**PLACE A RECENT PHOTO HERE**  
(Update Yearly)

According to law enforcement agencies, a recent photo is instrumental in helping locate a missing child.

PRINTED IN THE USA

INKLESS FINGERPRINT/DNA CARD

# National Child Identification Program

**THIS CARD IS TO BE MAINTAINED BY PARENTS OR GUARDIANS.**

- No messy black ink – fingers stay clean!
- For your children ages 4-18.
- In case of emergency, this card may be provided to law enforcement agencies to help reunite you with your missing family member.

For additional I.D. Kits visit our website at  
[WWW.CHILDIDPROGRAM.COM](http://WWW.CHILDIDPROGRAM.COM)

# Inkless Fingerprint Identification Card

- Type or print all information in black
- See reverse side for further information
- If your child is missing, take this fingerprint card to your local police department

\* Four fingers taken simultaneously: coat each finger separately, then lightly press all four fingers at the same time.

**For Your Children Ages 4-18**

## How to take prints

**Do not open foil pouch until ready to fingerprint.**

1. Open the foil pouch. It contains a strip coated with a clear inkless fingerprint activation solution.
2. Take out the strip. Place the strip on pouch, on the designated area.
3. Place I.D. Card and pouch with strip on a flat surface.
4. **Lightly and quickly touch** your (child's) finger on the strip coated with the activation solution.
5. **Lightly and quickly touch** the coated finger in the appropriate box on the I.D. Card.
6. **Throw away the foil pouch and strip once you are finished.**

**Do not roll finger.**

- Although no black residue is left on the finger, wash your (child's) hands or wipe with damp cloth.
- Fingers must be printed in sequential order. (Please note any amputations or partial amputations in the correct finger block.)
- When completed, fingerprints should be clear and unsmudged. If uncertain, place a second print next to the first.

**NOTE:** Fingerprints are initially light and will continue to grow darker.

Take practice prints in area provided below.

## DNA Section

Technology has now advanced to the point that saliva is all that is needed for authorities to gather a DNA sample of your child.

Taking your child's DNA is as easy as 1, 2, 3.

1. Insert the corner of the card into child's mouth.
2. Close mouth on card.
3. Suck on card for 1 second. This will embed your child's saliva/ DNA into the card.

\_\_\_\_\_  
DNA Sample Date

If ever needed, authorities may cut out this section of the I.D. kit to retrieve your child's DNA.

**NOTE:** DNA is present if corner is moist.
