

# School Accountability Report Card

Utah State Board of Education  
Presentation to Education Interim Committee  
08.15.18

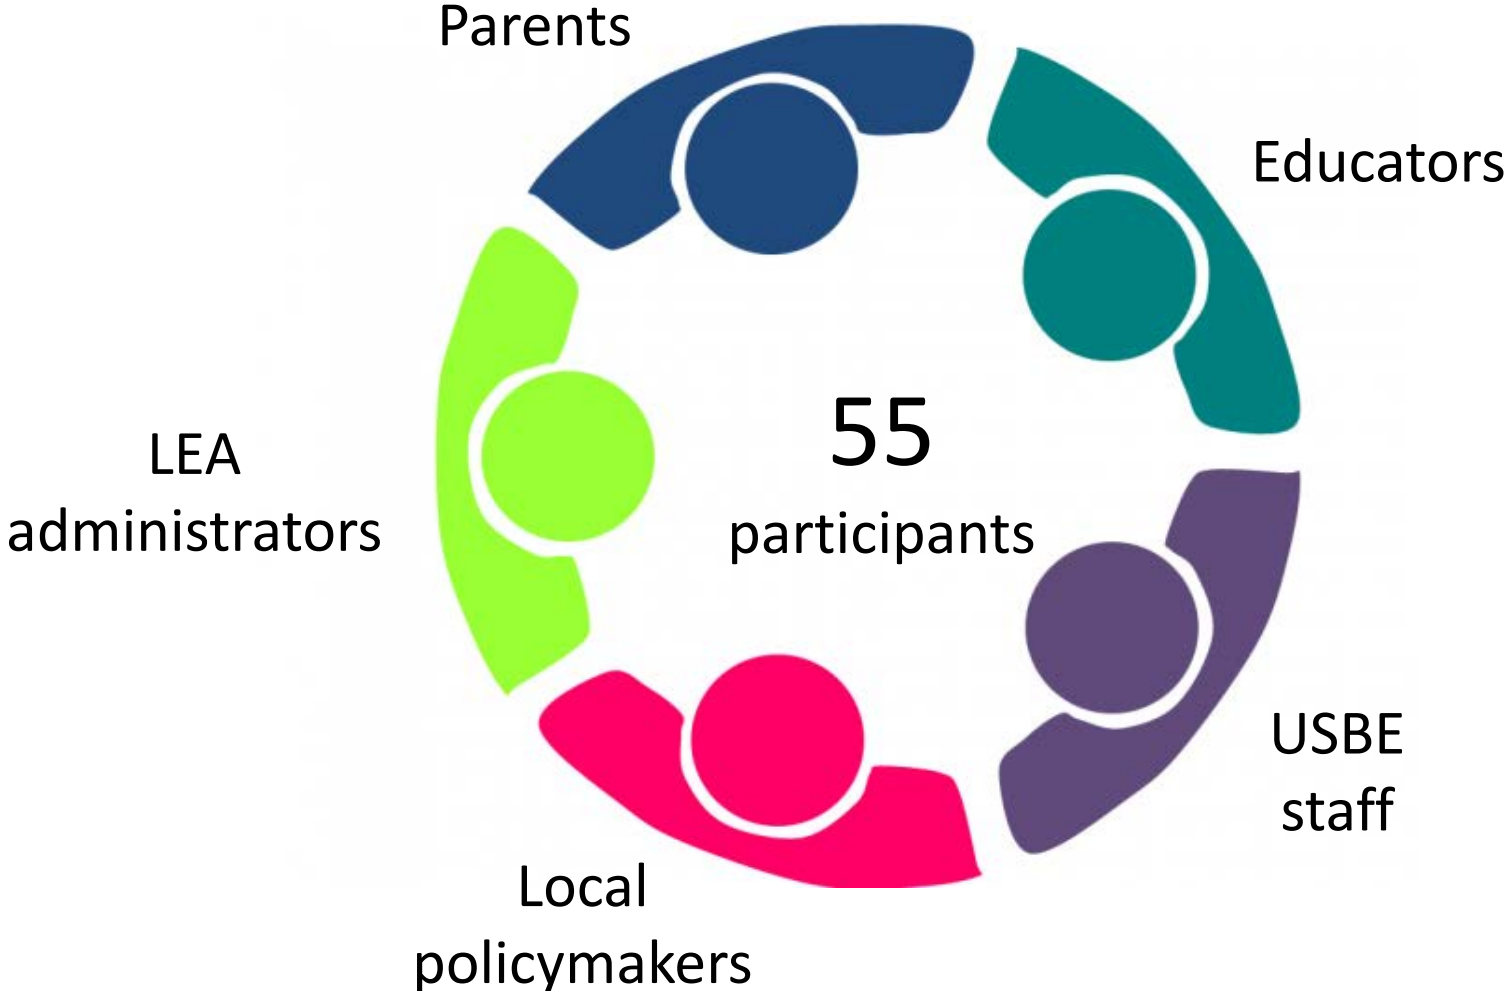

# Audience

## **Utah parents and community members**

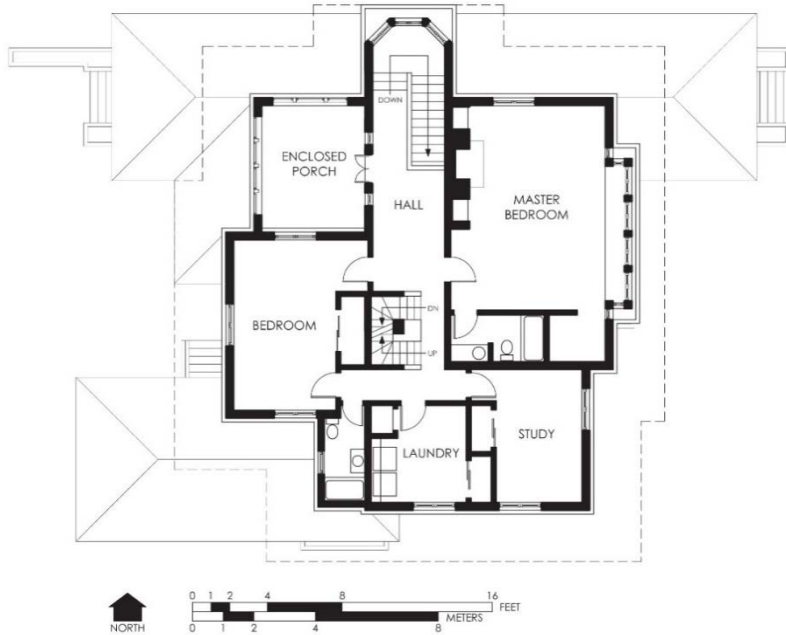

User need: Utah parents and community members who are inexperienced with school performance data must have a tool that is easily searchable, provides detail into specific content areas, and displays results clearly.

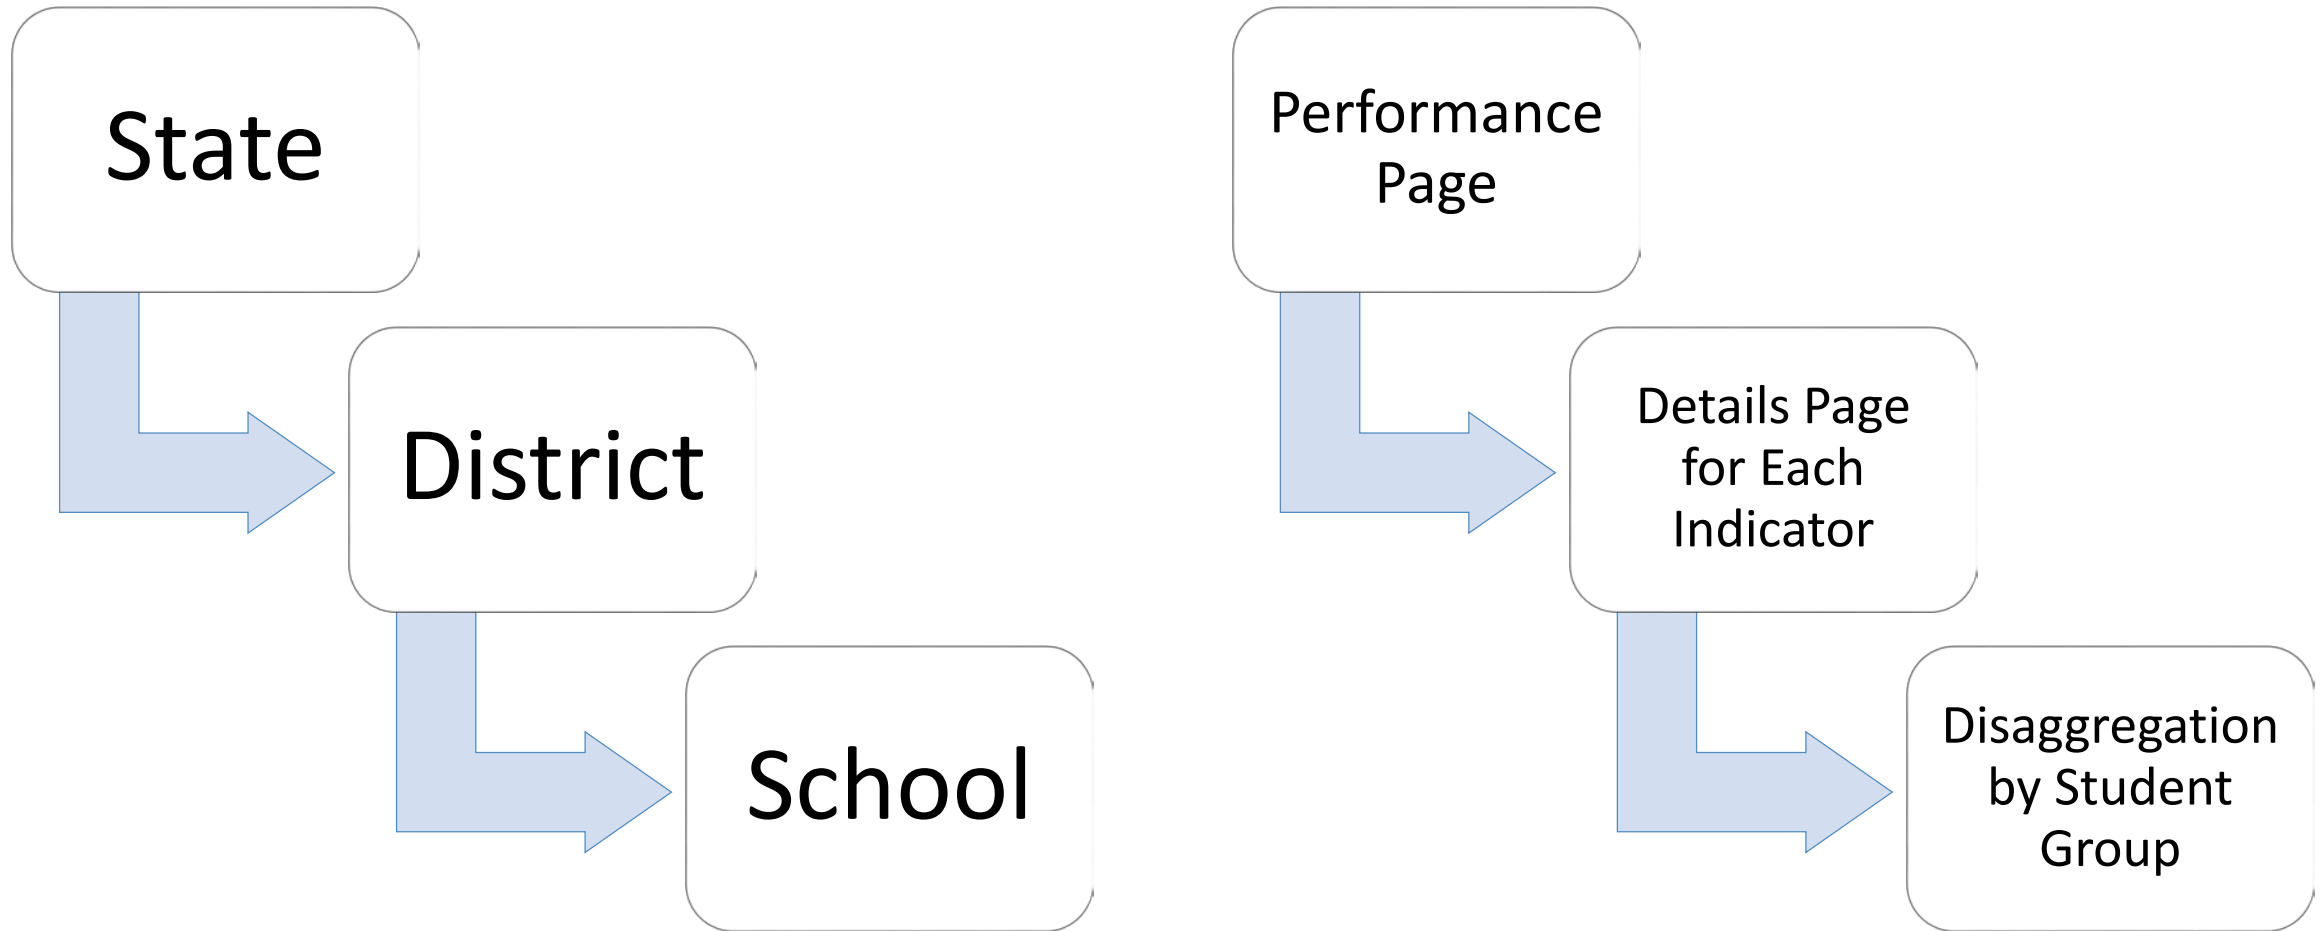

# Focus groups

# From design (wireframe) to build (web)

# Two pathways for navigation of report card

# Rating Options

# Contextualizing school performance data

- Summative ratings
- Indicator-level ratings

The way data is displayed is just as important as the data itself. Without context, numbers can be cold, opaque, and misleading.

# Other states' approaches to ratings

- Thirteen states use an A-F rating system.
- Eleven states use a descriptive rating system (Needs Improvement, Average, Good, Great, Excellent).
- Twelve states use an index rating system (1-100 or 1-10).
- Four states plus the District of Columbia use a 1-5 stars system.
- Six states use a tier-of-support system (Comprehensive Support and Improvement, Targeted Support and Improvement, None).
- Five states will not assign summative ratings (dashboard approaches, indicator level ratings).
