

Healthy Utah Principles and Strategies

Update on CMS Discussions

August 28, 2014

Promote Individual Responsibility

- Charge premiums for higher income adults
- Charge all adults co-pays (including higher co-pays for adults with higher incomes)
- Offer higher income adults the option to choose between two plans (one with higher premiums and lower co-pays and another with lower premiums and higher co-pays)
- Offer incentives for healthy behaviors
- Require work effort or participation in employment training

Support Private Markets

- Use employer-sponsored insurance when available
- Provide assistance to buy private market plans

Maximize Flexibility

- Use federal savings from Utah's current waiver to support new quality improvement efforts
- Allow Medicaid children to join parents on private plans
- Establish three year pilot program that allows the state to evaluate the effectiveness of Healthy Utah

Respect the Taxpayer

- Recoup some of the ACA taxes that Utahns are already paying
- Terminate plan if federal funding fails to be provided as promised
