# UCAT ENROLLMENT HISTORY

ISSUE BRIEF

## **SUMMARY**

An input measure of higher education is the number of students who enroll at an institution. This Issue Brief provides information showing enrollment growth at UCAT campuses since UCAT became part of Higher Education.

## **DISCUSSION AND ANALYSIS**

The following table provides a historical perspective of the two types of students who enroll at UCAT campuses. The blue line in each figure measures the number of membership hours generated by high school students. The red line depicts the number of membership hours earned by post-secondary or adult students.

In FY 2002, adult students earned almost 2.9 million membership hours, while high school students earned 2.1 million hours. Through FY 2005, total membership hours have hovered around 5 million. For the next four years, the number of membership hours earned by high school students stayed fairly constant at about 1.9 million. During that same time, the number of adult hours increased from 3.3 million hours to 4.1 million hours. In FY 2010, UCAT saw the number of hours earned by high school students decrease by nearly 250,000, while the adult hours increased by 627,000 hours. This trend toward more hours earned by adults and fewer hours earned by high school students can be seen in the graph with the spread between the blue and red lines becoming greater in the last few years.
