

Utah State Parks and Recreation  
FY2021 Capital Development Request

Quail Creek State Park New South Wash Campground

Project Estimate: \$5,200,000

**Project Description:**

Quail Creek State Park New South Wash Campground.

Build a new campground at the Sand Wash area of Quail Creek State Park. The campground would include Recreation Vehicle Campsites; both pull through and back in. Full hook ups with water/power and a new dump station. The Campground will include Picnic pavilions, Cabins/Yurts, a Group use Site, and Flush Restrooms with Showers along with Vault Toilets.

**Proposed Construction Items:**

- Install 28 RV Pads
- Install 28 Shaded Picnic Pavilions
- Install 2 Camp Host Sites with Water/Power/Sewer
- Install 1 Flush Restrooms With Showers
- Install 2 Double Vault CXT's
- Install 1 Group Use Pavilion for 50 people.
- Install 6 Cabin/Yurts
- The Campground will be about 22 Acres

**Proposed Use:**

This new South Wash Campground would provide additional Recreation Vehicle Camping in Southern Utah. Quail Creek State Park offers wonderful opportunities for recreation such as boating, fishing, and hiking. By providing Cabins/Yurts this would also provide an opportunity for the public to recreate even if they did not have a Recreation Vehicle.

**Justification:**

In 2014 Quail Creek State Park had 63,000 visitors. Last year 2019 Quail Creek State Park had over 148,000 visitors recreate at the Park. That's a 57% increase in visitation in 5 years! The existing Campground of 25 Campsites is full over 300 nights per year. There needs to be additional campsites to accommodate demand for Recreation at Quail Creek State Park

**Our Mission at Utah State Parks:**

*"To provide more recreation to more people, to more places in Utah".* A new campground at Quail Creek State Park will do just that, **"Provide More Recreation"!**
