# More than Stargazing in Utah

•In 2019, tourists spent more than \$10 billion in the state with travelers seeking adventure in Utah's vast park system among its highest spenders.

- From, A Space for Darkness, Utah State Magazine, Winter 2021

•"Two-thirds of Americans live in a place where they can no longer see the Milky Way," says Zach Miller, assistant professor of park and protected area management at Utah State University. Most people have never seen really pristine sky before."

## License Plate Amendment

# A heritage shared by all Utahns

In 2018, State legislators passed a resolution calling on Utahns "to transition outdoor lighting from unshielded to shielded in accordance with IDA standards" to curb light pollution.

- (S.C.R. 2) Concurrent Resolution Encouraging the Use of Shielded Light Fixtures on Outdoor Lights
