

Applied Science Building

January 31, 2022

BACKGROUND

The Applied Science Building project will renovate and expand the historic William Stewart Building, which opened in 1919.

The new facility will become the home for the departments of Physics, Astronomy and Atmospheric Science.

The project was approved and funded by the State Legislature in 2021, to include:

- \$60 million in State funding
- \$25 million in University donations

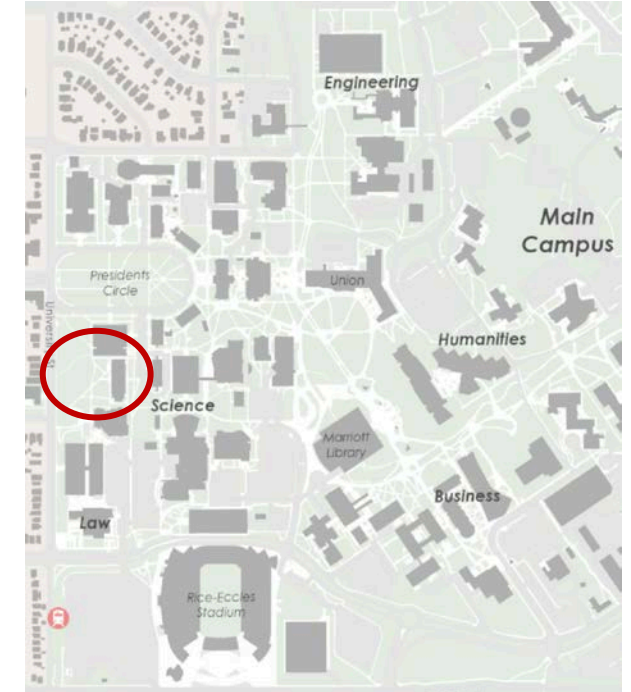

The University of Utah requests approval to bond to cover donation funds that will be received over time
