The Utah State Legislature website has been nationally recognized since its inception in 1998 for 1) information access, 2) easy navigation, and 3) simplicity in design. To keep up to date with ever changing technology in addition to the technological savvy of citizens and how information is provided, we are constantly reevaluating our site and adding new features. Some helpful features are listed below.

The blue box at the top of the home page allows you to easily search **by keyword** for:
- **bills** (including session years);
- *Utah Code* sections (enter keyword, click on **Site**, then select *Utah Code*); and
- **all content** (including committee materials) posted on the entire site from 1990-current.

Frequently used information marked by three large tabs below the blue search box:
- **Interim or Session** with Featured items, Scheduled activities, and **Now** (live activity);
- **Audio ● Video** with all streaming, live and archived, for sessions and committees; and
- **Calendar** in week or month views with color coded proceedings and links to all the information.

Bill Tracking is generated by RSS and allows you to keep up with the status of any bill.

Bill pages feature sponsor photos with links to biographical information, links to all versions of each bill, links to similar bills, and an option to print in pdf. At the top of the bill pages, the tab labeled “Status” provides votes in committee and on the floor and a WebWatch subscription, and the “Streaming” tab provides live streaming.
You can link to committee audio, agendas, or committee page from each committee posted to the calendar. You can view one week or view the entire month, using the color key for past, current and future meetings. The Significant Session Dates (upper left corner in small print) is also available from the calendar page.
