“Means” Tests – Current metrics sufficient?

- **Prevent leaning on the grid**
- **Prevent cost shifts**
- **Ensure utilities can meet their obligations during periods of systemic stress**
- **How should passive generation be treated?**
- **Are current metrics adequate?**

Bonneville Power Administration Actuals - Week Feb. 2, 2019

Data: Bonneville Power Authority

A background image of window blinds with light filtering through, creating a pattern of light and shadow. The blinds are dark, and the light coming through is a warm, golden-brown color. The image is partially obscured by a dark blue horizontal bar and a dark blue vertical bar on the left side.
