If funding is provided for the building block entitled “Maternal Mental Health Support”, then the following intent language is approved: In recognition of the passage of 2018 resolution, SCR11: Concurrent Resolution on the Awareness and Treatment of Maternal Depression and Anxiety, the state of Utah recognizes the need to support innovative, evidence-based programs that are designed to prevent or mitigate the negative health outcomes for women experiencing maternal depression and anxiety and their children. It is the goal of this funding to initiate programming in Utah and to secure additional federal and private grant funding to support ongoing operations after year three.
