

KUER Public Radio: A Legacy of Statewide Service

KUER Public Radio enriches the lives of its statewide audience with a signature blend of news, information and entertainment programming in an unbiased, non-commercial context and provides an ongoing source of service and support to more than 3,600 community organizations.

- St. George and surrounding areas are the last gap in KUER's statewide broadcast service.
- 35 translators
- 5 transmitters
- 3.6 million annual operating budget
- 80% of funding is received from community-based sources, listener-support, foundations and corporations.
- 3,600 community organizations served annually.

KUER's expanded coverage area would bring the benefits that public radio has to offer to more people: inform, increase understanding, and create dialogue. As an organization that has similar goals, we value KUER as a partner and support their efforts to do more.

- R. Scott Phillips. Executive Director of the Utah Shakespeare Festival

KUER is respectfully asking the Utah Legislature for an appropriation of \$300,000 to assist with our efforts to serve the Southwest Utah population. The overall project will cost \$1,031,000. The Legislature has partnered with KUER in prior years to establish public radio service throughout our entire state. Support for this project would complete this crucial aspect of our mission.

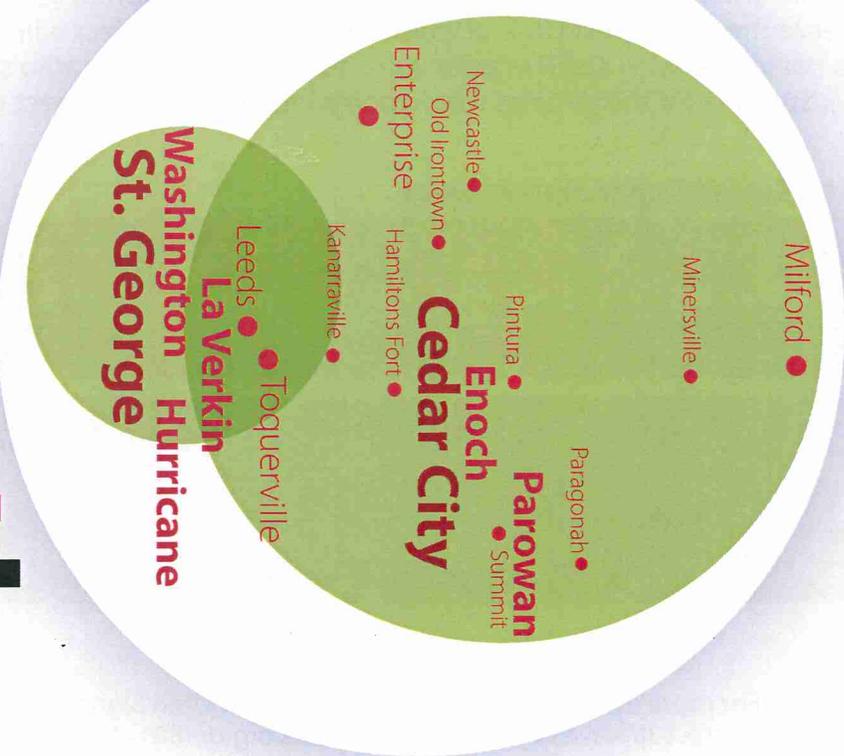

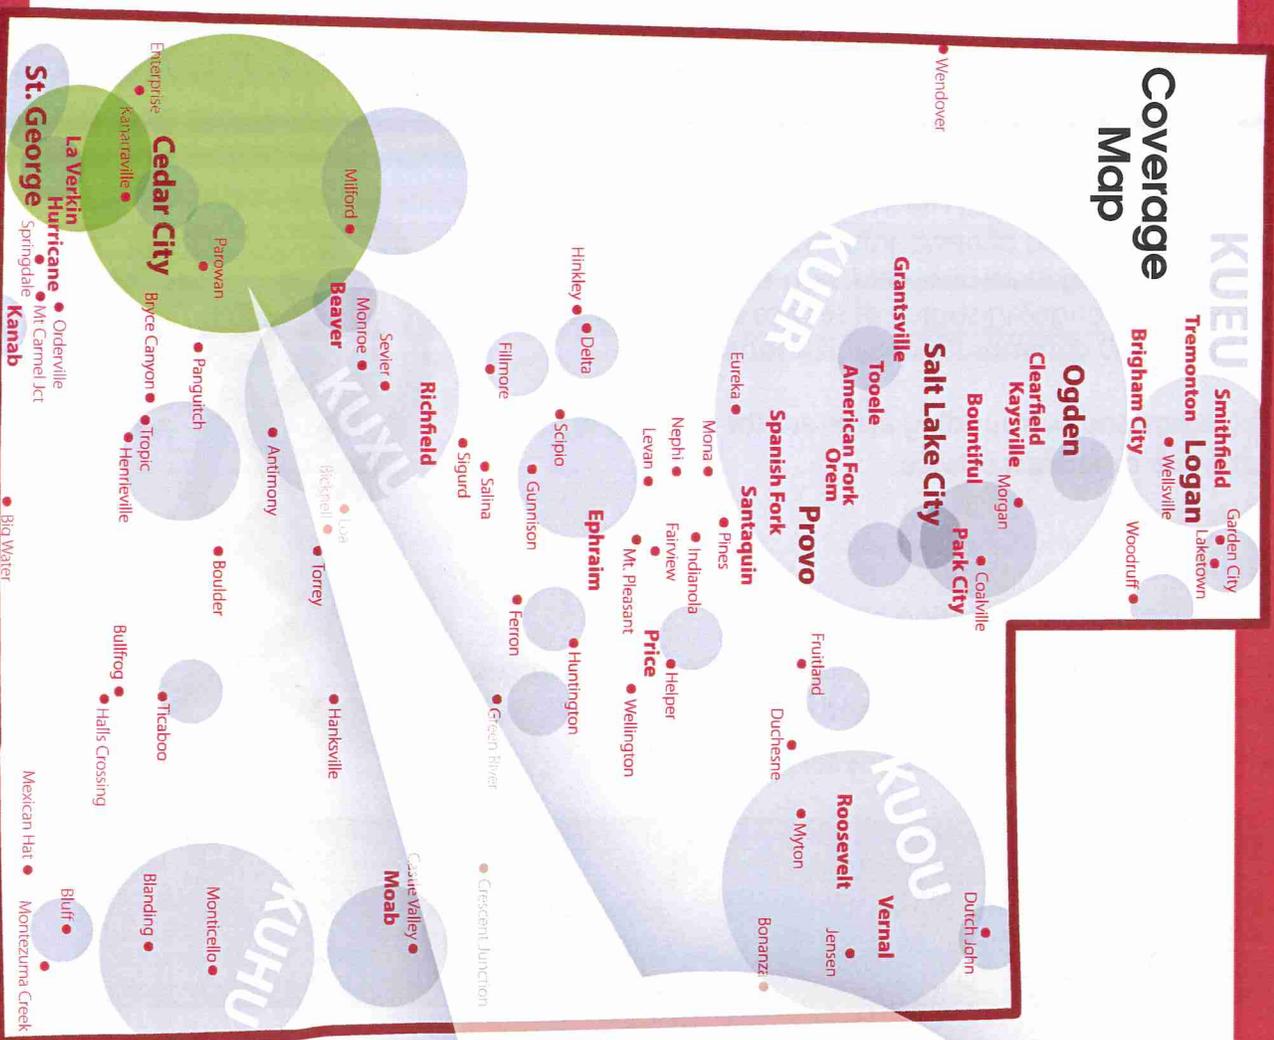

Southwest Utah Signal Expansion Project

Purchase of FCC Signal License	\$450,000
Tower, Antenna & Booster Installation	\$581,000
