

Camp W.G. Williams

History

In 1914 President Woodrow Wilson withdrew 18,700 acres south of Salt Lake City from the public domain by Executive Order and designated them specifically for military purpose.

1914

History

In 1928 a permanent training camp was established and named after Brigadier General William G. Williams

1939

History

Many of these
buildings still
exist and are in
use to this day

Small Arms Ranges

25 Meter Ranges (3 Ranges)

111 Lanes total

Up to 5.56 MM Rifle, 45 CAL pistol,

Shotguns Targets to 25 meters

**Facilities include: Classroom, Latrine,
Ammunition Distribution Building**

300 M Firing
Point

500 M Firing
Point

Target Boards

Known Distance Range 20 Lanes

100-600 Meter firing points

**Up to 7.62MM ammunition (300 Meters or
greater only)**

Modified Record Fire Range 14 Lanes

Up to 5.56 MM

**Targets between 50-300 meters Facilities include:
Classroom, Latrine, Ammunition Distribution
Building**

Combat Pistol Qualification Course

15 Lanes

Up to 45 CALIBER

**Facilities include: Classroom, Latrine,
Ammunition Distribution Building**

Police Officers Standards Training Ranges Up to

45 CAL Ammunition

Use Primarily By Law Enforcement

Alternate Pistol Range 24 Firing Points

**7-25 Meter Target Points Max Range 50 Meters
45 CAL Ammunition**

Artillery, Demolitions, and Mortar Ranges

**5 Primary Firing Locations
Up to 155mm Round**

EQA / Heavy Demo / Mortar
3 demolition pads with limits varying between
40-320 pounds

Machine Gun Range

Multi-Purpose Machine Gun

Range 8 Lanes

Up to 50 CALIBER

Targets to 1000

**meters Vehicle Mounted or
Dismounted**

**Facilities include: Classroom, Latrine,
Ammunition Distribution Building**

Grenade Ranges

M203 / M7940MM Grenade Launcher Range 4

**Firing Points
40 MM rounds**

Hand Grenade Range

**4 Throwing Bays
M67 Fragmentation Hand Grenade**

EST II

Engagement Skills Trainer

Computer generates targets, terrain and weapons effects in a real-time three-dimensional display that also includes OPFOR weapons and sounds.

The EST II provides the capability to build and sustain marksmanship skills for squad and team fire distribution. It also contains control and judgmental use of force training with computer-generated imagery. The system also provides immediate feedback of hit/kill/miss for each firer that permits leaders to evaluate the effectiveness of their unit.

The system supports:

M16A2 Rifle

M9 Pistol

M240B Machine Gun

MK19 Grenade Machine Gun

M320 Grenade Launcher

M4 Carbine

M249 Machine Gun

M2 .50 caliber Machine Gun

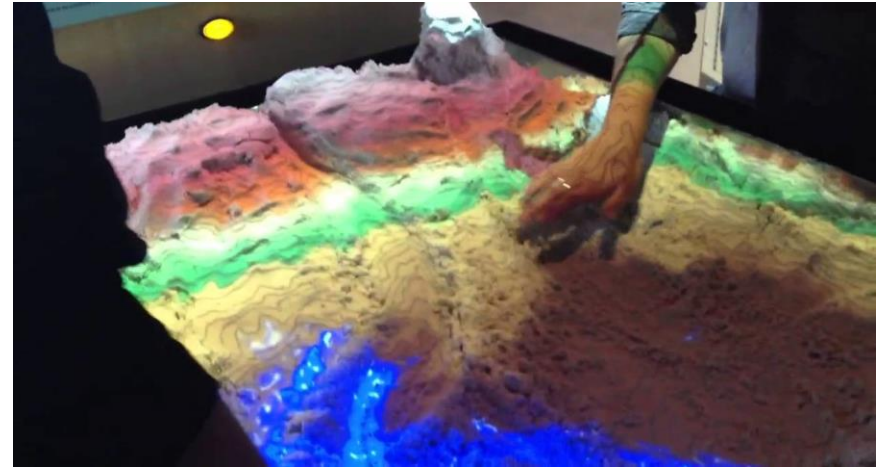

M136 Anti-Tank Weapon

M1200 Shotgun

VBS-3 and Sand Table

The most recent version of the Army's 3D virtual training game, Virtual Battle Space 3, allows players to personalize their avatar within the simulation and the scenes/scenarios look a lot more real as well.

Camp Williams VBS3 Training with USMC 4th LAR – July 11-13, 2018

Maj Adam Hoover brought his unit in for 3 days of intense VBS 3 maneuver, tactics and comms training. 4 crews in LAV-25A2's and 2 crews of LAV-AT ran multiple missions culminating in a final day event where the LAV teams ran a mission in VBS3 using their actual radios to stimulate an actual HQ unit stationed downrange on Camp Williams.

Those radio calls were tracked and mapped by the Command Unit to stimulate HQ battlefield tracking. The final event was a VBS3 Call For Fire mission made over actual radios to the live Command Unit who then relayed the fire mission, and subsequent adjust fire missions, to a virtual VBS3 gunline. It was a great success and the unit couldn't have been more satisfied.

IEDES

Improvised Explosive Device Effects Simulator

Suggested to be used with CI2C (Tracy Jackson 801-878-5360)

The IEDES system is used as a simulated Improvised Explosive Device (IED) blast, to train Soldiers on how to react to an IED.

- Enables units to train on current enemy IED TTPs
- Contractor to maximize training value
- May be used in conjunction with CREW2 systems

IED/UXO TRAINING AIDS

The IED training aids consist of different types of military grade munitions, home made devices and associated IED manufacturing accessories. Train the trainer instruction can be provided to assist trainers utilize the aids in classroom exercises and placement techniques for scenario enhancement.

The intent is to expose a unit to a wide variety of IEDs while in training. The munitions are flexible, adaptable, and interchangeable to reflect the current construct and design of IEDs used in an area of operation.

IED-DEFEAT LANE

Classroom

Improved Route

Villages

Compound

HEAT

HMMWV Egress Assistance Trainer

Provides HMMWV Rollover Drill training.

The HEAT is a crew compartment of a HMMWV mounted to an electronically controlled platform that enables the crew compartment to be rotated 360 degrees and stopped at any angle during its rotation. The device accommodates a crew of five and was specifically designed to train the mandated HMMWV rollover drills.

Community Support

- Local, State, and Federal Law Enforcement
- Youth and Civil Organizations

Hosted Events

- Panther Strike (Multi-National)
- Cyber Shield
- National Guard Biathlon Competitions
- Governor's Day
- Best Warrior Competitions

Future Construction Projects

- Special Forces Headquarters Building
- UTES Maintenance Expansion
- Special Forces Shoot House
- Modified Record Fire Target System Upgrade
- Know Distance Range Upgrade
- UFA Wildland Fire Station
- Cyber Operations and training buildings
