Health	UTG-190423020-aa	Utah Overdose Data to Action	HHS, PHS. Centers for Disease Control and Prevention	\$3,635,176	\$0	\$0	9/1/2019 - 8/31/2020	44%	N	0	Submitted	1	New
Description and Purpose of Grant:		This is a new grant to support recipients in getting high quality, complete, and timelier data on opioid prescribing and overdoses, and to use that data to inform prevention and response. Response efforts are shorter-term interventions to address an immediate need and are encompassed within the prevention component. There are two required components of this award: a surveillance component and a prevention component. The intent is to ensure that recipients are well equipped to do rigorous work under both components, and also to ensure that these components are linked and implemented as part of a system.											
Health*	UTG-190426030-aa	Epidemiology & Laboratory Capacity for Prevention and Control of Emerging Infectious Diseases (ELC)	HHS, PHS. Centers for Disease Control and Prevention	\$7,747,470	\$0	\$0	8/1/2019 - 7/31/2020	19%	N	0	Submitted	1	New
Description and Purpose of Grant:		The purpose of the Epidemiology and Laboratory Capacity for Infectious Diseases (ELC) cooperative agreement is to assist public health agencies in improving surveillance for, and response to, infectious diseases by maintaining, strengthening, and expanding capacities in the following areas: Epidemiology, Laboratory, Health Information Systems, and targeted, disease-specific prevention and control strategies.											
Health	UTG-190426020-aa	Public Health Emergency Preparedness (PHEP) Cooperative Agreement	Centers for Disease Control and Prevention	\$6,784,525	\$0	\$678,453	7/1/2019 - 6/30/2020	69%	N	0	Submitted	1	New
Description and Purpose of Grant:		The goal of the Utah Public Health Emergency Preparedness Program is to assure a well-coordinated, equipped, trained, and tiered system of response to public health emergencies and disasters in Utah. The Utah PHEP is designed to address all PHEP capabilities, Cities Readiness, and Medical Countermeasures initiatives by working in partnership with UDOH State Lab, UDOH Bureau of Epidemiology, Utah's Local Health Departments, Utah's Tribal Nations, and with other state, Region 8, and Federal partners. Through the support of a Program Advisory Committee, the Utah PHEP maintains close coordination with numerous external partners throughout the state.

	Description and Purpose of Grant: NRCS' Conservation Innovation Grants On-Farm Conservation Innovation Trials for Federal fiscal year (FY) 2019. Utah Soil Health Partnership is farmer lead collaboration with UDAF, USU, Utah NRCS, and Local Conservation Districts to promote the adoption of Soil Health systems across Utah, through education, on farm demonstration and evaluation. The Utah Soil Health Network project is designed to utilize the combination of education, on-farm demonstration and evaluation to increase overall adaption of soil health system throughout Utah. 16 On-Farm demonstration sites will be located in across four working areas of the state. These farming systems will include irrigated and dry land production systems, along with pastures and dairy operations, vegetables and fruit production. Major focus will be on adaption of full soil health systems into each of Utah's diverse farming systems, integration of cover crops and oil health practices into wheat fallow system and monitoring of impacts of these systems of factors such as water use. Evaluation will include, monitoring of agronomic and soil key indicators, as well as analysis of economic impacts and surveys of social implications for adaption. Information will be shared through farm field days, workshop, publications and online / social media outlets. Additionally as localized knowledge is gained though on-farm demonstration a support network and mentorship program will be established to further share the knowledge gained and keep forward moment in adoption of soil health practices throughout the state in the intermountain west.

------------------------	------------------	-----------------------	-----	-----------	----------	-----	-----------------------	----	---	---	-----------	---	--------------

Description and Purpose of Grant: The Superfund Block Cooperative Agreement (Block CA) addresses a number of important elements of the State Superfund Program within the Division of Environmental Response and Remediation (DERR). Superfund Core funding supports general, non-site-specific activities such as general program management, State/EPA coordination, and fiscal and contract management. Site Assessment work (including site discoveries, preliminary assessments and site investigations) are performed by DERR to identify contaminated sites that need further work under Superfund or other cleanup programs. Management assistance funding under the Block CA allows DERR to participate with EPA and other project stakeholders in activities at Superfund sites where EPA is the lead agency. These activities include investigations, site decision-making, remedial design and remedial action, and post remediation. DERR also uses management assistance funding to participate in Superfund activities at some federal facility sites and to coordinate with EPA and affected communities on sites under consideration for placement on the National Priorities List. Activities conducted under the Block CA help ensure appropriate community involvement and compliance with State cleanup requirements at Superfund sites. They are important in protecting human health and the environment, as well as allowing for redevelopment of sites.

Environmental Quality	UNF-190627010-aa	Preparation of WIPP Shipments	Western Governors Association	\$155,587	\$0	\$0	7/1/2019 - 6/30/2020	0%	N	0	Submitted	1	New
Description and Purpose of Grant:		Due to Utah's location, an enormous amount of hazardous materials shipments must pass through the state. Most of these routes travel through rural, sparsely populated regions. Emergency services in many areas are provided by all volunteer organizations. Radioactive material shipments through these areas create risks which must be managed with limited resources. Funds to provide training and equipment required to deal with these accidents is often impossible to obtain. This grant will prepare our public safety personnel to respond to potential transportation incidents related to DOE shipments scheduled to resume in the state in April 2017. Utah will also work to inform citizens and public officials regarding these transuranic wastes.											
Natural Resources	UNF-190708010-ad	Improving Production in Utah's Emerging Northern Paradox Unconventional Oil Play (Cane Creek)	University of Utah, Energy & Geoscience Institute	\$260,000	\$40,000	\$0	7/1/2019 - 6/30/2023	26%	N	0	Submitted	4	New
Description and Purpose of Grant:		Thin, tight clastic zones within the Pennsylvanian Paradox Formation (Cane Creek) are estimated to contain over 400 million barrels of oil as well as large quantities of natural gas. These vast resources in this emerging play have drawn interest from numerous production companies, but current production in most wells falls well short of potential due to technological hurdles. The project team will leverage back-catalogues of publicly-available and proprietary data as well as acquiring new core, state-of-the-art 3D seismic, and advanced downhole geophysical logs. Geomechanical models will be used to predict the occurrence of natural fractures and faults, as well as forecast the efficacy of novel stimulation approaches. All the data will be integrated in coupled numerical models and machine learning algorithms, optimization of which will be used in the generation of a regional-scale Development Strategy Plan that will be field validated.

		Description and Purpose of Grant: Meaningful implementation of SB32 requires the availability of specialized legal counsel capable of identifying and supporting youth's needs and strength. Currently, however, there are not enough attorneys in Utah who possess specialized expertise in delinquency representation or have access to training that would support the development of that expertise. The goals of this project are to provide: • Access to juvenile-specific training for all attorneys appointed to represent youth in delinquency proceedings in Utah. • Support for standardized defense practice across the state in terms of scope of representation. Specifically, minors should have access to legal representation during all stages of the delinquency proceedings, including post adjudication. • Support for the development of a statewide community of juvenile defense advocates, who identify as attorneys with expertise in a specialized and valued area of defense practice. The outcomes/ deliverable anticipated from this project are as follows: • 11 quarterly, tuition-free, and geographically accessible (i.e., distance technology enabled) specialized, and effective training for all attorneys appointed to represent youth in delinquency proceedings in Utah; • 4 practice tools to supplement and amplify the training program; and • the engagement of the majority of attorneys who accept delinquency case appointments in the training program and utilization of the practice tools.
