

The Social Services Appropriations Subcommittee changes the Monthly Family Fee in the Baby Watch Early Intervention Program on page four of the Issue Brief entitled “Health Department Fees” (available at <http://le.utah.gov/interim/2013/pdf/00000981.pdf>) from \$100 to \$200.

Information only: This allows the Baby Watch Early Intervention Program to charge higher income parents up to \$200 per month for the services that they receive. For example, for a family four the minimum monthly income is \$13,700 for this level of fees.
