

Meet gita®, the smart carrier that follows people on the go while transporting up to 45 pounds. gita promotes an active lifestyle designed for everyone. gita is simple, easy to use and share, functional, and fun. It's the sustainable high-tech solution for heading out into the world without having to reach for the keys to the car.

Imagine how differently you would move if you had a companion who moved just like you do while transporting your belongings both indoors or outdoors. Imagine exploring sidewalks, parks and squares, open walkways and pedestrian zones, campuses and workplaces with your hands free to work or play, to eat an ice cream cone, to hold hands with your toddler, sweetheart, grandson or grandmother.

With its zero turning radius, gita® is designed to replicate the full range of human motion. It can follow anyone who walks, rolls, or scoots. gita® has large wheels like a bicycle, so it can operate on irregular surfaces, indoors and outdoors, on sidewalks and streets, and up and down ADA compliant ramps.

gita® is built to carry up to 45 pounds of cargo and a volume of up to nearly 2,000 cubic inches (the equivalent of a loaded backpack, two stuffed grocery bags, or a case of wine).

gita® is first in a family of vehicles under development at Piaggio Fast Forward (PFF), a company whose mission is to build technology products that move the way people move.

**Overall Width/Height:**  
22.4" /24"

**Range/Charged:**  
4-5 hour run time/  
1 hour charge time

**Data connection:**  
Bluetooth/WiFi/LTE

**Carrying Capacity:**  
44 lbs (2 grocery bags)

**Tracking system:**  
Visual tracking with obstacle  
detection and avoidance

**Navigable terrain:**  
Indoors & outdoor  
on level hard surfaces,  
water resistant

**ADA compliant:**  
Full speed performance  
on ADA grades (8%),  
reduced performance on  
16% grades
