

Welcome to UEN

# We network for education

The Utah Education Network was established over twenty years ago by the Utah State Legislature to coordinate telecommunications technology for public and higher education. UEN is one of Utah's greatest assets and has become one of the nation's premier research and education networks.

UEN infrastructure serves public education, higher education, applied technology, libraries, government, and other public entities in three main categories:

- Networking Services – Building and maintaining the statewide broadband network through a public/private partnership with local telecommunications companies.
- Application Services – Providing educators, students, and residents throughout the state with valuable online tools; such as interactive video conferencing, library databases, statewide licensed software, and online instructional tools.
- Support Services – Training, technology support, trouble-shooting, filtering, security, and consultation throughout the state.

We pride ourselves on working hard to build partnerships and find efficiencies that stretch every dollar to benefit the citizens we serve. Whether it be in a kindergarten classroom, a college research lab, or a local community library, we provide fast, reliable broadband service and quality resources, serving a vital role in anticipating and meeting the educational needs of our state.

Now, more than ever, UEN is a critical component in Utah's plan to have 66% of our adults earn a college degree or certificate by 2020. With continued support we will aid our partners in reaching this goal, which will empower individuals and bolster the Utah economy now and for decades to come.

A handwritten signature in black ink, appearing to read 'Ray Timothy, PhD', is positioned above the name and title of the signatory.

Ray Timothy, PhD

*CEO and Executive Director  
Utah Education Telehealth Network*

# UEN serves education customers all over Utah

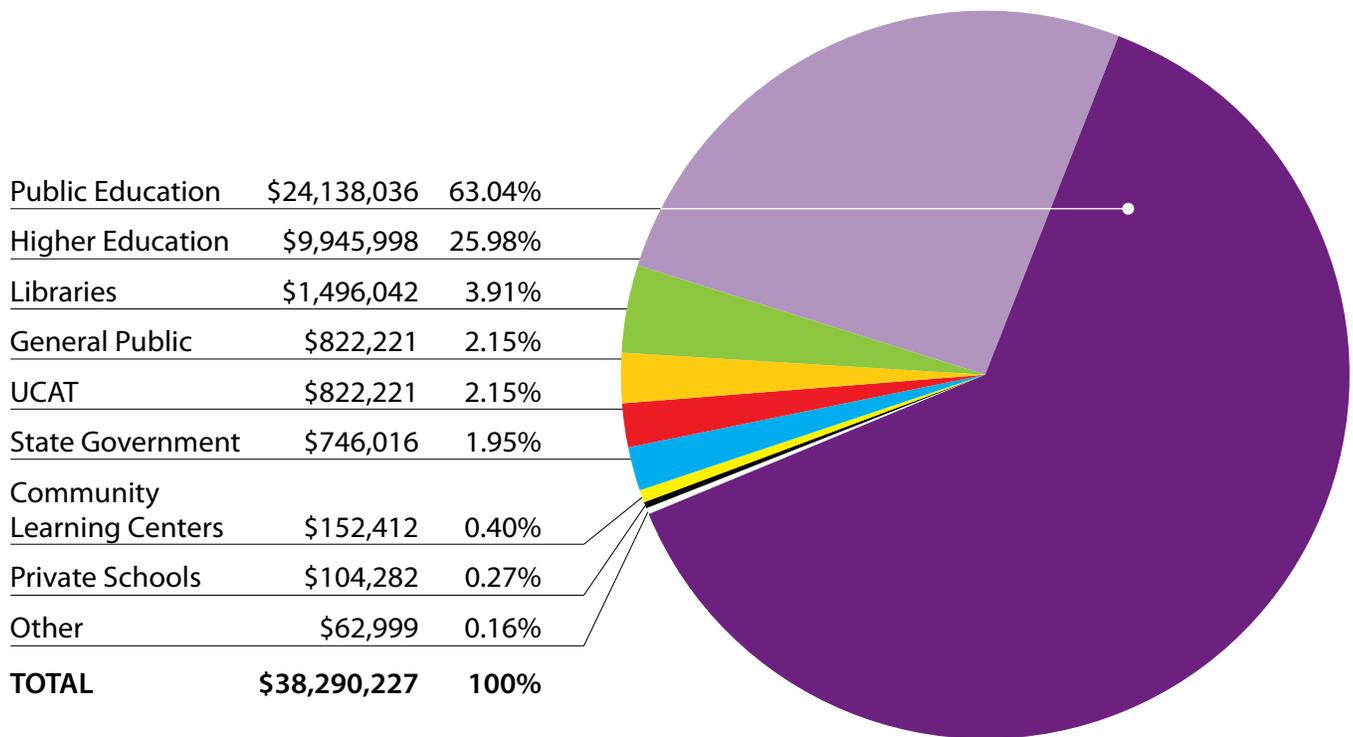

UEN services match the priorities and objectives of the institutions we serve.

\*connected directly to the UEN backbone or via DTS

The route to **66% by 2020** relies on UEN's network, applications, and support infrastructure.

# UEN Budget by customer

*Estimates as of June 30, 2014 - FY2014*

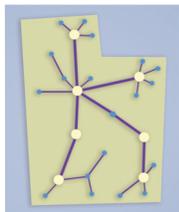

# How do we serve them?

UEN infrastructure services include three core areas: *Networking Services*, *Application Services*, and *Support Services*; while *Operational Services* account for our business functions. These are integral to UEN's mission of networking for education.

## 1. Networking Services

Networking Services extend and maintain UEN's wide area broadband and digital TV networks. Students, parents, educators and local communities all benefit from these services.

**WIDE AREA NETWORK (WAN)** – The Network infrastructure carries high speed data and real-time applications including video to communities throughout the state. UEN connects a majority of schools at 100 Mbps and many at 1 Gbps. Network engineers and staff research, design, build, monitor and contract with

multiple Utah service providers across the state. This public/private partnership benefits businesses and homeowners who gain increased bandwidth because UEN is the anchor tenant on their local network.

**INTERNET ACCESS** – UEN manages a large network used by research institutions in Utah to support the state's science and economic development goals. It also provides the capacity for more than 40 Gbps of Internet traffic from several Internet Service Providers (ISPs) to and from Utah schools, colleges and libraries. The Network saves Utah institutions thousands of dollars per month by purchasing Internet access in bulk from multiple competing ISPs.

**NETWORK SUPPORT AND SECURITY MONITORING** Network Support continuously tracks, reports and manages Internet, data, and video traffic on UEN's Wide Area Network (WAN). Network security detects attacks on the Network, identifies miscreant tools and trends, and mitigates infrastructure vulnerabilities. UEN provides in-depth leadership in security training and works in partnership with national and global security organizations to avert large threats and incidents. The UEN Network Operations Center (NOC) provides Second Tier help desk functions with UEN's real-time trouble ticket system for problem resolution.

**BROADCAST** – UEN-TV broadcasts three TV channels through a digital transmitter and statewide translator system: UEN-TV 9.1 provides educational programming to public education, higher education and the general

public; MHz Worldview 9.2 carries international news and cultural programs; and UEN's First Nations Experience (FNX) Channel 9.3 carries Native American and Indigenous programming statewide.

**INTERNET FILTERING** – UEN operates content-control software and hardware on behalf of Utah K-12 public schools, charter schools and public libraries to limit child exposure to harmful content such as violence and pornography. In addition to protecting children, this enables Utah schools and libraries to meet requirements of the Children's Internet Protection Act (CIPA) and maintain eligibility to receive E-Rate funding.

## 2. Application Services

Working with stakeholders, UEN licenses or develops multiple applications that meet higher education

and public education needs. This optimizes cost efficiencies through shared support, infrastructure and procurement processes.

**INTERACTIVE VIDEO CONFERENCING (IVC)** – UEN IVC is Utah's high quality, high definition, Interactive Video Conferencing system for public education, higher education and many state government offices. Thousands of students and educators use the UEN IVC system every day for live, instructor led courses, collaborative meetings and special educational events. This alternative to in-person instruction and meetings has the ability to connect over 1100 locations throughout Utah, as well as many locations around the globe. In addition to more than 350 daily educational events, UEN IVC also incorporates a robust desktop video conferencing option allowing hundreds of administrators to collaborate and meet from almost anywhere. UEN IVC is a highly effective service that saves time, money and energy.

**LEARNING MANAGEMENT SYSTEM (LMS)** – Working with other Utah institutions, UEN licenses and supports a software application that manages online components of in-person and online classes; a shared platform for information sharing and collaboration. UEN contracts with Utah-based Instructure for its Canvas LMS. The Network regularly convenes higher and

public education partners who work collaboratively to maximize this service.

**PIONEER LIBRARY** – Pioneer Library is a statewide service that purchases online library resources from national suppliers at consortium discounts. Pioneer provides access to newspaper articles, magazines, professional journals and eBooks. UEN pays the K-12 portion of the Pioneer Library. Public Libraries and Academic/College Libraries also benefit through this collaboration. Preschool Pioneer provides early childhood resources in English and Spanish to children ages 3-5, their parents and caregivers. This service benefits more than 285,000 Utah children as they prepare for school.

**WEB CONFERENCING** – UEN licenses and supports Adobe Connect desktop-based conferencing that creates a live, virtual classroom, office or conference room with two-way audio, video, interactive whiteboard, computer desktop sharing, one-on-one interviews and chat. This tool is available statewide for educational use such as meetings, mentoring, virtual office hours, presentations and tutoring. UEN hosts a webinar on education tools in the weekly Faculty Lounge series.

**TEACHING AND LEARNING TOOLS** – UEN provides Utah's K-12 educators, faculty, and pre-service educators with tools they need to teach effectively. UEN also supports various web projects aligned to state education goals, such as STEM (Science, Technology, Engineering and Math) learning resources, Utah Futures college and career planning courses, Internet Safety and Financial Literacy. UEN's eMedia service includes more than 20,000 digital videos, images and documents for public education and higher education. UEN hosts my.uen, a web tool for teachers to communicate with parents. More than 35,000 Utah educators have my.uen accounts. UEN also works closely with the Utah State Office of Education (USOE) to develop curriculum applications such as the Utah Core Curriculum Database with vetted lesson plans, open educational resources, and links.

### 3. Support Services

Support Services provides assistance to the users of UEN infrastructure and applications.

**TRAINING** – UEN provides workshops and presentations to help end-users (teachers, faculty, librarians) use Network infrastructure services effectively. UEN coordinates with K-12 and higher education specialists to provide handouts, videos, and teaching materials to support their educational technology work. UEN offers technology integration

support in-person and via UEN-TV, Adobe Connect, and the Canvas LMS. UEN training staff work closely with district and school leaders to provide workshops specific to local school needs including 67 online license endorsements for teachers.

**REGIONAL SUPPORT** – UEN has regionally located field support that provide 24/7 assistance to UEN's data network and IVC network. UEN helps sustain Utah's

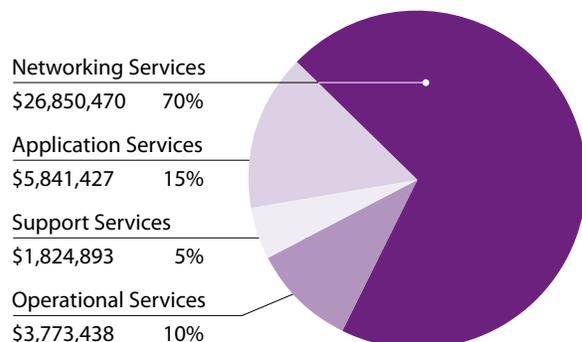

four Regional Service Centers with technical support, grant support and personnel funding. The centers are the frontline support for connectivity, training and problem resolution for Utah's rural school districts. The four centers include NUES, Northeastern Utah Educational Services in Heber City; CUES, Central Utah Educational Services in Richfield; SEDC, the Southwest Educational Development Center in Cedar City; and SESC, the Southeastern Educational Service Center in Price.

**E-RATE SUPPORT** – UEN assists Utah public school districts, charter schools, private schools, libraries and Head Start programs in obtaining E-Rate reimbursements for broadband circuit costs. The E-Rate program is part of the Federal Communication Commission's Universal Service Fund. Consumers, such as cell phone users, pay into this fund as a part of their monthly bills. With UEN's E-Rate support, Utah schools and libraries are laying claim to millions of E-Rate dollars which have been set aside for education.

## 4. Operational Services

These business functions provide the operational foundation for UEN's networking, application and support services. They include basic operations and maintenance such as administration, accounting, internal telecommunications, utilities, database backups, and internal security tools.

# UEN Funding Request for FY2016

UEN FY2016 Total Funding Request		
1	Sustainability – Ongoing	\$4.5 Million
2	Equipment – One-time	\$6.2 Million

UEN requests funding for Sustainability and Equipment. The demand and cost of UEN services continue to outpace available funds. UEN seeks a \$4.5 million increase in ongoing funding to address this shortfall. UEN also seeks a one-time appropriation of \$6.2 million to help upgrade or replace aging equipment with newer technology. Both of these requests help address vulnerability in Utah’s infrastructure for educational technology.

## Priority 1: Sustainability = \$4.5 Million ongoing

### State Funding for State Resources

While our circuit costs have almost doubled over the past eight years, our annual ongoing legislative appropriation has declined. We have been able to fill a portion of the shortfall by finding additional revenue from grants and E-Rate. We have also postponed essential equipment purchases. We request \$4.5 million in ongoing funding to support the ongoing operations and services of UEN.

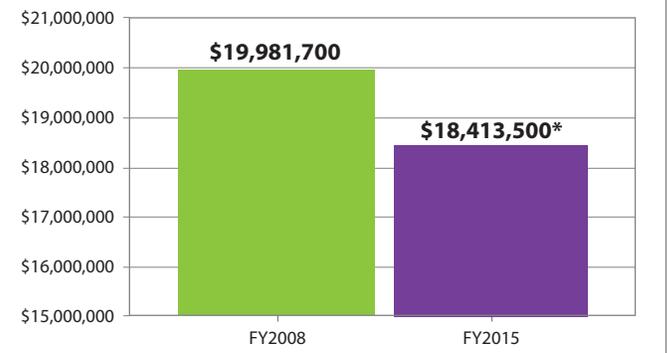

### Increased Operational Demand

Utah has more schools, students, devices and apps on the network than ever before, and demand continues to outpace our current infrastructure.

$$\text{schools} + \text{students} + \text{devices} + (\text{students} \times \text{apps}) = \text{demand}$$

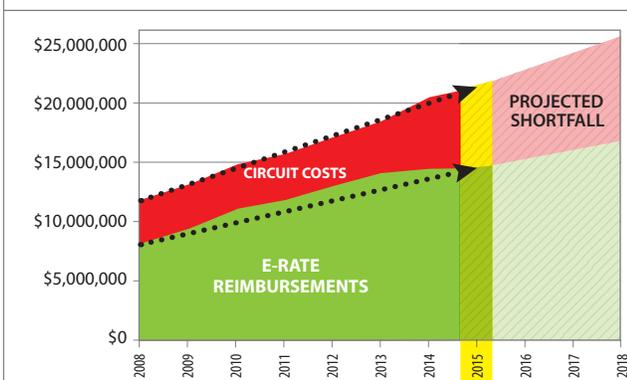

UEN is scheduled to connect an additional 35 K-12 schools in FY2016 to accommodate the growth of the student population. As enrollments increase, so do the costs of licensed applications which are priced on a per student basis.

### UEN Ongoing State Appropriations

\*Does not include \$345,000 for the Utah Data Alliance.

### Comparison of E-Rate Funding to Circuit Expenses

	FY 2008	FY 2015	NET INCREASE
Circuit Costs	\$11,861,321	\$ 21,000,000	\$ 9,138,679
Less E-Rate Reimbursements	(8,000,359)	(14,300,000)	(6,299,641)
<b>= Funding Shortfall</b>	<b>\$ 3,860,962</b>	<b>\$ 6,700,000</b>	<b>\$ 2,839,038</b>

We filled a portion of the shortfall with grants (both ongoing and one-time) and by deferring capital equipment purchases, but **this model is not sustainable**. UEN needs ongoing state funding for the ongoing operations of the Network.

Existing schools are also using more bandwidth as students and educators rely on more devices running more applications. Thus far 52 existing schools need additional bandwidth, and two school districts require increased backbone capacity to meet demand.

#### Last Phase of Elementary Circuit Connectivity

The Utah Legislature increased funding for elementary school circuit connectivity for the past three years. UEN now funds five-sixths of all elementary circuit costs. This will complete the final phase of elementary connectivity at 100% of all elementary circuit costs.

#### Network Security

Like other large networks in Utah and throughout the world, UEN must be highly secure. Nearly eight percent of our backbone traffic can be attributed to malicious attacks sourced from and targeted at UEN and its connected customers. UEN continuously responds (24 x 7 x 365) to mitigate those attacks and does it with two FTEs. This ongoing funding is needed for two additional FTEs and security monitoring tools.

### Priority 2: Equipment = \$6.2 Million one-time

UEN manages over \$22 million in equipment, with over \$14.2 million identified as most critical for our state's educational technology infrastructure. Much of this equipment is more than ten years old, making it incompatible with current systems, prone to failure and obsolete. One-time funding of \$6.2 million will address the highest priority, mission-critical items on this list. With this funding UEN would proactively replace outdated equipment before it fails, reducing disruptive Network downtime and costly emergency repairs. It will also enable UEN to upgrade to newer, more efficient protocols that cannot be run on older platforms.

### Leaders speak out on how UEN serves education

*Technology infrastructure is critical to the success of higher education. UEN plays an important role supporting the network infrastructure of the state's colleges and universities. Institutions within the Utah System of Higher Education are large enterprises serving over 170,000 students a year. The quality of those institutions depends on a solid physical and technological infrastructure—not just in instruction, but also research, campus life, public safety and administration. The Utah System of Higher Education values its partnership with UEN in providing this critical support.*

**David L. Buhler**  
Commissioner of Higher Education

*The Utah Education Network (UEN) is a longstanding and essential partner to the Utah State Library (USL) and to public libraries all across Utah. Their services ensure that USL can fulfill its mission to improve the quality of public libraries, especially smaller ones, across the state. This partnership has been a crucial catalyst for three major initiatives benefiting Utah's public libraries: first, Pioneer, Utah's Online Library with in-depth educational resources; second, broadband Internet for most of Utah's public libraries; and third, E-Rate assistance that provides broadband access to libraries at substantial savings.*

**Donna Jones Morris**  
State Librarian  
Director, Utah State Library Division/Department of Heritage and Arts

*UEN is essential to the Utah College of Applied Technology in its mission to meet the needs of Utah's employers for technically skilled workers by providing market-driven technical education to both secondary and adult students. UEN provides the technological backbone to our campuses and provides means whereby colleagues can meet over interactive video conferencing cutting down on expensive travel. Campuses also use UEN provided technology to deliver distance education to provide opportunities to students not located near campuses.*

**Robert O. Brems**  
President, Utah College of Applied Technology

*Modern skyscrapers were made possible because of structural advances in the bundled tube design. Bundled tubes allow hundred-story buildings not only to withstand the stress and strain of their height and weight, but to be built in creative ways to meet the needs of building occupants. UEN supplies the digital version of bundled tube design to 21st century learning in Utah. UEN's statewide digital backbone gives public schools, libraries, and higher education institutions the strength to carry out cutting-edge learning over the vast expanse of Utah and the flexibility to deliver it in ways that best suit the needs of individual teachers and students.*

**Brad C. Smith**  
State Superintendent of Public Instruction

# UETN Overview

UEN and UTN have effectively served the Utah education and healthcare community for many years. Merging them brings together two trusted providers that are committed to robust, reliable and secure networking.

Our diverse team serves public education, higher education, libraries, hospitals and clinics. Whether we're helping a 5th grader with history or connecting a rural clinic to a specialist, our services span three main categories:

- Networking Services – Building and maintaining the statewide broadband network through partnerships with local telecommunications companies.
- Application Services – Providing educators and students, clinicians and patients with tools like interactive video conferencing and library databases.
- Support Services – Training, technology support and trouble shooting from Logan to St. George and from Grouse Creek to Navajo Mountain.

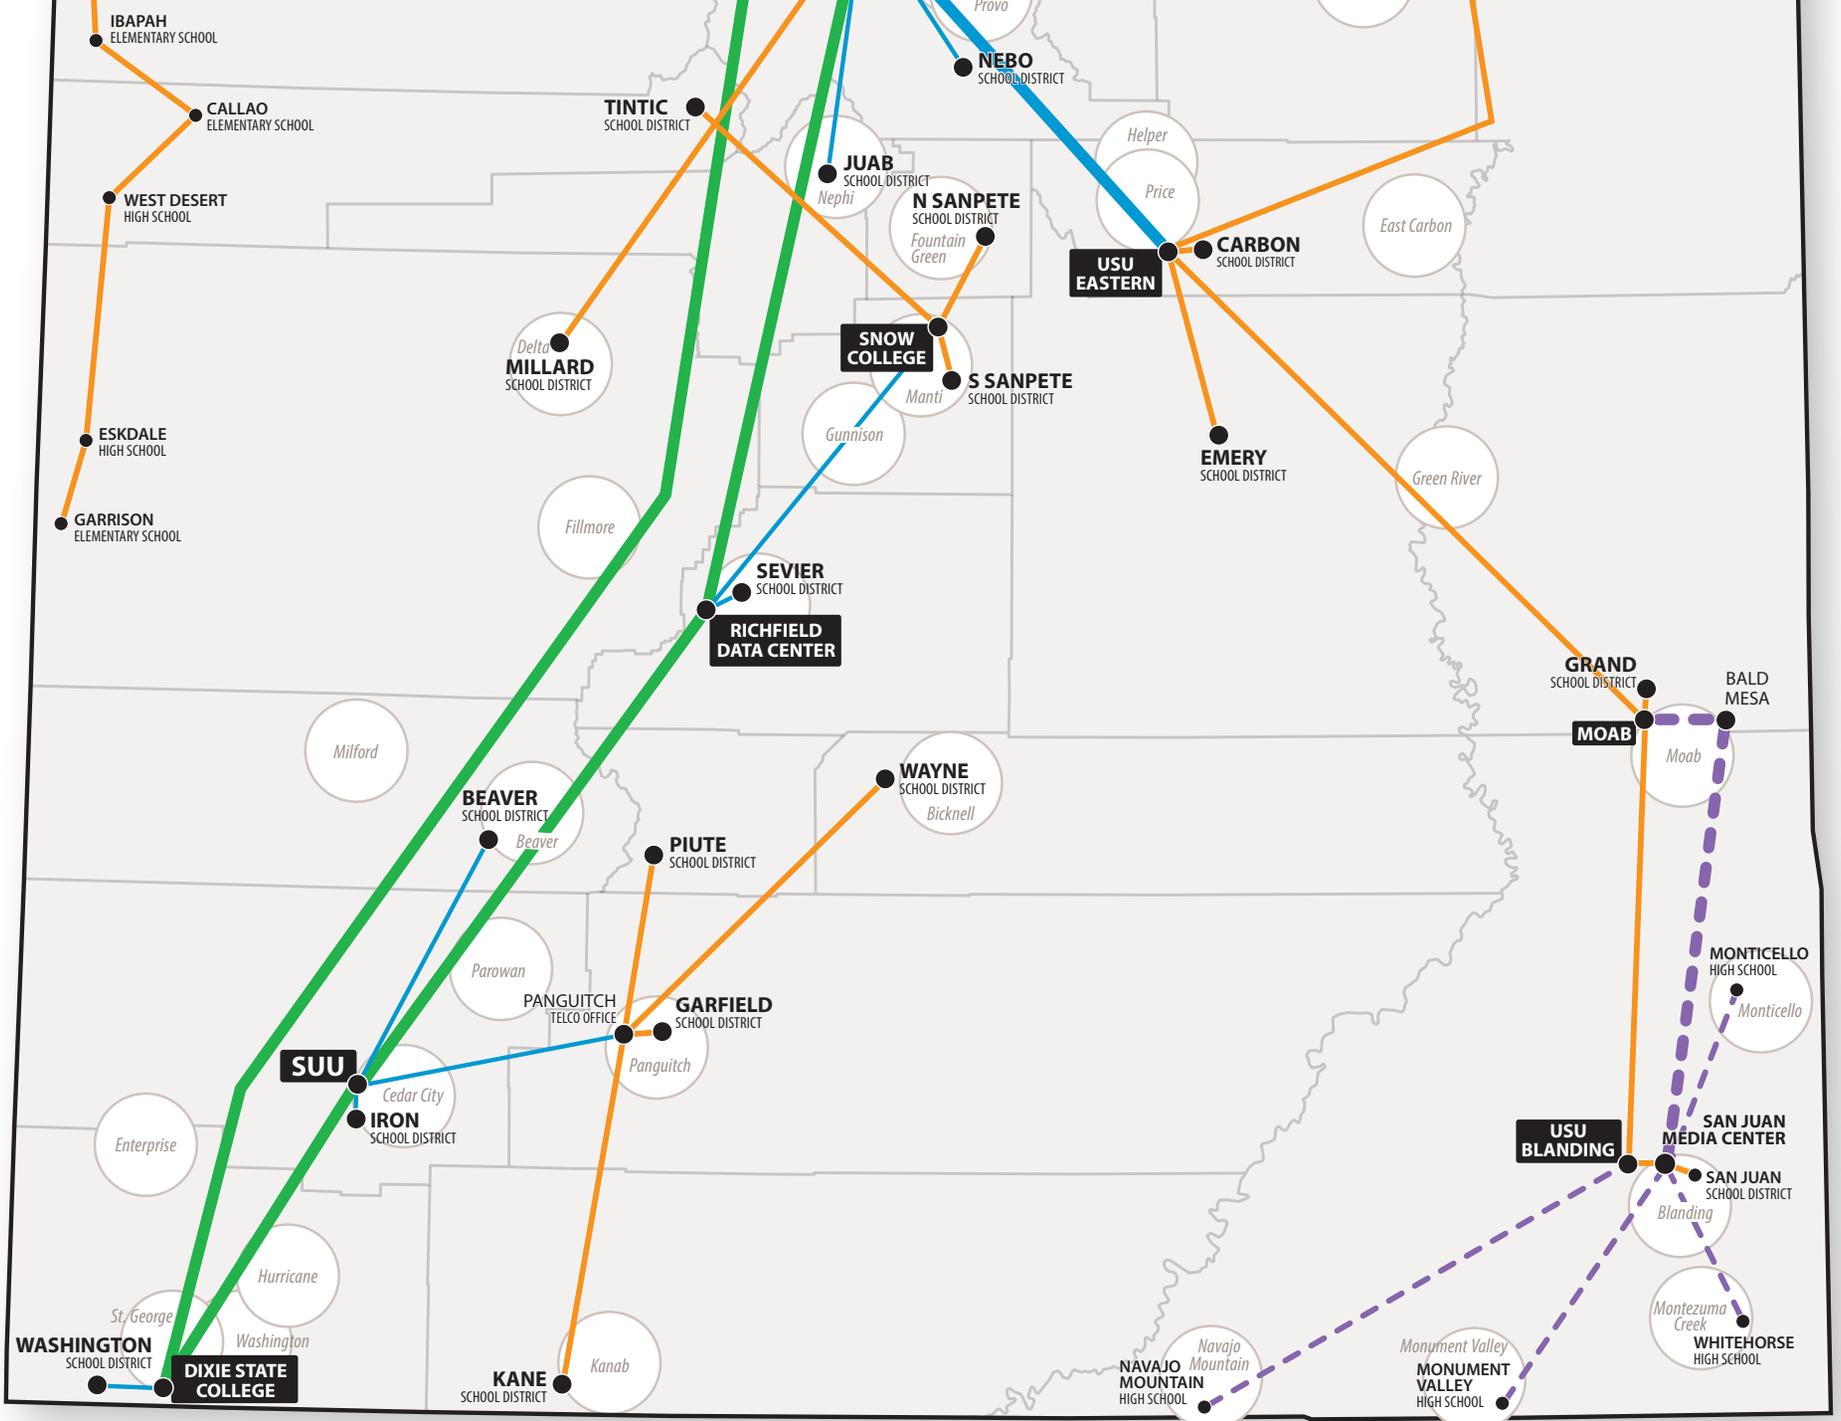

How do we do it? In a word, collaboration. The legislature, the Governor's office, the State Board of Regents, school districts and schools, libraries, clinics, hospitals and providers all work together to provide connectivity and resources. As a result the network is one of Utah's greatest assets and is the envy of many states.

Ray Timothy, PhD

*CEO and Executive Director  
Utah Education Telehealth Network*

# Utah Telehealth Network

Connecting hospitals, clinics and health departments in Utah and the Intermountain West

## Utah Telehealth Network:

- ▶ **Connects** hospitals, clinics, and health departments via a secure high speed broadband network.
- ▶ **Links** patients and health professionals to multiple resources and specialists.
- ▶ **Keeps** patients (and health care) in local communities, saving time and travel costs.

## Our Core Services include:

- ▶ **NETWORKING**– private high speed broadband network, 24/7 management and support
- ▶ **SECURITY**– HIPAA compliant security; monitoring & management; secure remote access
- ▶ **VIDEOCONFERENCING AND LIVE STREAMING**– bridging, training, technical support and consultation
- ▶ **TELEHEALTH APPLICATION DEVELOPMENT**– guide implementation of patient care services and educational programs

*“Our health department serves a population of 203,000 residents dispersed throughout five counties in a 17,000 square mile region. The Utah Telehealth Network (UTN) has been of great benefit to our department by overcoming distance issues and providing excellent service.”*

Chris White, Deputy Health Officer  
Southwest Utah Public Health Department

# UTN Funding Request for FY2016

UTN Operational Priorities – Ongoing	
Operational support to manage increased growth – Ongoing	\$105,000
Telecom costs for growing core network infrastructure – Ongoing	\$37,000
<b>Total UTN request – Ongoing</b>	<b>\$142,000</b>

## Operational Need

Utah Telehealth Network (UTN) has tripled in recent years, from <20 sites in 2007 to 58 healthcare facilities today. UTN is expected to grow by an additional ten sites in the coming year. Since 2007, UTN’s two engineers have managed network and security for its member sites and provide IT assistance to sites in an increasingly complex healthcare IT environment.

Bandwidth needs are increasing too. At the same time, Universal Service (USAC) discounts are moving in the wrong direction, from today’s Rural Healthcare Pilot Program (85% discount) to the Healthcare Connect Fund (65% discounts).

This is the first request for operational funding by UTN since 2007, when the Utah Legislature awarded a \$500,000 annual line item to UTN. Reduced during the economic downturn, it is currently at \$459,600. This new request would bring UTN’s ongoing state line item total to \$601,600 per year.

UTN serves 110 hospitals, clinics and health departments, 58 of which rely on UTN for network connectivity and support.

UTN Network Refresh and Expansion – One-time	
Upgrade core network equipment, w/ maintenance	\$243,300
Strengthen reliability and functionality of network	\$108,500
Connect rural healthcare facilities	\$150,000
<b>Total UTN request – One-time</b>	<b>\$501,800</b>

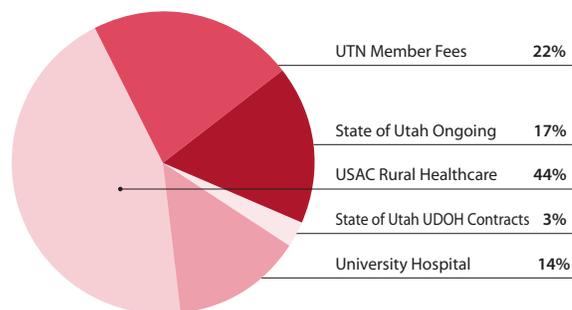

## Infrastructure Need

UTN created its current fiber and microwave-based Ethernet network in 2011-12. By 2016, it will be in need of enhancements and upgrades as well as expansion to new sites.

UTN provides the only access to critical patient information for many of its member healthcare facilities. This has increased the need for a reliable and redundant network.

One-time last-mile costs to connect rural healthcare facilities can be substantial. This will stretch Healthcare Connect Fund dollars and healthcare facility funds to add more sites.

UTN Operating Budget - FY2015

# UTAH DATA ALLIANCE

LOOKING BACK,  
MOVING FORWARD.

## Sustainability Budget

### Overall Utah Data Alliance Budget

Wages	\$	980,000.00
Benefits	\$	451,000.00
Travel, Training & Equip	\$	91,000.00
Contracts	\$	316,706.68
<b>Total</b>	<b>\$</b>	<b>1,838,706.68</b>

### Budget by Agency

#### Utah State Office of Education

Salaries (3 FTE)	\$	220,000.00
Includes Project Director		
Benefits	\$	120,000.00
Travel, Training & Equip	\$	15,000.00
<b>Total</b>	<b>\$</b>	<b>355,000.00</b>

#### Utah Department of Workforce Services

DTS Contract	\$	7,860.00
<b>Total</b>	<b>\$</b>	<b>7,860.00</b>

#### Utah College of Applied Technology

Salaries (2 FTE)	\$	150,000.00
Benefits	\$	80,000.00
Travel, Training & Equip	\$	15,000.00
<b>Total</b>	<b>\$</b>	<b>245,000.00</b>

#### Utah Education Policy Center

Salaries (3 FTE)	\$	220,000.00
Benefits	\$	75,000.00
Travel, Training & Equip	\$	15,000.00
<b>Total</b>	<b>\$</b>	<b>310,000.00</b>

#### Utah System of Higher Education

Salaries (2 FTE)	\$	150,000.00
Benefits	\$	80,000.00
Travel, Training & Equip	\$	15,000.00
<b>Total</b>	<b>\$</b>	<b>245,000.00</b>
