SUMMARY

The Construction Program enables the Department to manage the projects from the design stage through their completion without switching back and forth between line items for accounting and tracking purposes. The functions of this line item are separated as programs within the line item as Rehabilitation / Preservation, Federal Construction-New, and State Construction-New.

ISSUES AND RECOMMENDATIONS

The base budget for the Construction Management Division of the Department of Transportation line item for FY 2007 is $182,051,900. This includes funding for three programs within the line item, including Rehabilitation / Preservation, Federal Construction-New, and State Construction-New.

Rehabilitation/Preservation

The Rehabilitation/Preservation program is one of the largest recommended appropriations of any program at the Department of Transportation. Over $52 million will be available for highway rehabilitation projects based on Utah Code Section 72-2-106 UCA, which states that two/elevens of the taxes collected from the motor fuel tax and the special fuel tax, exclusive of the formula amount appropriated to the Class B and C Road Account will be used for highway rehabilitation. The actual amount available will depend upon the total collection of motor fuel and special fuel taxes collected during the fiscal year. The balance of funding for the Rehabilitation/Preservation Program is $68,665,200 from Federal Funds.

Some of the major activities in the Rehabilitation/Preservation budget are the traffic control program, the betterment program, and the reconstruction program.

Total program base budget funding for this program is $120,299,800.

Federal Construction-New

The Federal Construction-New portion of the Construction budget includes funds for the interstate system and other federally sponsored highways. The interstate highway network in Utah is part of the 42,500 mile National System of Interstate and Defense Highways.

During recent years, the Utah Department of Transportation has seen the reconstruction and capacity increasing projects on the federal system as a high priority use for this program.

The base budget for FY 2007 for this program is $60,227,500.

State Construction-New
The State Construction-New program is responsible for the construction of state highway projects that have prioritized importance as necessary highways but might not be eligible for federal funding. An example of projects that are considered in the State Construction-New budget is the Bangerter Highway.

The FY 2007 base budget recommendation for State Construction-New is $1,524,600.
