

We exist to educate and empower parents in Utah to advocate for their children.

---

2-15-22

Dear House Business and Labor Committee Members:

The Utah State Constitution recognizes that “a parent has the right, obligation, responsibility, and authority to raise, manage, train, educate, provide and care for...the parent’s children.” We believe parents know what is best for their children and should have the right to choose whether or not to vaccinate their children without restrictions in participating in society. No one should be discriminated against based on vaccination status and no one should be coerced into a medical procedure.

Life, liberty and the pursuit of happiness are unalienable and the government is established to secure them. The right to work, the right to free enterprise, the right to gather are also rights granted within the social contract. Even consumers are granted rights. Allowing vaccine passports eliminates our rights to these activities and instead makes engagement in those activities a privilege to be enjoyed by only those who satisfy a given criteria.

Further, an individual's medical status is confidential and no one should be forced to disclose that as a condition of free participation in society.

We ask you to support HB60 to protect individual freedoms.

Sincerely,

The Parents of Utah Parents United
