Utah Suicide Prevention Program Report

Suicide is a major public health problem in Utah and a leading cause of preventable death. From 2009 to 2013, Utah's age-adjusted suicide rate was 19.4 per 100,000 persons. This is an average of 503 suicides per year. Utah has one of the highest age-adjusted suicide rates in the U.S. It was the second-leading cause of death for Utahans ages 10 to 39 years old in 2013 and the number one cause of death for youth ages 10-17. More people attempt suicide than are fatally injured. The most recent data show that 2,743 Utahans were seen in emergency departments (2012) and 1,605 Utahans were hospitalized for self-inflicted injuries (2012). One in fifteen Utah adults have had serious thoughts of suicide. According to the 2015 Student Health and Risk Prevention Survey, during the past 12 months before the survey, 14.4 % of youth grades 6-12 report seriously considering suicide, 6.7% of Utah youth grades 6-12 students attempted suicide one or more times and 13.9% of these students report harming themselves without the intention of dying.

HB 154 (2013)/HB 364 (2015) require the Utah Division of Substance Abuse and Mental Health to designate a state suicide prevention coordinator to organize suicide prevention programs and efforts statewide. It also provides \$210,000 in suicide prevention program funding for FY 2015 and \$191,000 in ongoing funding. The following is a brief summary of related activities.

DSAMH

The Utah Division of Substance Abuse and Mental Health (DSAMH) was created as Utah's substance abuse and mental health authority by Utah statute [§62A-15-103](#). DSAMH is charged with ensuring a comprehensive continuum of mental health and substance use disorder services are available throughout the state. DSAMH contracts with local county governments who are statutorily designated as local substance abuse authorities (LSAAs) and local mental health authorities (LMHAs) to provide prevention, treatment, and recovery services. DSAMH provides policy direction, monitoring, and oversight to local authorities and their contracted service providers. As a state we have identified five focused state strategies one of which is reducing the rate of suicide in Utah. We are committed to becoming a Zero Suicide system of care. The following division directive indicates the commitment of zero suicide within the public mental health and substance use treatment and prevention system as overseen by the state suicide prevention coordinator:

- During FY 2015 Local Mental Health Authorities statewide will conduct a suicide prevention behavioral healthcare assessment including a comprehensive evaluation of related policies and practices related to suicide prevention, intervention, and postvention. Conduct an assessment of staff knowledge, skills, and training related to suicide prevention, intervention, and postvention. A model tool will be provided by DSAMH or another assessment tool selected by the Local Authority may be used. Complete the above and submit a written report to DSAMH by June 30, 2015.
- During FY 2016, based on assessment results, Local Authorities will develop a policy and implementation plan to establish, implement and monitor comprehensive suicide prevention

plan. A copy of the policy and implementation time line will be submitted to the DSAMH by March 1, 2016.

All of the Local Mental Health Authorities have undergone a suicide prevention behavioral healthcare assessment and submitted them to DSAMH and the state suicide prevention coordinator for review. DSAMH will provide ongoing technical assistance to help all LMHA's use the assessment to form a local strategic plan for care quality improvement.

DSAMH and all Local Mental Health Authorities have partnered to implement a statewide Medicaid Performance Improvement Project for suicide safer care within the public behavioral health care system. 2015 is a baseline data collection year with a goal of learning where the system is at in terms of screening and assessing for suicide risk and providing comprehensive safety planning interventions when someone is at risk. In 2016 targeted interventions will be implemented in order to improve quality of care over the year.

Utah Suicide Prevention Coalition:

The Utah Suicide Prevention Coalition is a partnership of community members, suicide survivors, service providers, researchers, and others dedicated to saving lives and advancing suicide prevention efforts in Utah. DSAMH has provided ongoing leadership and coordination for the coalition. This group has met monthly over the past three years and has accomplished a great deal including the revision and ongoing implementation of the Utah Suicide Prevention Plan. (see attached plan)

The Utah Suicide Prevention Coalition hosts a handful of additional committees who are dedicated to implementation of the State Suicide Prevention Plan. DSAMH provides leadership and coordination to all of the committees. Committees include the Executive Committee, Community Awareness Committee, Training and Education Committee, Epidemiology/Data Committee, Policy Committee, and the First Responder Committee.

- Executive Committee
 - Includes representation from the Division of Substance Abuse and Mental Health (DSAMH), Department of Health (DOH), State Office of Education (USOE), Division of Child and Family Services, Juvenile Justice Services, Department of Public Safety, University of Utah Healthcare, Intermountain Healthcare, National Alliance on Mental Illness-Utah, Wasatch Mental Health, Hope4Utah, Utah Navajo Health Services, and ESI Management Group.

A representation of key DSAMH/Coalition Outcomes are listed below.

- Utah Suicide Prevention Plan - revision and implementation - monthly reviews ensuring compliance and progression towards full implementation (http://utahsuicideprevention.org/images/pdf/Suicide_State_Plan_goals_obj_2.pdf)
- Regular monthly meetings since 2012
- Launched Suicide Prevention Coalition website www.utahsuicideprevention.org
- Governor Herbert Declaration of Suicide Prevention Day in Utah, May 22, 2014
- Suicide Prevention Town Hall Tool Kit
- Workforce Survey on Suicide Prevention Preparedness
- Multiple and ongoing suicide prevention, intervention, and postvention training

- Adoption of universal screening tool for assessing suicide risk
- 2014 Legislative passing of the UT Fire Arms Safety bill
- Establishment of the Suicide Fatality Review Board
- Implemented the Workforce Needs Assessment Survey - the results of the survey helped drive strategic planning and a Public Health Approach to meeting workforce needs
- Assisted IHC to identify and implement the C-SSRS into their system of care as a public/private partnership. Working with other key health care providers on care quality improvement suicide
- 2015 support and education of 5 pieces of legislation related to suicide prevention.
- Ongoing meetings of key work groups including Community Awareness, Training and Education, Epidemiology/Data, and Policy.
- 2015 launch of a first responder initiative for suicide prevention including a kick off summit with first responder leadership and the launch of a suicide prevention coalition workgroup focused on first responder suicide prevention. Each year, more law enforcement officers and fire fighters die because of suicide than are killed in the line of duty. Individuals in public safety are also often the first on scene for suicide deaths, attempts, and ideation in the community. The coalition feels strongly about finding ways to provide ongoing support to these individuals and agencies in the community.

Utah Prevention By Design

In 2012 DSAMH contracted with NAMI Utah and launched the Utah Prevention by Design Project which partners with local community partners and coalitions for suicide prevention and mental health promotion efforts. Key 2012-2014 Prevention by Design outcomes have primarily been in engaging communities, capacity building, and process outcomes. Key outcomes include:

2014 Outcomes Summary; NAMI Utah Prevention by Design

January 1 through December 31, 2014

* Attendee numbers

** Events held in the community, separate from town hall meetings, in which suicide prevention was a topic and suicide prevention materials were distributed

*** Prevention education events/classes for parents and students held outside of school hours at which suicide prevention was a part

For 2015 the outcome focus will change from engagement and process driven to effectiveness of strategies. Pre/Post data collection will be a core priority and that data will be collected and reported out semi-annually.

The Prevention and Promotion contract was released for bid in 2014 and was again awarded to NAMI Utah. With support of the DSAMH, NAMI Utah completed a statewide Mental Health Needs Assessment and Community Action Plan to ensure a data-driven approach to mental health promotion, mental illness prevention and suicide prevention. This Needs Assessment and Action Plan will drive prevention and promotion efforts of NAMI Utah, DSAMH, and local stakeholders over the next several years. Over the past several years this project has provided sub-contracting opportunities for up to 13 coalitions statewide. This represents one sub-contract in each of the defined Local Health Authority regions. Through legislatively approved state funding awarded for FY15 in March of 2015 the number of sub-contractors has expanded to over 20 local groups who are receiving funding for suicide prevention efforts beginning June 30, 2015. This greatly expands the capacity of our state to engage in meaningful prevention strategies.

FUNDS

March 2015, via HB 364, the Utah State Legislature approved \$210,000 one-time funding for FY15 and \$191,000 funding for FY16 ongoing. The funding is to be used to support the administration of a state suicide prevention program composed of suicide prevention, intervention, and postvention programs, services, and efforts include the following components: (a) delivery of resources, tools, and training to community-based coalitions; (b) evidence-based suicide risk assessment tools and training; (c) town hall meetings for building community-based suicide prevention strategies; (d) suicide prevention gatekeeper training; (e) training to identify warning signs and to manage an at-risk individual's crisis; (f) evidence-based intervention training; (g) intervention skills training; and (h) postvention training.

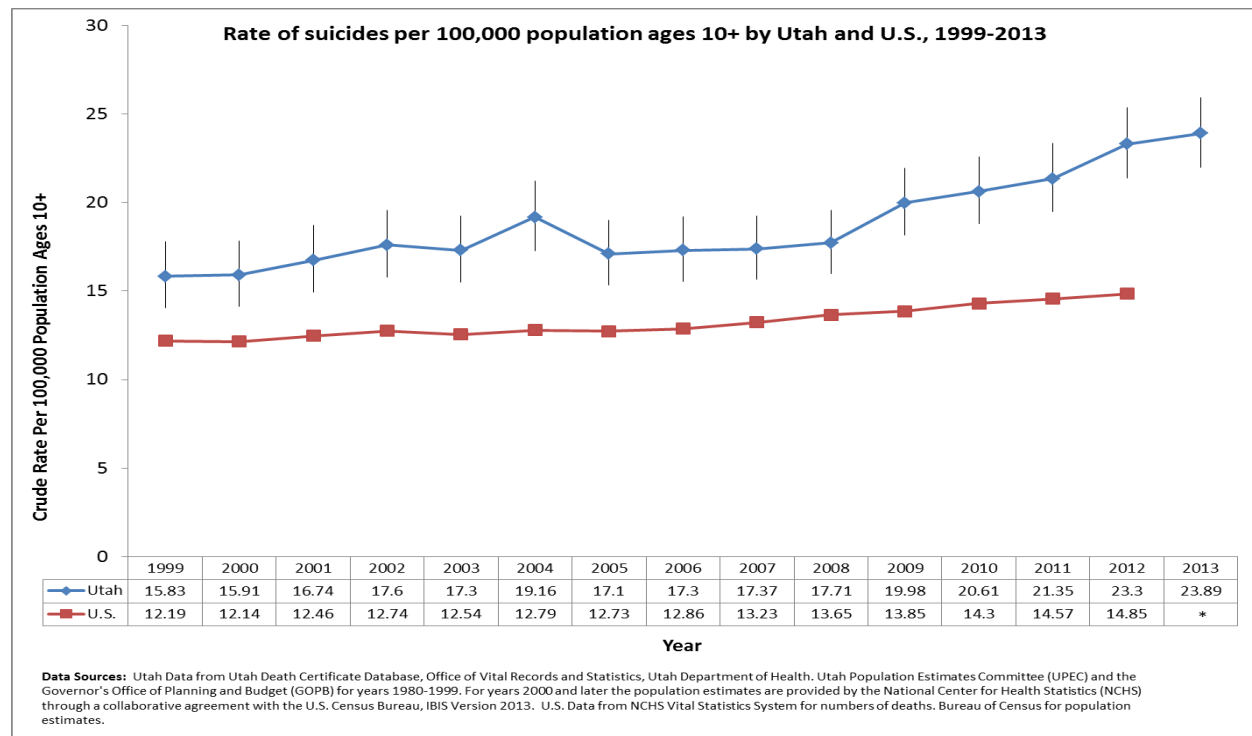

FY15 funding has been allotted as follows:

PREVENTION	Funding	Programming Component/ Statute Addressed
Prevention and Promotion Contract- Local Coalition Sub-Contracts & Community Awareness Campaign (NAMI Utah)	\$125,000	a) delivery of resources, tools, and training to community-based coalitions;
QPR T4T	\$4,157.00	(d) suicide prevention gatekeeper training
Harvard/Mean Matters	\$1,166.48	(a) delivery of resources, tools, and training to community-based coalitions
MHFA Training Manuals	\$3,949.80	(d) suicide prevention gatekeeper training
QPR Manuals	\$5,448.95	(d) suicide prevention gatekeeper training
INTERVENTION		
Empathos- CAMS	\$11,175	(f) evidence-based intervention training (g) intervention skills training

UNI- Lifeline	\$15,000	(e.) training to identify warning signs and to manage an at-risk individual's crisis (g) intervention skills training;
CIT	\$12,000	(e.) training to identify warning signs and to manage an at-risk individual's crisis (g) intervention skills training;
POSTVENTION		
Connect Postvention T4T	\$29,916	(h) postvention training
OTHER		
Coordinator Administration and Training	\$1,901.42	(a) delivery of resources, tools, and training to community-based coalitions (b) (f) evidence-based intervention training
TOTAL	\$209,714.65	

Five Year Suicide Trends

As previously discusses, suicide is a major public health problem in Utah. Utah is consistently ranks above the national average for suicide deaths. The following tables represent data collected by the Utah Department of Health to help us better understand and respond to the problem of suicide in Utah.

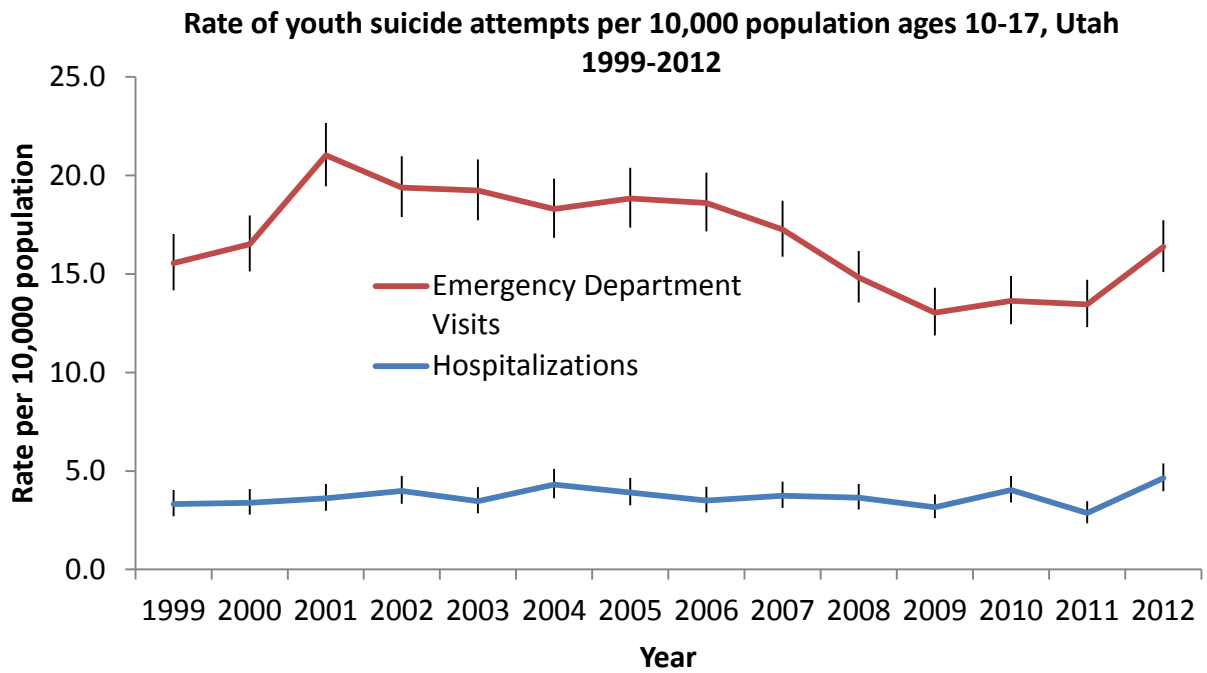

Figure 14.1: Number of Self-inflicted Injury Emergency Department Visits per 10,000 Population Ages 10+ by Health District, Utah Small Area, Utah, and U.S., 2009-2011 (Age-adjusted)

Figure 15.1: Number of Self-inflicted Injury Hospitalizations per 10,000 Population Ages 10 and Up by Health District, Utah Small Area, Utah, and U.S., 2009-2011 (Age-adjusted)

Figure 16.1: Number of Suicide Fatalities per 100,000 Population Ages 10+ by Health District, Utah Small Area, Utah, and U.S., 2009-2011 (Age-adjusted)

CONCLUSION

In summary, suicide is a major public health problem that takes a comprehensive approach. The Utah Division of Substance Abuse and Mental Health, the Utah State Office of Education, the Department of Health and other dedicated public and private partners are dedicated to sustaining and growing suicide prevention efforts and reducing Utah’s rate of suicide.
