**SUMMARY**

A recent review of categorical programs in the Minimum School Program (MSP) reaffirmed that certain programs and expenditures are not reported in a manner to provide general transparency to the public and aid in appropriate oversight by the Legislature. First, several categorical programs appropriated by the Legislature each year have sub-programs that distribute funding to Local Education Agencies (LEAs) in a manner that is not transparent and not always supported by statute. Second, the State Board of Education has authorized the use of programmatic funding for state-level administrative costs at the Utah State Office of Education (USOE) but has not reported expenditures in a transparent manner.

**Legislative Action**

Evaluate the following issues and recommendations related to the transparency of MSP categorical programs and the use of MSP funding for administrative costs.

Recommendations include the following:

- Increase the number of MSP categorical programs to eliminate categorical sub-programs in two programs, namely, Grades 1-12 and Special Education State Programs.
- Transfer funding from certain MSP categorical programs to the USOE line-item to properly account for current budgetary practices.
- Amend statute for several programs to implement the recommendations outlined in this brief.

**CATEGORICAL SUB-PROGRAMS**

The Legislature appropriates funding to approximately 42 categorical programs within the MSP each year. Several of these programs have sub-programs that are contained within the appropriated amount and not independently reported. As a result, the Legislature may not be fully aware of how programmatic funding is distributed to provide appropriate oversight on the use of state funding.

Sub-programs have a long history, and in many cases may be decades old. Over the course of this time, the Legislature has created, eliminated, combined, or block-granted programs or functions and changed statute in a way that questions the continuation of historic practice.

This brief will focus on two programs in the Basic School Program (BSP): Grades 1-12 and Special Education State Programs. Figure 1 details the categorical programs within the BSP. The Legislature appropriated $2.53 billion to the program in FY 2016.
The Grades 1-12 program is the largest program in the MSP. Funding supports general educational services provided by LEAs for 1st through 12th grade. As an unrestricted program, LEAs may use allocations for any general educational purpose determined by the local governing board. The program is funded by weighted pupil units (WPUs) as outlined in statute. In FY 2016, the Legislature appropriated $1.74 billion to the Grades 1-12 program.

The program contains three sub-programs: Foreign Exchange Students, Centennial Scholarships, and Out-of-State Tuition. Figure 2 provides the funding amounts for each program.
Foreign Exchange Students

Statute, 53A-2-206, allows up to 328 foreign exchange students to be funded through the MSP. These 328 students are in addition to any one-for-one student exchanges and are funded based on the number of foreign exchange students enrolled in the prior school year. LEAs that enroll a foreign exchange student will receive a reimbursement of up to 1 WPU, or $3,092 in FY 2016. LEAs do not receive funding from other MSP categorical programs for these students. In FY 2016, a total of 328 WPUs were included in the Grades 1-12 program for foreign exchange students, for a total of $1,014,200.

Centennial Scholarships

High school students that graduate from school prior to the end of the 12th grade may receive a Centennial Scholarship. Statute, 53A-15-102, provides that if a student graduates at the conclusion of the 11th grade they “shall receive a centennial scholarship in the lesser amount of full tuition for one year or $1,000.” If a student graduates in the 12th grade, but prior to the graduation of the class, the student will receive a pro-rated scholarship amount. The scholarship may be used at any USHE or UCAT institution and any institution accredited by the Northwest Association of Schools and Colleges that offers postsecondary courses in Utah.

Each public high school also receives half of the scholarship amount awarded to the each student who graduates early.

Statute requires the Utah State Board of Education (Board) to administer the scholarship program. Statute also requires the Legislature to appropriate funding for the program:

“The Legislature shall make an annual appropriation from the Uniform School Fund to the State Board of Education for the costs associated with the Centennial Scholarship Program based on the projected number of students who will graduate before the conclusion of the twelfth grade in any given year. It is understood that the appropriation is offset by the state money that would otherwise be required and appropriated for these students if they were enrolled in an additional grade for a full year.”

The Legislature does not provide a specific annual appropriation from the Uniform School Fund for the program. The program is funded within the Grades 1-12 program by using prior-year nonlapsing balances. Language in the second sentence of the statute quoted above has been used as authorization for the current practice, namely, the “appropriation is offset by the state money that would otherwise be required and appropriated for these students.” Approximately $185,000 in nonlapsing balance funding is used each year to fund the scholarship payments to students and LEAs.

Out-of-State Tuition

Since the early 1980s, certain school districts have received payment for a portion of the costs of out-of-state tuition when a resident student attends school in a neighboring state. The Legislature does not
provide an annual appropriation for these costs and they are funded out of prior-year nonlapsing balances. Historically, the state has paid the difference between the invoiced tuition amount and the cost of instructional and support WPUs (K-12, Professional Staff, Administrative Costs, and Accelerated Learning Programs).\footnote{Utah State Office of Education, Out of State Tuition Payments Memorandum, November 2015.}

Approximately $198,200 in nonlapsing balance funding is used each year to fund out-of-state tuition costs. Three school districts currently receive reimbursement, namely, Box Elder, Kane, and South Summit.

Statute allows LEAs to count these out-of-state tuition students in average daily membership counts and the LEA receives state funding for the student. Statute, 53A-2-204 states the following:

\begin{enumerate}
\item A local school board may by written agreement pay the tuition of a child attending school in a district outside the state. Both districts shall approve the agreement and file it with the State Board of Education.
\item The average daily membership of the child may be added to that of other eligible children attending schools within the district of residence for the purpose of apportionment of state funds.
\item The district of residence shall bear any excess tuition costs over the state's contribution for attendance in the district of residence unless otherwise approved by the State Board of Education.
\end{enumerate}

There is no recent history of the Board approving in advance reimbursements above the State’s contribution. Similarly, the Board does not have rules or policies in place to govern the process of filing agreements and request reimbursement.

Including students in the ADM count of the district generates more funding through categorical programs than the current methodology. As stated previously, the USOE has provided the difference between the tuition cost and per-student funding received from the Kindergarten, Grades 1-12, Professional Staff, Administrative Costs, and Accelerated Learning Programs. The ADM of a district is also used in the funding allocations for the following programs: Class Size Reduction, Flexible Allocation, K-3 Reading, and the Voted & Board Local Levy guarantees.

**Recommendations**

The Legislature may wish to consider the following recommendations:

**Foreign Exchange Students**

- Separate 328 WPUs from the Grades 1-12 program into a new categorical program for Foreign Exchange Students.

**Centennial Scholarships**

- Transfer $185,000 from the Grades 1-12 Program to a new program in the Related to Basic School Program (below-the-line).

- Amend statute to change the revenue source to the Education Fund and eliminate the sentence that states “It is understood that the appropriation is offset by the state money that would otherwise be required and appropriated for these students if they were enrolled in an additional grade for a full year.”

- As a possible alternative, transfer funding to the Utah System of Higher Education which would allow for coordination of all scholarship programs within that system.
**Out-of-State Tuition**

- Eliminate additional state funding for Out-of-State tuition.
- Amend statute to eliminate “unless otherwise approved by the State Board of Education.”

**SPECIAL EDUCATION – STATE PROGRAMS**

Special Education – State Programs is a grouping of three sub-programs to meet varied special education goals. These programs include Impact Aid, Intensive Services, and the Extended Year for Special Educators Program. The program was appropriated 3,258 WPUs in FY 2016 for total funding of $10,073,700. Figure 3 provides a funding break-down of the three programs.

**Impact Aid**

The Impact Aid categorical program provides funding to LEAs on a formula basis. The FY 2016 budget includes a total of $6,038,100 in funding for Impact Aid. Funding is targeted to three primary functions:

1. To pay for higher administrative costs associated with providing special education services to students;
2. To pay special education costs for students state custody (prisons, detention facilities, and the state hospital); and
3. To provide additional funding for students with low-incidence disabilities.

**Intensive Services**

The Intensive Services categorical program provides funding to LEAs on an application basis. In the FY 2016 budget, the Legislature has appropriated a total of $3,225,000 in state funds. Federal IDEA funding contributes an additional $1,000,000. Appropriated funding supports LEA expenditures on students whose special education services cost more than three-times the state average.

LEAs with expenditures in excess of three-times the state average apply to the State Board of Education to receive a supplemental reimbursement. LEA allocations are pro-rated based on the amount of funding available.

**Extended Year for Special Educators**

Funding provides additional contract days for special education teachers in order to meet the added duties and responsibilities associated with complying with state and federal regulations. Program participation is voluntary for educators. Teachers may receive a $200 stipend per additional day of
MSP – Categorical Program Oversight

work (up to a maximum of 10 days). The number of additional days available is limited based on the amount of funding appropriated by the Legislature. In FY 2016, funding provides for up to five days. The FY 2016 budget includes 909 WPUs for the program. These WPUs generate $2,810,600 in funding for the extended year stipends.

Recommendations

The Legislature may wish to consider the following recommendations:

- Divide the current WPUs and funding for Special Education State Programs into three categorical programs as follows:
  - Impact Aid – 1,952 WPUs and $6,035,600 in funding;
  - Intensive Services – 397 WPUs and $1,227,500 in funding; and
  - Extended Year for Special Educators – 909 WPUs and $2,810,600 in funding.

- Amend statute to authorize each program, require the Board to develop performance metrics, and determine any additional reporting requirements.

State-Level Administrative Costs

Traditionally, funding appropriated by the Legislature for MSP categorical programs is directly distributed to LEAs through formula allocations or grants. The funding for costs associated with executing these formula or grant programs is appropriated to the Utah State Office of Education line-item. Over-time the State Board of Education (Board) has authorized, in limited cases, the use of MSP categorical funding for administrative expenses at the Utah State Office of Education.

Figure 4 provides a listing of each MSP categorical program where administrative expenditures have been authorized by the Board or statute. All categorical programs where funding is used for administrative costs are in the Related to Basic School Program (below-the-line).

Figure 4

| Minimum School Program: Expenditures from Categorical Programs on State Administration |
| Program Appropriation and Administrative Expenditure Amount by Program |
| FY 2016 |
| Program | FY 2016 Appropriation | Administrative Expenditures | Percent of Appropriation | Authorization |
| | |
| Comprehensive Guidance | $9,504,300 | $182,700 | 1.9% | No | Yes |
| Enhancement for At-Risk Students - Regular | 24,481,000 | 244,800 | 1.0% | No | Yes |
| Enhancement for At-Risk Students - Gang Prevention | 1,200,000 | 60,000 | 5.0% | No | Yes |
| Youth-in-Custody | 20,974,500 | 1,048,700 | 5.0% | No | Yes |
| Adult Education | 10,303,400 | 206,100 | 2.0% | No | Yes |
| Critical Languages & Dual Immersion(1) | 2,915,400 | 209,400 | 7.2% | No | No |
| Beverley Taylor Sorenson Arts Learning Program | 6,500,000 | 120,000 | 1.8% | Yes | No |
| Total | $75,878,600 | $2,071,700 | 2.7% | |

(1) State administrative expenditures are not currently made from the Critical Languages & Dual Immersion program. Program managers would like the State Board of Education to authorize use for administrative expenditures through Board rule.

(2) See UCA 53A-17a-162(7).

Prepared by: Office of the Legislative Fiscal Analyst (1/16BL).
Although the Board authorized this use, this practice may violate the Budgetary Procedures Act. Statute states that “money may not be transferred from one item of appropriation to any other item of appropriation” (63J-1-206). The MSP is made up of three budgetary line-items, namely, the Basic School Program, the Related to Basic School Program, and the Voted & Board Local Levy Programs. The USOE is a separate budgetary line-item. Statute, 63J-1-206(3)(f)(ii), provides an exception to this restriction to allow the state superintendent to move between line-items of the Minimum School Program as outlined in 53A-17a-105.

In addition to moving funding between items of appropriation, the expenditures on USOE administration were not accounted for in the MSP categorical program but in the USOE line-item. This practice results in obscuring the true cost of statewide administration at the USOE and potentially double-counting programmatic expenditures.

Recommendations

The Legislature may wish to consider the following recommendations:

- Transfer the above funding amounts from the various MSP categorical programs to a new USOE line-item to pay for statewide administrative expenditures directly related to MSP programs.

- Amend the statute for the Beverley Taylor Sorenson Arts Learning Program to specify that administrative expenditures at the USOE are not covered by the appropriation in the MSP, but a specific appropriation to the new USOE line-item.
