~~or~~], metalliferous minerals, or metalliferous compounds sold or otherwise disposed of as the producer's total Utah costs bear to the total costs associated with sale or disposal of the metal or metalliferous mineral.

[~~(d)~~](e) In the event of a sale of metals [~~or~~], metalliferous minerals, or metalliferous compounds between affiliated companies which is not a bona fide sale because the value received is not proportionate to the fair market value of the metals [~~or~~], metalliferous minerals, metalliferous compounds or in the event that Subsection [~~(1)(a), (b), or (c)~~](1)(a), (b), (c), or (d) are not applicable, the commission shall determine the value of such metals [~~or~~], metalliferous minerals, or metalliferous compounds in an equitable manner by reference to an objective standard as specified in a rule adopted in accordance with the provisions of Title 63G, Chapter 3, Utah Administrative Rulemaking Act.

(2) For all metals except beryllium, the taxable value of the metalliferous mineral sold or otherwise disposed of is 30% of the gross proceeds received for the metals sold or otherwise disposed of by the producer of the metal.

(3) Notwithstanding Subsection (1) or (4), the taxable value of beryllium sold or otherwise disposed of by the producer of the beryllium is equal to 125% of the direct mining costs incurred in mining the beryllium.

(4) Except as provided in Subsection (3), if the metalliferous mineral sold or otherwise disposed of is sold or shipped out of state in the form of ore, then the taxable value is 80% of the gross proceeds.

Section 6. Section 59-5-207 is amended to read:

59-5-207. Date tax due -- Extensions -- Installment payments -- Penalty on delinquencies -- Audit.

(1) The tax imposed by this chapter is due and payable on or before June 1 of the year next succeeding the calendar year when the mineral is produced and sold or delivered.

(2) The commission may, for good cause shown upon a written application by the taxpayer, extend the time of payment of the whole or any part of the tax for a period not to exceed six months. If an extension is granted, interest at the rate and in the manner prescribed in Section 59-1-402 shall be charged and added to the amount of the deferred payment of the tax.

(3) Every taxpayer subject to this chapter whose total tax obligation for the preceding calendar year was $3,000 or more shall pay the taxes assessed under this chapter in quarterly installments. Each installment shall be based on the estimated gross value received by the taxpayer during the quarter preceding the date on which the installment is due.

(4) The quarterly installments are due as follows:

(a) for January 1 through March 31, on or before June 1;

(b) for April 1 through June 30, on or before September 1;

(5)(a) If the taxpayer fails to report and pay any tax when due, the taxpayer is subject to the penalties provided under Section 59-1-401, unless otherwise provided in Subsection (6).

(b) An underpayment exists if less than 80% of the tax due for a quarter is paid.

(6) The penalty for failure to pay the tax due or underpayment of tax may not be assessed if the taxpayer's quarterly tax installment payment equals 25% of the tax reported and paid by the taxpayer for the preceding taxable year.

(7) There shall be no interest added to any estimated tax payments subject to a penalty under this section.

(8) The commission may conduct audits to determine whether any tax is owed under this section.

(9) For purposes of a Great Salt Lake extraction operator under Subsection 59-5-202(5), the Division of Forestry, Fire, and State Lands shall provide the commission by January 15 of each year the information required by Section 65A-17-306, that the commission shall use to determine the amount due and payable on June 1 of the year next succeeding the calendar year.

(b) However, a lease may provide for a rental credit, minimum rental, or minimum royalty upon commencement of production, as prescribed by rule.

(4) The primary term of a mineral lease may not exceed:

(a) 20 years for oil shale and tar sands; and

(b) 10 years for oil and gas and any other mineral.

(5)(a) [~~Subject~~]In addition to the requirements of Chapter 17, Part 3, Mineral or Element Extraction, and subject to the other provisions of this Subsection (5), for a mineral lease or royalty agreement involving the extraction of [~~minerals~~]Great Salt Lake elements and minerals from brines in the Great Salt Lake, the division shall ensure that the following terms, as applicable, are included:

(i) an extraction operation or extraction method shall adhere to commercially viable technologies that minimize water depletion;

[~~(ii) an extraction operation or extraction method shall mitigate for the total amount of water depleted by providing water back into the Great Salt Lake that approximates the total volume of water depleted;~~]

[~~(iii)~~](ii) a provision authorizing the division to curtail or limit Great Salt Lake element or mineral production at any time the condition of the Great Salt Lake reaches the emergency trigger, as defined in Section [~~65A-10-201~~]65A-17-101;

[~~(iv)~~](iii) a provision authorizing the division to withdraw lands, operations, extraction methods, or technologies from Great Salt Lake element or mineral production or Great Salt Lake element or mineral operations; [~~and~~]

[~~(v)~~](iv) a provision allowing the division to require an existing operator to use commercially viable, innovative technologies to minimize water depletions caused by the planned mineral extraction as a condition of continued operations[~~.~~]if the technology:

(A) has been successfully implemented on a commercial scale in similar circumstances;

(B) has been shown to be economically viable; and

(C) is reasonably compatible with the operator's overall extraction process; and

(v) a provision that provides for the reductions of the following after the primary term of a mineral lease or royalty agreement:

(A) the acreage subject to the mineral lease by the acreage the operator does not use to extract a Great Salt Lake element or mineral during the primary term of the mineral lease under conditions that do not constitute waste, as defined in Section 65A-17-101; and

(B) the volume of water that the operator may divert from the Great Salt Lake, by the volume of water that the operator does not use during the longer of the primary term of the mineral lease or seven years if the operator fails to use the volume of water for a beneficial use, except if the failure to use the volume of water is as a result of a reduction of water usage under Section 73-33-201 or is excused under Section 73-1-4.

[~~(b) If as of May 3, 2023, an operator has a mineral lease but not a royalty agreement involving the extraction of minerals from brines in the Great Salt Lake, the extraction operation or extraction method shall mitigate the total water depleted as provided in Subsection (5)(a)(ii) only to the extent that the extraction operation or extraction method increases total depletions as compared to an estimated 10-year average of depletions as estimated by the Division of Water Resources' water budget model beginning on January 1, 2013, and ending on December 31, 2022.~~]

[~~(c)~~](b) If under Subsection [~~(5)(a)(v)~~](5)(a)(iv) the division requires an existing operator to use a commercially viable, innovative technology, the division may not require use of a technology not yet proven to be commercially viable on the Great Salt Lake and may not require implementation of the technology to begin until after a reasonable period determined by the division [~~not to exceed five years~~]that is at least five years but does not exceed seven years.

(c)(i) If the volume of water that the operator may divert from the Great Salt Lake is reduced under Subsection (5)(a)(v), the division shall pursue a judicial action to declare all or a portion of the water right forfeited under Subsection 73-1-4(2).

(ii) If the division secures the reduction under this Subsection (5)(c), the division shall petition the state engineer to order a reversal of the application approval in accordance with the terms of the reduction or forfeiture of the water right.

(iii) Nothing in this Subsection (5) modifies or otherwise affects Section 73-1-4 or 73-3-30.

(6)(a) Before issuing a royalty agreement under Subsection (2)(d), the division may require an operator to engage in a feasibility assessment and may issue a royalty agreement without compliance of Subsection (5)(a) if the agreement:

(i) has a term of 12 months or less; and

(ii) limits use of brines from the Great Salt Lake to a maximum of five acre-feet during the term of the agreement.

(b) The division may make rules, in accordance with Title 63G, Chapter 3, Utah Administrative Rulemaking Act, for implementing this Subsection (6).

[~~(6)~~](7)(a) Upon nomination from a prospective operator, the division shall by rule, made in accordance with Title 63G, Chapter 3, Utah Administrative Rulemaking Act, establish a royalty rate and calculation methodology for a Great Salt Lake element or mineral that:

(i) provides for a full and fair return to the state from the production of the Great Salt Lake element or mineral;

(ii) is consistent with market royalty rates applicable to the production of the Great Salt Lake element or mineral or of the production of oil and gas;

(iii) provides a base royalty rate;

(iv) provides a reduced royalty rate from the royalty rate under Subsection [~~(6)~~](7)(a)(iii) if the royalty agreement:

(B) provides an incentive to use commercially viable, innovative technology to minimize water depletion and evaporation as determined by the division; [~~and~~]

(v) provides a reduced royalty rate from the royalty rate under Subsection (7)(a)(iii) if the prospective operator for the extraction of lithium demonstrates to the satisfaction of the division that the prospective operator has an agreement with a person who will process or manufacture a product in this state, exclusive of any primary or secondary lithium processing or manufacturing, using the lithium extracted by the prospective operator; and

[~~(v)~~](vi) subject to Subsection (7)(e), provides for a royalty rate that is based on the highest market value prevailing at the time of the sale or disposal of the following:

(A) the Great Salt Lake element or mineral; or

(B) a product the lessee produces from the Great Salt Lake element or mineral.

(b) Before entering into a royalty agreement permitting the extraction of Great Salt Lake elements or minerals, the operator shall:

(i) demonstrate the proposed operation's commercial viability;

(ii) certify before operation begins that the operator is not negatively impacting the biota or chemistry of the Great Salt Lake; and

(iii) obtain the approval of the division and the Department of Environmental Quality that the certification supports a finding that the operation

will not negatively impact the biota or chemistry of the Great Salt Lake.

(c) A new mineral lease for a Great Salt Lake element or mineral in production in the Great Salt Lake as of May 3, 2023, is subject to new royalty rates due to emergent technologies.

(d) An operator who as of July 1, 2020, had a mineral lease with the division but not a royalty agreement and who is subject to a severance tax under Subsection 59-5-202(5) shall pay a royalty under this section in addition to the severance tax.

(e) The royalty rate described in Subsection (7)(a)(vi) may not be reassessed during the primary term of an initial royalty agreement issued under this section, but may be reassessed upon the conclusion of the primary term.

[~~(7)~~](8)(a) [~~An~~]Except as provided in Subsection (8)(b), an operator who extracts a Great Salt Lake element or mineral from tailings from the production of Great Salt Lake elements or minerals from brines in the Great Salt Lake is subject to this section to the same extent as an operator producing a Great Salt Lake element or mineral from brines in the Great Salt Lake.

(b) An operator that, as of May 3, 2023, has an agreement to recover a Great Salt Lake element or mineral from existing tailings, discarded material, end-use products, or waste products produced from the evaporation and processing of Great Salt Lake brines is not subject to this section, except as to the payment of royalties set by the division under Subsection (7)(a). The division shall make rules, in accordance with Title 63G, Chapter 3, Utah Administrative Rulemaking Act, regarding the issuance and termination of a royalty agreement for mineral extraction from tailings, discarded material, end-use products, or waste products produced from the evaporation and processing of Great Salt Lake brines.

(c) An operator that, as of May 3, 2023, has an underlying agreement to recover a Great Salt Lake element or mineral shall obtain an additional agreement for any additional Great Salt Lake element or mineral produced from the tailings, discarded material, end-use products, or waste products newly produced under the underlying agreement. The additional agreement is subject to this section.

[~~(8)~~](9) The division shall annually report to the Natural Resources, Agriculture, and Environmental Quality Appropriations Subcommittee regarding the amount of money collected under this section from royalties provided for in Subsection [~~(6)~~](7).

[~~(9)~~](10)(a) In the issuance of royalty agreements for the extraction of lithium from the Great Salt Lake, the division shall prioritize applicants that[~~:~~]

[~~(a)~~] do not use evaporative concentration of Great Salt Lake brines in any stage of the extractive process[~~; and~~]

[~~(b) use commercially viable extractive processes~~].

(b) The division may make rules, in accordance with Title 63G, Chapter 3, Utah Administrative Rulemaking Act, creating a process for implementing this Subsection (10).

[~~(10)~~](11) Except in relationship to mineral leases related to the Great Salt Lake, the division shall make rules regarding the continuation of a mineral lease after the primary term has expired, which shall provide that a mineral lease shall continue so long as:

(a) the mineral covered by the lease is being produced in paying quantities from:

(i) the leased premises;

(ii) lands pooled, communitized, or unitized with the leased premises; or

(iii) lands constituting an approved mining or drilling unit with respect to the leased premises; or

(b)(i) the lessee is engaged in diligent operations, exploration, research, or development which is reasonably calculated to advance development or production of the mineral covered by the lease from:

(A) the leased premises;

(B) lands pooled, communitized, or unitized with the leased premises; or

(C) lands constituting an approved mining or drilling unit with respect to the leased premises; and

(ii) the lessee pays a minimum royalty.

[~~(11)~~](12) For the purposes of Subsection [~~(10)~~](11), diligent operations with respect to oil, gas, and other hydrocarbon leases may include cessation of operations not in excess of 90 days in duration.

[~~(12)~~](13)(a) The division shall study and analyze each mineral lease and mineral royalty agreement issued on the Great Salt Lake and compare and evaluate whether the mineral leases and royalty agreements are representative of current market conditions. As part of this study, the division shall:

(i) make the following determinations for mineral leases:

(A) whether the entire surface area described within the mineral lease is being used; and

(B) whether the annual lease payments are representative of current market conditions; and

(ii) for royalty agreements, perform studies and comparative analyses to determine whether the state is receiving royalty rates consistent with current market conditions.

(b) By no later than the 2023 November interim meeting, the division shall report the division's findings of the study required by this Subsection [~~(12)~~](13) to the Natural Resources, Agriculture, and Environment Interim Committee.

(14) The division may make rules, in accordance with Title 63G, Chapter 3, Utah Administrative Rulemaking Act, for implementing this section.

(15) The provisions in this section related to extraction of a Great Salt Lake element or mineral under a mineral lease or royalty agreement apply to a mineral lease or royalty agreement in effect on May 1, 2024, and any mineral lease or royalty agreement entered into after May 1, 2024.

~~65A-10-205.~~ **65A-17-203. Force majeure.**

(1) For purposes of managing the Great Salt Lake, the division may treat the fact that the Great Salt Lake has reached the emergency trigger as a triggering event for the purposes of invoking a force majeure provision in a contract, mineral lease, or royalty agreement.

(2) In addition to the standard mechanisms whereby performance is excused by invocation of a force majeure provision, the division shall include language in a contract, mineral lease, or royalty agreement whereby the division may curtail or prohibit mineral or element production that results in a net depletion of water.

(3) The division shall allow an operator to continue processing brines that have already been extracted from the Great Salt Lake that are residing in the operator's process, and selling products derived from brines that have already been extracted at the time the force majeure is invoked.

(4) The division shall include standard mechanisms to promptly waive force majeure once salinity conditions improve by declining below the emergency trigger threshold.

(5) If the division invokes a force majeure provision in a contract, mineral lease, or royalty agreement, the effected operator is relieved from performance of any contractual provision requiring production to hold the contract, mineral lease, or royalty agreement for a maximum of two years. If the conditions creating the emergency trigger persist beyond a two-year period, the division shall terminate the contract, mineral lease, or royalty agreement and require the operator to engage in new contractual agreements whereby the operator represents and warrants that future operations will not amount to a net depletion of water.

Section 17. Section 65A-17-301 is enacted to read:

65A-17-301. General royalty agreement provisions -- State action regarding evaporation ponds and leaseholds.

Part 3. Mineral or Element Extraction

(b) obligates the lessee to extract minerals or elements in a manner that avoids negative impacts to any natural resources of the Great Salt Lake;

(c) contains terms and conditions wherein the lessee agrees to extract minerals or elements in a manner that preserves and conserves ecological integrity and healthy salinity levels; and

(d) contains terms and conditions wherein the lessee represents and warrants full compliance, at the lessee's sole expense, with the management decisions and instructions of the division and director for preservation of minerals or elements and natural resources of the Great Salt Lake.

(2)(a) The division may acquire the property interest in land or a mineral estate for a solar evaporation pond on sovereign lands and an improvement, property, easement, or right-of-way appurtenant to the solar evaporation pond by any lawful means, including eminent domain, as described in Sections 78B-6-501 and 78B-6-502.

(b) The division may not implement this Subsection (2) to acquire a property interest in land or a mineral estate that is not in or on sovereign land.

(c) The division may not implement this Subsection (2) on property interests in land or mineral estates held by an operator who, in an agreement with the division, has relinquished property interests in land or mineral estates.

(d) Only the division may implement this Subsection (2).

Section 18. Section 65A-17-302 is enacted to read:

65A-17-302. Minerals or elements extracted from the Great Salt Lake subject to royalty rate.

(1) An operator who removes or extracts a mineral or element from the Great Salt Lake and does not return the mineral or element to the Great Salt Lake shall compensate the division for the value of the mineral or element at the royalty rate established by the division by rule made in accordance with Title 63G, Chapter 3, Utah Administrative Rulemaking Act, if a royalty rate has been established, except that this Subsection (1) only applies to the extent that the mineral or element:

(a) has been nominated under Subsection 65A-6-4(7)(a) or for which the division has established a royalty rate in rule; and

(b) can be extracted in paying quantities through a commercially viable technology after a reasonable period determined by the division, that is at least five years but does not exceed seven years, from the day on which the division determines that the technology is a commercially viable technology.

(2)(a) The division shall require an operator that removes or extracts a mineral or element from the Great Salt Lake to annually certify to the division by no later than May 1 whether the operator is in compliance with Subsection (1). The certification by the operator shall:

(i) state the operator's name;

(ii) list the amount of each mineral or element that the operator has removed or extracted from the Great Salt Lake in the previous calendar year; and

(iii) include other information as determined by the division by rule made in accordance with Title 63G, Chapter 3, Utah Administrative Rulemaking Act.

(b) The operator shall submit the certificate on a form provided by the division.

(iii) protect correlative rights of owners having rights to a common source of supply and the division's duty to manage public trust assets; and

(iv) encourage new and emergent technologies to protect the Great Salt Lake's overall ecological integrity while ensuring the greatest possible recovery for operators and the state.

(b) The division may make rules, in accordance with Title 63G, Chapter 3, Administrative Rulemaking Act, to implement Subsection (1)(a) and any related defined terms in Section 65A-17-101.

(c) An operator shall conduct operations to comply with the rules made under Subsection (1)(b) and other rules made in accordance with Title 63G, Chapter 3, Utah Administrative Rulemaking Act:

(i) governing individual operations; and

(ii) made for the multiple mineral development area.

(2)(a) As a condition of the division issuing a lease or royalty agreement on or after May 1, 2024, and of continued operations, the division shall require an operator to enter into and maintain a cooperative agreement with the persons with correlative rights in a common source of supply for a mineral or element in the Great Salt Lake.

(b) After submitting an application with the division to obtain a lease or royalty agreement, a person shall:

(i) obtain a list from the division of all operators existing at the time of application; and

(ii) notify each operator on the list of the person's intention to enter into a cooperative agreement.

(c) A cooperative agreement shall meet the requirements of Subsection 65A-17-304(1), shall provide that the rights and obligations contained in the cooperative agreement are subject to the division's duty to manage public trust assets, and shall address:

(i) how the operators may conduct concurrent or simultaneous operations without unreasonably interfering with existing and separate operations while also preventing undue waste;

(ii) recognition of other operator's vested mineral or element interests so that operations may be conducted in a manner that will result in the maximum recovery of minerals or elements with the minimum adverse effect on the ultimate maximum recovery of other minerals or elements;

(iii) terms and conditions for establishing a mitigation plan for when one operator, either intentionally or unintentionally, interferes with or damages the mineral or element rights or mineral or element interests of another operator;

(iv) terms and conditions for establishing a mitigation plan with the division that would limit unreasonable mineral estate interference, waste, or negative impacts to natural resources of the Great Salt Lake;

(v) the protection of natural resources of the Great Salt Lake without unnecessary cost to the operations of another operator, unless there is compensation for increased operational costs;

(vi) the coordination and locations of access to operations;

(vii) any assessment of costs resulting from concurrent operations within the Great Salt Lake;

(viii) the mitigation of surface impacts, including:

(A) the location of a mineral or element extraction intake or discharge facility;

(B) phased or coordinated surface occupancy to each operator to access and develop the operator's respective mineral or element estate or mineral or element interest with the least disruption of operations and damage to Great Salt Lake elements or minerals, as defined in Section 65A-6-4, or

natural resources directly, indirectly, or through waste; and

(C) limitations of mineral or element operations in areas where impacts to correlative rights or to natural resources of the Great Salt Lake are significant or most acute, as determined by the operators or the division;

(ix) the scope and extent of how geological, engineering, product, and water use data is disclosed or exchanged;

(x) how any joint reclamation obligation or plan is to be achieved or coordinated;

(xi) how bonding will be obtained and coordinated on any lands impacted, disturbed, or developed in relation to mineral or element extraction and processing activities;

(xii) terms and conditions indemnifying the state, the division, and any of the state's or division's directors, officers, agents, or employees from any and all damage or liability of any kind resulting from any stage or mineral or element extraction operations or any stage of mineral or element processing;

(xiii) terms and conditions for the full compliance with a royalty rate reduction to which an operator is entitled;

(xiv) a schedule of how the operators plan to collectively curtail production if the emergency trigger is reached and a curtailment of production is required; and

(xv) any other term or condition outlining cooperative efforts consistent with the multiple mineral development area and plans or rules of the division, made in accordance with Title 63G, Chapter 3, Utah Administrative Rulemaking Act.

(d) The parties to a cooperative agreement described in Subsection (2)(a) shall present the cooperative agreement to the division and the director may approve the agreement if the cooperative agreement:

(i) is in the public interest;

(ii) prevents waste of minerals or elements;

(iii) protects the correlative rights of each owner; and

(iv) meets the requirements of Subsection 65A-17-304(1).

(e) On the director's approval of the cooperative agreement, the division becomes a signator to the cooperative agreement.

(f) A cooperative agreement described in this Subsection (2) may not be held or construed to violate a statute relating to trusts, monopolies, or contracts and combinations in restraint of trade, if the agreement is approved by the director.

(g) The failure to submit an agreement to the division for approval may not for that reason imply or constitute evidence that the agreement or operations conducted pursuant to the agreement are in violation of laws relating to trusts, monopolies, or restraint of trade.

(h)(i) An operator may not unreasonably delay, condition, or decline to enter into a cooperative agreement.

(ii) A negotiation period of 60 days from the date notice is given under Subsection (2)(b)(ii) is presumed to be reasonable.

Section 20. Section 65A-17-304 is enacted to read:

65A-17-304. Concurrent operations -- Breach, disagreement, or conflict -- Disputes.

(1) Two or more operators may conduct concurrent operations on the Great Salt Lake under a cooperative agreement upon stipulation and agreement that the operations can be:

(a) conducted simultaneously without unreasonably interfering with the value of the resources being produced;

(b) conducted simultaneously without unreasonably interfering with natural resources of the Great Salt Lake; and

(c) conducted without unreasonably interfering with, or unnecessarily raising the cost of operations of another operator, unless the other affected operator is compensated for increased costs or diminished returns.

(2) The division shall make rules, in accordance with Title 63G, Chapter 3, Utah Administrative Rulemaking Act, providing for the procedures the division and operators shall follow to:

(a) enable the division to enforce applicable statutes and rules on operators, including the issuance of notices of violation or cessation orders;

(b) assist in the timely resolution of disputes that may arise during the formation of a cooperative agreement;

(c) cure a breach of a mitigation plan; or

(d) resolve a continued disagreement or conflict regarding continued negative impacts to biota or chemistry due to continuing concurrent operations.

(3) If any dispute between operators under Subsection (2) has not been resolved through an informal administrative dispute resolution process created by the division, the division shall resolve the dispute by a final record of decision to be issued no more than 30 days after notice to the division by an aggrieved operator that informal dispute resolution has been unsuccessful.

Section 21. Section 65A-17-305 is enacted to read:

65A-17-305. Waste.

An operator is considered to not waste a mineral or element if the operator implements a commercially viable technology to extract the mineral or element after a reasonable period determined by the division, that is at least five years but does not exceed seven years, from the day on which the division determines that the technology is a commercially viable technology.

Section 22. Section 65A-17-306 is enacted to read:

65A-17-306. Certification of eligibility for tax rates.

(1) As used in this section:

(b) The Great Salt Lake extraction operator shall certify the following for the calendar year ending on the date the Great Salt Lake extraction operator submits the certification for purposes of determining a severance tax imposed during the next succeeding calendar year:

(i) the Great Salt Lake extraction operator's name;

(ii) the Great Salt Lake extraction operator's tax identification number;

(iii) whether at the time a Great Salt Lake element or mineral is extracted, the Great Salt Lake extraction operator is a party or a third-party beneficiary to a voluntary agreement for water rights with an approved beneficial use by a division as defined in Section 73-3-30;

(iv) if the Great Salt Lake extraction operator is not a party or third-party beneficiary to a voluntary agreement for water rights with an approved beneficial use by a division as defined in Section 73-3-30, whether the Great Salt Lake extraction operator uses evaporative concentrations of Great Salt Lake brines in any stage of the Great Salt Lake extraction operator's extractive process;

(v) whether the Great Salt Lake extraction operator extracted a Great Salt Lake element or mineral when the Great Salt Lake elevation recorded under Subsection (3) is at or above 4,198 feet, and what the Great Salt Lake element or mineral extracted was; and

Section 23. Section 73-3-8 is amended to read:

73-3-8. Approval or rejection of application -- Requirements for approval -- Application for specified period of time -- Filing of royalty contract for removal of salt or minerals -- Request for agency action.

(1)(a) It shall be the duty of the state engineer to approve an application if there is reason to believe that:

(i) for an application to appropriate, there is unappropriated water in the proposed source;

(ii) the proposed use will not impair existing rights or interfere with the more beneficial use of the water;

(iii) the proposed plan:

(A) is physically and economically feasible, unless the application is filed by the United States Bureau of Reclamation; and

(B) would not prove detrimental to the public welfare;

(iv) the applicant has the financial ability to complete the proposed works;

(v) the application was filed in good faith and not for purposes of speculation or monopoly; and

(vi) if applicable, the application complies with a groundwater management plan adopted under Section 73-5-15.

(b) If the state engineer, because of information in the state engineer's possession obtained either by the state engineer's own investigation or otherwise, has reason to believe that an application will interfere with the water's more beneficial use for irrigation, municipal and industrial, domestic or culinary, stock watering, power or mining development, or manufacturing, or will unreasonably affect public recreation or the natural stream environment, or will prove detrimental to the public welfare, the state engineer shall withhold approval or rejection of the application until the state engineer has investigated the matter.

(c) If an application does not meet the requirements of this section, it shall be rejected.

(2)(a) An application to appropriate water for industrial, power, mining development, manufacturing purposes, agriculture, or municipal purposes may be approved for a specific and certain period from the time the water is placed to beneficial use under the application, but in no event may an application be granted for a period of time less than that ordinarily needed to satisfy the essential and primary purpose of the application or until the water is no longer available as determined by the state engineer.

(b) At the expiration of the period fixed by the state engineer the water shall revert to the public and is subject to appropriation as provided by this title.

(c) No later than 60 calendar days before the expiration date of the fixed time period, the state engineer shall send notice by mail or by any form of electronic communication through which receipt is verifiable, to the applicant of record.

(d) Except as provided by Subsection (2)(e), the state engineer may extend any limited water right upon a showing that:

(i) the essential purpose of the original application has not been satisfied;

(ii) the need for an extension is not the result of any default or neglect by the applicant; and

(iii) the water is still available.

(e) An extension may not exceed the time necessary to satisfy the primary purpose of the original application.

(f) A request for extension of the fixed time period must be filed in writing in the office of the state engineer on or before the expiration date of the application.

(3)(a) Before the approval of any application [~~for the appropriation of~~]to divert water from navigable lakes or streams of the state that contemplates the recovery of salts and other minerals or elements, as defined in Section 65A-17-101, therefrom by precipitation or otherwise, the applicant shall file with the state engineer a copy of:

(i) a contract for the payment of royalties to the state[~~.~~]; and

(4)(a) The state engineer shall investigate all temporary change applications.

(b) The state engineer shall:

(i) approve the temporary change if the state engineer finds there is reason to believe that the temporary change will not impair an existing right; and

(ii) deny the temporary change if the state engineer finds there is reason to believe the temporary change would impair an existing right.

(5)(a) With respect to a change application for a permanent or fixed time change:

(i) the state engineer shall follow the same procedures provided in this title for approving an application to appropriate water; and

(ii) the rights and duties of a change applicant are the same as the rights and duties of a person who applies to appropriate water under this title.

(b) The state engineer may waive notice for a permanent or fixed time change application if the application only involves a change in point of diversion of 660 feet or less.

(c) The state engineer may condition approval of a change application to prevent an enlargement of the quantity of water depleted by the nature of the proposed use when compared with the nature of the currently approved use of water proposed to be changed.

(d) A condition described in Subsection (5)(c) may not include a reduction in the currently approved diversion rate of water under the water right identified in the change application solely to account for the difference in depletion under the nature of the proposed use when compared with the nature of the currently approved use.

(6)(a) Except as provided in Subsection (6)(b), the state engineer shall reject a permanent or fixed time change application if the person proposing to make the change is unable to meet the burden described in Subsection 73-3-3(5).

(b) If otherwise proper, the state engineer may approve a change application upon one or more of the following conditions:

(i) for part of the water involved;

(ii) that the applicant acquire a conflicting right; or

(iii) that the applicant provide and implement a plan approved by the state engineer to mitigate impairment of an existing right.

(c)(i) There is a rebuttable presumption of quantity impairment, as defined in Section 73-3-3, to the extent that, for a period of at least seven consecutive years, a portion of the right identified in a change application has not been:

(A) diverted from the approved point of diversion; or

(B) beneficially used at the approved place of use.

(ii) The rebuttable presumption described in Subsection (6)(c)(i) does not apply if the beneficial use requirement is excused by:

(A) Subsection 73-1-4(2)(e);

(B) an approved nonuse application under Subsection 73-1-4(2)(b);

(C) Subsection 73-3-30(7); or

(D) the passage of time under Subsection 73-1-4(2)(c)(i).

(d) The state engineer may not consider quantity impairment based on the conditions described in Subsection (6)(c) unless the issue is raised in a:

(i) timely protest that identifies which of the protestant's existing rights the protestant reasonably believes will experience quantity impairment; or

(ii) written notice provided by the state engineer to the applicant within 90 days after the change application is filed.

(e) The written notice described in Subsection (6)(d)(ii) shall:

(i) specifically identify an existing right the state engineer reasonably believes may experience quantity impairment; and

(ii) be mailed to the owner of an identified right, as shown by the state engineer's records, if the owner has not protested the change application.

(f) The state engineer is not required to include all rights the state engineer believes may be impaired by the proposed change in the written notice described in Subsection (6)(d)(ii).

(g) The owner of a right who receives the written notice described in Subsection (6)(d)(ii) may not become a party to the administrative proceeding if the owner has not filed a timely protest.

(h) If a change applicant, the protestants, and the persons identified by the state engineer under Subsection (6)(d)(ii) come to a written agreement regarding how the issue of quantity impairment shall be mitigated, the state engineer may incorporate the terms of the agreement into a change application approval.

Section 24. Section 73-32-204 is amended to read:

[~~(b)~~](d) "Electrical generation facility" means a facility that generates electricity for provision to customers.

[~~(c)~~](e) "Forced retirement" means the closure of an electrical generation facility as a result of a federal regulation that either directly mandates the closure of an electrical generation facility or where the costs of compliance are so high as to effectively force the closure of an electrical generation facility.

(f) "Nameplate capacity" means the sum of the maximum rated outputs of all electrical generating equipment within a facility under specific conditions designated by the manufacturer, as indicated on individual nameplates physically attached to the equipment.

(g) "Plant factor" means the ratio of the actual annual electrical energy output of an electrical generation facility compared to the potential annual electrical energy output if the electrical generation facility operated at full capacity continuously for the entire year.

[~~(d)~~](h) "Qualified utility" means the same as that term is defined in Section 54-17-801.

(c) the early retirement of an electrical generation facility that provides affordable, reliable, dispatchable, and secure energy is a threat to the health, safety, and welfare of the state's citizens;

(d) the state's police powers, reserved to the state by the United States Constitution, provide the state with sovereign authority to make and enforce laws for the protection of the health, safety, and welfare of the state's citizens;

(f) the state's sovereign authority with respect to the retirement of an electrical generation facility for the protection of the health, safety, and welfare of the state's citizens is primary and takes precedence over any attempt from an external regulatory body to mandate, restrict, or influence the early retirement of an electrical generation facility in the state.

(3) A qualified utility that receives notice of any federal regulation that may result in the forced retirement of the qualified utility's electrical generation facility shall inform the Office of the Attorney General of the regulation within 30 days after the receipt of notice.

(4) After being informed as described in Subsection (3), the Office of the Attorney General may take any action necessary to defend the interest of the state with respect to electricity generation by the qualified utility, including filing an action in court or participating in administrative proceedings.

(5) Before authorizing or approving a rate case, integrated resource plan, or other submission that proposes the early retirement of an electrical generation facility, the commission shall:

(a) consider the Legislature's findings in Subsection (2);

(b) determine, based on clear and convincing evidence, that the early retirement of an electrical generation facility will not:

(i) create a material adverse effect on the provision of affordable, reliable, dispatchable, and secure electricity to customers in the state;

(ii) create or exacerbate an existing shortage of available electricity to customers in the state;

(iii) harm the qualified utility's ratepayers by causing the qualified utility to incur any net incremental costs to be recovered from ratepayers that could be avoided by continuing to operate the electric generating unit proposed for retirement in compliance with applicable law; and

(iv) be undertaken as a result of any financial incentives or benefits for closure related costs offered by any federal agency;

(c) determine whether the utility has proven a commitment and capability to have a replacement plan operational before retiring the existing facility; and

(d) in making the determination under Subsection (b), consider the following characteristics:

(iii) reliability;

(iv) dispatchability;

(v) affordability; and

(vi) the minimum reserve capacity requirement established by the utility's reliability coordinator.

(6) The commission shall prepare and submit an annual report to the Public Utilities, Energy, and Technology Interim Committee before November 30 of each year detailing:

(a) the number of received requests to retire electric generating units in the state, including:

(i) the nameplate capacity of each of those units; and

(ii) whether the request was approved or denied by the commission;

(b) the impact of any commission- approved retirement of an electric generating unit on the:

(ii) required capacity reserve margins for the qualified utility;

(iii) need for capacity additions or expansions at new or existing facilities as a result of the retirement; and

(iv) need for additional purchase power or capacity reserve arrangements; and

(c) whether a retirement resulted in stranded costs for the ratepayer that will be recovered by the utility through a surcharge or some other separate charge on the customer bill.

(b) The Legislature further acknowledges that the primary responsibility for the education of children within the state resides with their parents and that the role of state and local governments is to support and assist parents in fulfilling that responsibility.

(i) quality teaching is the basic building block of successful schools and, outside of home and family circumstances, the essential component of student achievement;

(b) In providing for the safe and effective performance of the function of educating Utah's children, the Legislature further finds it to be of critical importance that education, including instruction, administrative, and supervisory services, be recognized as a profession, and that those who are licensed or seek to become licensed and to serve as educators:
