

## Welcome to UETN

# We network for education and healthcare

The COVID-19 pandemic has provided The Utah Education and Telehealth Network with an array of challenges in 2021. UETN responded quickly to support Utah's K-12 schools, colleges, universities, libraries, clinics, and hospitals.

UETN has a wide-ranging mission to provide broadband internet access in service of Utah's educational and healthcare institutions, and to provide services to teachers and learners and clinicians and patients. Our response to the pandemic has required investments in hardware to advance our technological mission, and investments in software and services to help those who use our network.

We believe access to educational and healthcare services is a critical state function, and during these challenging times, UETN has stepped forward to provide top-tier services to the people of Utah and to our client organizations.

During the pandemic, the Utah Legislature provided a one-time grant of \$125 million of CARES funding to UETN to make critical network upgrades and distribute urgent funding to its stakeholders for pandemic-related expenditures. UETN and its partners completed more than 250 projects including:

- Significant network upgrades to support enhanced equipment and tools to respond to the pandemic and accommodate ongoing growth.
- Extensive WiFi upgrades at both K12 and higher education institutions throughout every part of the state to support increased technology usage as instructors provided remote and blended learning.
- Multiyear software contracts to allow K12 and higher education instructors to utilize technology both in the classroom and remotely.
- Providing Utah's higher education institutions and libraries an opportunity to purchase laptops and hotspots. These devices were lent to students and patrons to support remote learning, working from home, and other key functions.
- Opportunities and incentives for Utah's teachers to obtain additional professional development training as they moved to online and blended teaching.
- Telehealth kits to Title I schools in rural and remote areas, to ensure access to nursing services.

Because this work is funded by the public, we take our stewardship of those dollars seriously. We pride ourselves on building partnerships, on finding ways to be cost-efficient, on being innovative in ways that stretch every dollar.

We invite you to learn more about us in the following pages and at our website [www.uen.org](http://www.uen.org).

Robert Wagner  
*Chair, UETN Governing Board*

Ray Timothy  
*CEO and Executive Director, UETN*

# UETN serves customers throughout Utah

**PURPOSE**

We connect people and technologies to improve education and healthcare in Utah.

**INITIATIVES**

<b>NETWORK</b> We will administer a secure, advanced, and stable network.	Grow capacity > Anticipate and plan for demand and other exigencies > Manage security risk > Support High Performance Computing for research > Merge UEN and UTN infrastructure > Leverage peering
<b>APPLICATIONS</b> We will curate and support high quality resources and tools.	Align to core needs and standards > Support certificate and degree programs of our partners > Maximize cost savings and collaborations through consortia > Improve accessibility
<b>SUSTAINABILITY</b> We will secure ongoing funding for our work.	Be transparent and efficient > Maximize E-Rate and HealthCare Connect > Seek grants and partnerships > Leverage state and national initiatives > Liaise with appropriators and partners
<b>BROADCAST</b> We will deliver programs and projects to benefit our community.	Program content to educate and inspire > Produce new media > Engage with and amplify the work of community partners > Build capacity with emerging media platforms: cross reality media, live linear streaming, NextGen TV and others > Collaborate with peer stations
<b>TELEHEALTH</b> We will assist health care organizations to achieve the triple aim of reduced costs, higher quality, and increased patient satisfaction.	Foster telehealth adoption and deployment > Serve as a regional Telehealth Resource Center > Develop valuable and timely telemedicine resources > Serve as a neutral convener for telehealth initiatives > Maintain HIPAA compliant systems and environment > Advance access to telehealth services
<b>PROFESSIONAL LEARNING</b> We will provide excellent professional learning experiences to support our stakeholders.	Coordinate and provide training for state-licensed software > Increase support for school administrators, libraries and higher education > Provide opportunities to earn Ed Tech endorsement and related credentials > Produce quality multimedia professional learning content > Continue to understand and promote progressive practices that enhance education through technology
<b>OPERATIONS</b> We will make decisions and take actions that match our values.	Support Board governance and Advisory Councils > Update policies and service catalog > Improve diversity, equity and inclusion > Communicate our work through publications and media
<b>PERFORMANCE INDICATORS</b> We will track and report our performance, learn from and make decisions using data.	1. 100% of sites are connected at sufficient capacity to meet need 2. Network uptime and availability are 99.9% or greater 3. Number of videoconferencing classes for education and telehealth increase 4. Amount of telehealth technical assistance provided 5. Website, social media and app utilization metrics show increased engagement 6. Data show cost savings through consortia purchasing 7. Increase in PD-courses, credit hours, and endorsements completed 8. Finances are stable and sustainable 9. The percentage of return on E-Rate and Rural Healthcare funds increases 10. Measures of staff and constituent satisfaction remain positive

**VALUES**

**Service:** open, honest, clear and respectful interactions, documented policies and actions

**Innovation:** new ideas and creative solutions, a responsible risk-taking culture

**Diversity:** inclusion and respect for all, staff and governance representative of all we serve

**Integrity:** fairness, impartiality, balance and equity

**Fiscal Responsibility:** good stewardship and public trust

**Empowered Staff:** opportunities for professional growth, market-aligned compensation

**Communication:** seek input; give voice to staff and stakeholders, support engagement across platforms

**Safety:** welfare, security and well-being of staff and constituents

Updated by UETN Governing Board, October 2021

UETN services match the priorities and missions of the institutions we serve.

UETN SERVES:	IN SUPPORT OF:	AND THEIR MISSION TO PROVIDE:

# How do we serve Utah?

UETN services are integral to our mission of networking for education and healthcare. They include: Networking, Application, Support, Telehealth and Operational Services.

## 1. Networking Services

Networking Services extend and maintain UETN's wide area Internet and public TV networks. Students, library patrons, parents, educators, patients and healthcare providers all benefit from these services.

**WIDE AREA NETWORK (WAN)** – The Network infrastructure carries high speed Internet data and real-time applications including video conferencing to communities throughout the state. UETN connects all public educational institutions at a minimum of 1Gbps and healthcare sites at 100MB-1Gbps. Network engineers

and staff research, design, build, monitor and contract with multiple Utah service providers across the state. This partnership benefits businesses and homeowners who gain increased bandwidth because UETN is the anchor tenant for their local community.

**INTERNET ACCESS** – UETN manages a large data network used by the State of Utah to support the state's growth and economic development goals. It also provides the capacity for more than 640Gbps (gigabits per second) of Internet traffic from several diverse providers to connect Utah schools and universities, State and county agencies, libraries, clinics and hospitals. The Network saves Utah institutions thousands of dollars per month by purchasing Internet access in bulk from multiple competing service providers.

**NETWORK SUPPORT AND SECURITY MONITORING** – Network Support continuously tracks, reports and manages Internet, data, and video traffic on UETN's Wide Area Network (WAN). Security monitoring detects attacks on the Network, identifies miscreant tools and trends, and mitigates infrastructure vulnerabilities. UETN provides in-depth leadership in security training and works in partnership with national and global security organizations to avert large threats and incidents.

**BROADCAST** – Through a robust network of translators, UEN-TV broadcasts statewide: UEN-TV 9.1 provides a full schedule of programs to engage learners of all ages; First Nations Experience (FNX) 9.3 shows programs by and about American Indian and Indigenous people; and NHK World-Japan 9.4 offers English-language news and lifestyle programming from Japan.

**INTERNET FILTERING** – UETN licenses content-filtering software on behalf of Utah K-12 public schools, and public libraries to limit child exposure to harmful content such as violence and pornography. In addition to protecting children, this enables Utah schools and libraries to meet requirements of the Children's Internet Protection Act (CIPA) and maintain eligibility to receive E-Rate funding. UETN also provides and coordinates internet filtering with healthcare facilities.

## 2. Application Services

Working with stakeholders, UETN licenses or develops multiple applications that meet education and telehealth needs. This optimizes cost efficiencies through shared support, infrastructure and procurement.

**UETN VIDEO CONFERENCING** – UETN Video Conferencing is Utah's high quality, high definition, conferencing system for education, telehealth and government. Thousands of students and educators use it every day for live, instructor led courses, collaborative meetings, training and other special educational events. UETN Video Conferencing also incorporates robust desktop video conferencing option, such as Webex and Zoom, allowing students, instructors, and administrators to collaborate from almost anywhere.

**LEARNING MANAGEMENT SYSTEM (LMS)** – Working with other Utah institutions, UETN licenses and supports software to manage online components of in-person and online classes; a shared platform for information sharing and collaboration. UETN contracts with Utah-based Instructure for its Canvas LMS. The Network regularly convenes higher and public education partners who work collaboratively to maximize this service.

**UTAH'S ONLINE LIBRARY** – This statewide service purchases online library resources from national suppliers at consortium discounts. The Library provides Utahns access to research sources such as newspaper articles, magazines, professional journals and eBooks. UETN pays for the K-12 portion of the service, with Public Libraries and Academic/College Libraries benefiting from consortium pricing. Preschool Path is UETN's online library of resources for young children and their parents and caregivers.

**WEB CONFERENCING** – UETN licenses and supports desktop-based conferencing that creates a live, virtual classroom, office or conference room with two-way audio, video, interactive whiteboard, computer desktop sharing, one-on-one interviews and chat. Tools available consist of Zoom (40,000 accounts for K12), Webex (10,000 accounts for all educational institutions) and traditional video conferencing classroom equipment. Zoom and Webex conferencing software is instrumental for online education throughout the pandemic and beyond. These tools aide in interactive classrooms, mentoring, virtual office hours and presentations that include district wide administrative collaborations.

**TEACHING AND LEARNING TOOLS** – UETN provides Utah educators, faculty, and pre-service educators with tools they need to teach effectively. UETN also supports various web projects aligned to state education goals, such as SEEd (Utah Science with Engineering Education) learning resources and Media Literacy. UETN's eMedia service includes more than 20,000 videos, images, lesson plans, and open educational resources. UETN works closely with the Utah State Board of Education (USBE) to develop curriculum applications such as the Utah Core Curriculum Database with curated lesson plans, applications, and links.

## 3. Support Services

Support Services provide learning assistance to the users of UETN infrastructure and applications.

**PROFESSIONAL LEARNING** – UETN provides courses, workshops and presentations to help end-users (teachers, faculty, librarians, principals and clinicians) use technology and Network infrastructure services effectively. UETN offers technology integration training in-person and online via Canvas LMS, on-demand training videos and the Homeroom audio podcast. Our professionals work closely with district and school leaders to provide workshops specific to local school needs including license endorsements and technology credentials for teachers.

**REGIONAL SUPPORT** – The UETN Operation Center and UETN Field Operations provide 24x7 monitoring, management and regional assistance to the data and video conferencing network. In addition, UETN helps sustain four Regional Education Service Agencies (RESA) with technical support, instructional technology support and personnel funding. The agencies include NUES, Northeastern Utah Educational Services in Heber City; CUES, Central Utah Educational Services in Richfield; SEDC, the Southwest Educational Development Center in Cedar City; and SESC, the Southeastern Educational Service Center in Price. The RESAs provide technical support, technology services and professional development to the LEAs within their service area.

**E-RATE AND RURAL HEALTH CARE SUPPORT** – UETN assists Utah public school districts, charter schools,

private schools, libraries, Head Start programs and healthcare providers to obtain E-Rate and Healthcare Connect Fund reimbursements for broadband circuit costs. These programs are part of the Federal Communication Commission's Universal Service Fund. Consumers, such as cell phone users, pay into this fund as a part of their monthly bills. With UETN's E-Rate and Healthcare Connect Fund support, Utah schools, libraries and healthcare facilities are laying claim to millions of reimbursement dollars set aside for education and healthcare. UETN provides support and training to schools and libraries across the State in their efforts to file their E-Rate applications for School and Library Local Area Network infrastructure including, but not limited to, WiFi equipment. All Utah E-Rate applicants including the UETN Consortium have been committed \$130 Million + over the past 6 years. UETN E-Rate also provides support for the new Emergency Connectivity Funding Program to schools and libraries across Utah seeking remote learning equipment and services for their students and patrons at home. Utah applicants have been obligated well over \$30 Million in Emergency Connectivity Funding awards in FY2021.

## 4. Telehealth Services

UETN strengthens Utah's healthcare safety net by connecting rural and critical access hospitals, clinics, community health centers, dialysis centers, and local health departments in rural and medically underserved communities. High quality broadband and cyber security services allow secure access to mission-critical applications, such as remote-hosted electronic medical records, practice management systems, and lab, pharmacy and radiology information systems. Telehealth services, such as tele-stroke, tele-oncology, and tele-pharmacy, delivered over the network, expand patient care services in rural communities. Care coordination, chronic disease management, behavioral health services, and healthcare provider training are widely facilitated via UETN. Telehealth services include access to a HIPAA compliant telemedicine platform for healthcare providers to connect directly to their patients regardless of location. UETN is the home of the Northwest Regional Telehealth Resource Center (NRTRC), which is a HRSA funded cooperative agreement to serve a seven-state region (AK, ID, MT, OR, UT, WA, WY) to advance the development, implementation, and integration of telehealth through sharing information, training, and technical assistance.

## 5. Operational Services

These business functions provide the operational foundation for UETN's networking, application, support and telehealth services. They include basic operations and maintenance, administration, accounting, internal telecommunications, utilities, database backups and internal security tools.
