

HB278 JORDAN RIVER AMENDMENTS
Representative Cheryl Acton

Requires UDOT to:

- post identifying signs where state roads cross the Jordan River
- consult with the Jordan River Commission to design consistent, distinctive barrier fencing as bridges are replaced going forward where state roads cross the Jordan River

Currently, barrier fencing along the Jordan River varies from place to place with no indication that the Jordan River with its system of trails is below.

The river can easily be mistaken for a canal.

Signs at street level will alert drivers and pedestrians to the existence of the river below.
