

FODDER

Warrior Rizen Ranch

The Basics

Barley or wheat
6,000 lbs (3 tons) Daily
Watering System
Building with heat
and humidity controls

7 Day Cycle

Benefits

- Protection against Utah's droughts
- 90% less water use/reusable water
- Same feed yield with lower land use
- Less feed waste
- Hydration

Our Fodder room is capable of putting out 6,000lbs/3 tons of fodder daily.

A nice alfalfa field will yield 5 tons per acre during the growing season.

A 200 acre alfalfa field, with the 5 tons per acre yield, will produce 1,000 tons.

At 3 tons a day the fodder room will grow 1500 tons yearly.

Comparisons

- Alfalfa
- Protein 10%-16% \$0.69
- Energy \$0.207 per unit

- Fodder
- Protein 12%-15% \$0.99 (dry matter)
- Energy \$0.28 per unit
