

HB 114

EMERGENCY EXECUTIVE POWERS AMENDMENTS

Drops the notice requirement limit from \$2M to \$1M on emergency procurements

Adds these details as to what should be included in the notice

- an accounting of items purchased or funded
- who payment was or is to be made to
- when payment was or is to be made
- how much was or is to be paid

The Executive Branch shall provide a copy of the contract to any legislator upon request

Changes the requirement to make an emergency procurement from a "circumstance that is likely to have a negative impact" to a "circumstance that is likely to cause substantial harm"

These changes will increase transparency and create a higher standard for when these no-bid contracts can be used
