Excellence in the Community: Performance Measures

Excellence in the Community intends to hold at least the same number of concerts and events as it has in years past. With this appropriation, Excellence in the Community will be able to offer additional concerts and events to communities and cities outside of the Wasatch Front. Many of these cities and communities have requested for these concerts from local, Utah artists.

The performance measure for this particular appropriation request will be for Excellence in the Community to demonstrate the additional concerts provided in the state of Utah. Excellence in the Community is happy to report to the legislature about the additional concerts provided around the state as a result of the appropriation. Additionally, representatives from various cities and communities can speak to the benefit of the concerts and community events put on by Excellence in the Community.
