

SALT LAKE TECHNICAL COLLEGE SCHOLARSHIPS – \$250,000 ONGOING FUNDING

Salt Lake Technical College (formerly the SLCC School of Applied Technology) serves students in programs leading to high wage, high demand careers and provides technical education in Salt Lake County.

With small classes and accessible faculty, Salt Lake Tech works alongside industry partners to help students overcome barriers, see themselves as college-level learners and guide them into skill-based programs so they can move quickly into or advance in the workforce.

- Over 140 students at Salt Lake Tech will receive scholarship support annually. While program tuition is currently subsidized by the Utah legislature, affordable tuition and existing scholarships are still not within reach for many Salt Lake County residents, including underrepresented populations and those that may need additional academic support, which is currently not covered by existing scholarships. This funding will enable Salt Lake Tech to better serve its community.
- This funding will help students cover the costs of tuition and program fees across a wide range of technical education programs as well as foundational academic readiness courses that will help students succeed in their technical education programs, including:

Foundational Education

Basic Skills (math & reading)
English as a Second Language (ESL)
Computer Skills

Technical Education

IT
Electronics
Machining
Health Care
Diesel & Automotive
Truck Driving
